## **Tense And Aspect In The Languages Of Europe:**

**Tense and Aspect in the Languages of Europe** Östen Dahl, 2000 The series is a platform for contributions of all kinds to this rapidly developing field General problems are studied from the perspective of individual languages language families language groups or language samples Conclusions are the result of a deepened study of empirical data Special emphasis is given to little known languages whose analysis may shed new light on long standing problems in general linguistics

**Eurotyp** Östen Dahl, 2008 This volume puts the European tense aspect systems in a consistent typological and diachronic perspective *Adverbial Constructions in the Languages of Europe* Johan van der Auwera, 2011-05-09 The series is a platform for contributions of all kinds to this rapidly developing field General problems are studied from the perspective of individual languages language families language groups or language samples Conclusions are the result of a deepened study of empirical data Special emphasis is given to little known languages whose analysis may shed new light on long standing problems in general linguistics The L2 Acquisition of Tense□Aspect Morphology M. Rafael Salaberry, Yasuhiro

Shirai, 2002-10-24 The present volume provides a cross linguistic perspective on the development of tense aspect in L2 acquisition Data based studies included in this volume deal with the analysis of a wide range of target languages Chinese English Italian French Japanese and Spanish Theoretical frameworks used to evaluate the nature of the empirical evidence range from generative grammar to functional typological linguistics Several studies focus on the development of past tense markers but other issues such as the acquisition of a future marker are also addressed An introductory chapter outlines some theoretical and methodological issues that serves as relevant preliminary reading for most of the chapters included in this volume Additionally a preliminary chapter offers a substantive review of first language acquisition of tense aspect morphology The analysis of the various languages included in this volume significantly advances our understanding of this phenomenon and will serve as an important basis for future research **Slavic on the Language Map of Europe** Andrii Danylenko, Motoki Nomachi, 2019-10-08 Conceptually the volume focuses on the relationship of the three key notions that essentially triggered the inception and subsequent realization of this project to wit language contact grammaticalization and areal grouping Fully concentrated on the areal typological and historical dimensions of Slavic the volume offers new insights into a number of theoretical issues including language contact grammaticalization mechanisms of borrowing the relationship between areal genetic and typological sampling conservative features versus innovation and socio linguistic aspects of linguistic alliances conceived of both synchronically and diachronically The volume integrates new approaches towards the areal typological profiling of Slavic as a member of several linguistic areas within Europe including SAE the Balkan Sprachbund and Central European groupings s like the Danubian or Carpathian areas as well as the Carpathian Balkan linguistic macroarea Some of the chapters focus on structural affinities between Slavic and other European languages that arose as a result of either grammatical replication or borrowing A special emphasis is placed on contact induced

grammaticalization in Slavic micro languages      **The Grammaticalization of Tense, Aspect, Modality and Evidentiality**

Kees Hengeveld, Heiko Narrog, Hella Olbertz, 2017-09-11 This book brings together a series of contributions to the study of grammaticalization of tense aspect and modality from a functional perspective All contributions share the aim to uncover the functional motivations behind the processes of grammaticalization under discussion but they do so from different points of view      Tense, Aspect, Modality, and Evidentiality Dalila Ayoun, Agnès Celle, Laure Lansari, 2018-08-15 After an introductory

chapter that provides an overview to theoretical issues in tense aspect modality and evidentiality this volume presents a variety of original contributions that are firmly empirically grounded based on elicited or corpus data while adopting different theoretical frameworks Thus some chapters rely on large diachronic corpora and provide new qualitative insight on the evolution of TAM systems through quantitative methods while others carry out a collostructional analysis of past tensed verbs using inferential statistics to explore the lexical grammar of verbs A common goal is to uncover semantic regularities and variation in the TAM systems of the languages under study by taking a close look at context Such a fine grained approach contributes to our understanding of the TAM systems from a typological perspective The focus on well known Indo European languages e g French German English Spanish and also on less commonly studied languages e g Hungarian Estonian Avar Andi Tagalog provides a valuable cross linguistic perspective

**Language Variation - European Perspectives IV** Peter Auer, Javier Caro Reina, Göz Kaufmann, 2013-05-28 The eighteen contributions in this volume are based on papers presented at the 6th International Conference on Language Variation in Europe ICLaVE 6 which was held at the University of Freiburg Germany from June 29 to July 1 2011 The volume includes plenaries by Sjef Barbiers Where is syntactic variation and Arnulf Deppermann Stefan Kleiner Deppermann Kleiner and Kn bl Katerbow Moosm ller and Scheutz Sch tzler Schleef West Zeller Ziegler but morphological variation Cornips and Hulk Dal Negro morphosyntactic variation Melissaropoulou Themistocleous Tsiplakou and Tsolakidis and syntactic variation Barbiers H kansson Rothmayr are also represented Additional papers deal with code switching      Corpus Methodologies Explained Meng Ji, Michael Oakes, Li

