persist in their efforts to develop nuclear weapons and to deploy a credible nuclear force as the age of the manned bomber gave way to the ballistic missile. Particular attention is given to controversies over the portion of the defence budget devoted to the deterrent programme, the effects of the restoration of Anglo-American nuclear collaboration after 1958, increasing reliance on the United States for nuclear delivery systems, the negotiations that led to the Nassau Agreement of 1962 and the supply of Polaris, and discussions within the Western Alliance over the control of nuclear forces. By the time of the October 1964 election, when this volume concludes, previous dismissal of the prospects for successful ballistic missile defence were giving way to growing doubts over the long-term effectiveness of the Polaris system in its role as an independent deterrent, several years before it was due to enter service with the Royal Navy. This book will be of much interest to students of British politics, Cold War history, nuclear proliferation and international relations.
