Bibliographie Linguistique de L'annee 1999 Mark Janse,Hella Olbertz,Sijmen Tol,2003-11-30 Setting out the historical national and religious characteristics of the Italians as they impact on the integration within the European Union this study makes note of the two characteristics that have an adverse effect on Italian national identity cleavages between north and

south and the dominant role of family It discusses how for Italians family loyalty is stronger than any other allegiance including feelings towards their country their nation or the EU Due to such subnational allegiances and values this book notes that Italian civic society is weaker and engagement at the grass roots is less robust than one finds in other democracies leaving politics in Italy largely in the hands of political parties The work concludes by noting that EU membership however provides no magic bullet for Italy it cannot change internal cleavages the Italian worldview and family values or the country's mafia dominated power matrix and as a result the underlying absence of fidelity to a shared polity Italian or European leave the country as ungovernable as ever

**The Underspecification of Past Participles** Dennis Wegner, 2019-02-19 Are the past participial forms that occur in passive and perfect periphrases substantially identical or should they rather be distinguished into accidentally homophonous passive and perfective participles This book discusses the long standing mystery of past participial non identity on the basis of a broad range of synchronic data from Germanic and Romance eventually focussing on German and English as these draw the most relevant distinctions e.g. auxiliary alternation a passive auxiliary that is not BE Together with some contrastive insights from Slavic as well as the diachrony of passive and perfect periphrases this clearly points to an identity view The novel approach that is laid out suggests that past participles conflate diathetic and aspectual properties The former cause the suppression of an external argument whereas the latter impose event structure sensitive perfectivity which only induces the completion of a situation if the underlying eventuality denotes a simple change of state An approach along these lines sheds light on the intricate properties of past participles and the auxiliaries they occur with the determinants of auxiliary selection as well as the interplay of argument and event structure

**Subordinating Modalities** Pascal Hohaus, 2020-02-26 This study is concerned with the use of the English modals may might can could shall should will would and must in adverbial relative and complement clauses It employs synchronic data from the British National Corpus and quantitative methods to investigate similarities and differences between the core modals as well as modal specific preferences in subordinate clauses The main finding is that modal verbs in subordinate clauses may be conceived of as meso constructions and that they qualify as micro constructions once further syntagmatic features are considered This allows for distinguishing modal verb phrases with different degrees of complexity schematicity productivity and subjectivity Further applications give us insights into collocations modal harmony semantic preference and the attraction of dynamic meaning to relative clauses