Defeng, Lidun Hareide, 2016-08-25 This book introduces the latest advances in Corpus Based Translation Studies CBTS a thriving subfield of Translation Studies which forms an important part of both translator training and empirical translation research Largely empirical and exploratory a distinctive feature of CBTS is the development and exploration of quantitative linguistic data in search of useful patterns of variation and change in translation With the introduction of textual statistics to Translation Studies CBTS has geared towards a new research direction that is more systematic in the identification of translation patterns and more explanatory of any linguistic variations identified in translations The book traces the advances from the advent of language corpora in translation studies to the new textual dimensions and shift towards a probability variation model Such advances made in CBTS have enabled in depth analyses of translation by establishing useful links between a translation and the social and cultural context in which the translation is produced circulated and consumed

The Handbook of Language Contact Raymond Hickey, 2013-04-24 The Handbook of Language Contact offers systematic coverage of the major issues in this field ranging from the value of contact explanations in linguistics to the impact of immigration to dialectology combining new research from a team of globally renowned scholars with case studies of numerous languages An authoritative reference work exploring the major issues in the field of language contact the study of how language changes when speakers of distinct speech varieties interact Brings together 40 specially commissioned essays by an international team of scholars Examines language contact in societies which have significant immigration populations and includes a fascinating cross section of case studies drawing on languages across the world Accessibly structured into sections exploring the place of contact studies within linguistics as a whole the value of contact studies for research into language change and language contact in the context of work on language and society Explores a broad range of topics making it an excellent resource for both faculty and students across a variety of fields within linguistics

**Modes of Modality** Elisabeth Leiss, Werner Abraham, 2014-01-15 The volume aims at a universal definition of modality or illocutionary speaker's perspective force that is strong enough to capture the entire range of different subtypes and varieties of modalities in different languages The central idea is that modality is all pervasive in language This perspective on modality allows for the integration of covert modality as well as peripheral instances of modality in neglected domains such as the modality of insufficiency of attitudinality or neglected domains such as modality and illocutionary force in finite vs nonfinite and factive vs non factive subordinated clauses In most languages modality encompasses modal verbs both in their root and epistemic meanings at least where these languages have the principled distribution between root and epistemic modality in the first place which is one fundamentally restricted in its strict qualitative and quantitative sense to the Germanic languages In addition this volume discusses one other intricate and partially highly mysterious class of modality triggers modal particles as they are sported in the Germanic languages except for English It is argued in the contributions and the languages discussed in this volume how modal verbs and adverbials next to modal particles are expressed how they are interlinked with contextual factors such as aspect definiteness person verbal factivity and assertivity as opposed to other attitudinal types An essential concept used and argued for is perspectivization a sub concept of possible world semantics Language groups covered in detail and compared are Slavic Germanic and South East Asian The volume will interest researchers in theoretical and applied linguistics typology the semantics pragmatics interface and language philosophy as it is part of a larger project developing an alternative approach to Universal Grammar that is compatible with functionalist approaches

*Perfects in Indo-European Languages and Beyond* Robert Crellin, Thomas Jügel, 2020-09-15 This volume provides a detailed investigation of perfects from all the branches of the Indo European language family in some cases representing the first ever comprehensive description Thorough philological examinations result in empirically well founded analyses illustrated with over 940 examples The unique temporal depth and diatopic breadth of attested Indo European languages permits the

investigation of both TAME Tense Aspect Mood Evidentiality systems over time and recurring cycles of change as well as synchronic patterns of areal distribution and contact phenomena These possibilities are fully exploited in the volume Furthermore the cross linguistic perspective adopted by many authors as well as the inclusion of contributions which go beyond the boundaries of the Indo European family per se facilitates typological comparison As such the volume is intended to serve as a springboard for future research both into the semantics of the perfect in Indo European itself and verb systems across the world s languages

*Tajik Linguistics* Shinji Ido,Behrooz Mahmoodi-Bakhtiari,2023-01-30 It is hardly an overstatement to say that Soviet linguists had a monopoly over Tajik linguistics before the dissolution of the Soviet Union when most studies on the language were accessible exclusively through Russian and Tajik Today however linguists dealing with Tajik are diverse not only in terms of their location but also in terms of their disciplinary orientation within linguistics making it difficult for the general linguist to work out the state of the art of the linguistic study of Tajik This volume aims to address this difficulty by collecting in a handbook format recent post Soviet developments in the study of Tajik that now lie scattered in different subdisciplines of linguistics The volume thus showcases the state of the art of post Soviet Tajik linguistics and can be used as a guide for linguists interested in the language

