developed manuscript culture There has as yet been no comprehensive study of poetic responses to this scriptural heritage which include episodes in such canonical texts as Beowulf the Old English riddles and the poems of the Poetic Edda By analysing the inflection of the script through shared literary traditions this study enhances our understanding of the burgeoning of literary self awareness in early medieval vernacular poetry and the construction of cultural memory and furthers our understanding of the relationship between Anglo Saxon and Norse textual cultures The introduction sets out in detail the rationale for examining runes in poetry as a literary motif and surveys the relevant critical debates The body of the volume is comprised of five linked case studies of runes in poetry viewing these representations through the paradigm of scriptural reconstruction and the validation of contemporary literary historical and religious sensibilities