Language Contact in Europe Bridget Drinka,2017-02-16 This comprehensive new work provides extensive evidence for the essential role of language contact as a primary trigger for change Unique in breadth it traces the spread of the periphrastic perfect across Europe over the last 2 500 years illustrating at each stage the micro responses of speakers and communities to macro historical pressures Among the key forces claimed to be responsible for normative innovations in both eastern and western Europe is roofing the superstratal influence of Greek and Latin on languages under the influence of Greek Orthodoxy and Roman Catholicism respectively The author provides a new interpretation of the notion of sprachbund presenting the model of a three dimensional stratified convergence zone and applies this model to her analysis of the have and be perfects within the Charlemagne sprachbund The book also tackles broader theoretical issues for example demonstrating that the perfect tense should not be viewed as a universal category

The Perfect Volume Kristin Melum Eide,Marc Fryd,2021-07-15 Drawing on the data and history from a wide range of languages from Atayal to Zapotec this volume brings together leading scholars in the field of tense and aspect research resulting in 18 contributions on the perfect and some of its close relatives e g iamitives Different approaches complement each other to shed light on the source emergence grammaticalization and the typological extension of perfect constructions cross linguistically One focal point is the so called aoristic drift where the perfect comes to resemble the simple past or aorist often via the hodiernal today reading The semantics and pragmatics of perfects are also investigated through their interaction with other categories e g negation mood Over time some perfects undergo auxiliary doubling or omission or the auxiliary becomes subject to selection These facts also receive special attention in this book presenting new insights on perfects in both well studied as well as very understudied languages

**Evidential Marking in**

**European Languages** Björn Wiemer, Juana I. Marin-Arrese, 2022-03-07 How are evidential functions distinguished by means other than grammatical paradigms i.e. by function words and other lexical units And how inventories of such means can be compared across languages against an account also of grammatical means used to mark information source This book presents an attempt at supplying a comparative survey of such inventories by giving detailed evidential profiles for a large part of European languages Continental Germanic English French Basque Russian Polish Lithuanian Modern Greek and Ibero Romance languages such as Catalan Galician Portuguese and Spanish Each language is treated in a separate chapter and their profiles are based on a largely unified set of concepts based on function and/or etymological provenance The profiles are preceded by a chapter which clarifies the theoretical premises and methodological background for the format followed in the profiles The concluding chapter presents a synthesis of findings from these profiles including areal biases and the formulation of methodological problems that call for further research

*Grammaticalization Scenarios from Europe and Asia* Walter Bisang, Andrej Malchukov, 2020-09-21 This volume intends to fill the gap in the grammaticalization studies setting as its goal the systematic description of grammaticalization processes in genealogically and structurally diverse languages To address the problem of the limitations of the secondary sources for grammaticalization studies the editors rely on sketches of grammaticalization phenomena from experts in individual languages guided by a typological questionnaire

Grammatical Replication and Borrowability in Language Contact Björn Wiemer, Bernhard Wälchli, Björn Hansen, 2012-07-04 The volume presents new insights into two basic theoretical issues hotly debated in recent work on grammaticalization and language contact grammatical replication and grammatical borrowability The key issues are How can grammatical replication be distinguished from other superficially similar processes of contact induced linguistic change and under what conditions does it take place Are there grammatical morphemes or constructions that are more easily borrowed than others and how can language contact account for areal biases in the borrowing vs calquing of grammatical formatives The book is a major contribution to the ongoing theoretical discussion concerning the relationship between grammaticalization and language contact on a broad empirical basis

**The Changing Languages of Europe** Bernd Heine, Tania Kuteva, 2006 Professor Heine and Professor Kuteva look for the causes of linguistic change in cultural and economic exchanges across national and regional boundaries and in the processes that occur when speakers learn or are in close contact with another language Testing their data and conclusions against findings from elsewhere in the world the authors reconstruct and reveal when how and why common grammatical structures have evolved and continue to evolve in processes of change that will they argue transform the linguistic landscape of Europe The book is written in clear non technical language It will appeal to scholars and students of language change and variation in Europe and elsewhere It will also interest everyone concerned to understand the nature of language and language change

BOOK JACKET

**Interdependence of Diachronic and Synchronic Analyses** Folke Josephson, Ingmar Söhrman, 2008 The focus of this volume is the interdependence of diachrony

and synchrony in the investigation of syntactic structure A diverse set of modern and ancient languages is investigated from this perspective including Hittite the Classical languages Old Norse Coptic Bantu languages Australian languages and Creoles A variety of topics are covered including TAM diathesis valency case marking cliticization and grammaticalization This volume should be of interest to syntacticians typologists and historical linguists with an interest in syntax and morphology
