"[This little azure-coloured book] is the true Apocalypse, this where the 'Open Secret' becomes revealed to a man. I rejoice much in the glad serenity of soul with which you look out on this wondrous Dwelling-place of yours and mine,—with an ear for the Ewigen Melodien which pipe in the winds round us and utter themselves forth in all sights and sounds and things."

## **The Hermetic Of Nature An American Revolution In Consciousness:**

**The Hermetic Book of Nature** Arthur Versluis, Ralph Waldo Emerson, 1997      **The Esoteric Origins of the American Renaissance** Arthur Versluis, 2001 Here Arthur Versluis breaks new ground showing that many writers of the American Renaissance drew extensively on and were inspired by Western esoteric currents Thus he demonstrates that Alcott and Emerson were indebted to Hermeticism Christian theosophy and Neoplatonism Fuller to alchemy and Rosicrucianism Hawthorne to alchemy and Melville to Gnosticism In addition to offering a detailed analysis of the esoteric elements in the writings of figures from the American Renaissance Versluis presents an overview of esotericism in Europe and its offshoots in colonial America This innovative work will interest students and scholars of religion literature American studies and esotericism Jacket      **Wisdom's Children** Arthur Versluis, 1999-09-30 The first book in English to provide an in depth introduction to the Christian theosophic tradition that began with Jacob Boehme *Wisdom's Children* brings us into a startling new world of experiential spirituality that is in fact the Christian equivalent of Sufism and Kabbalism With biographic introductions to major theosophers and detailed discussions of theosophic authors such as John Pordage Jane Lead Dionysius Freher and Johann Gichtel as well as a survey of their major theosophic cosmological and metaphysical teachings this book is an indispensable guide to the hidden history of Protestantism and its ramifications today With chapters discussing theosophy in relation to Gnosticism magic astrology alchemy and other Western esoteric traditions *Wisdom's Children* is situated solidly in its historical context using primary works from the tradition itself The book also provides unexpected insights into how this modern gnostic tradition speaks to us today and suggests how this tradition could spark a new Renaissance to link spirituality the arts and the sciences in a new and encompassing vision      *Transfiguring America* Jeffrey Steele, 2001 *Transfiguring America* is the product of more than ten years of research and numerous published articles on Margaret Fuller arguably America's first feminist theorist and one of the most important woman writers in the nineteenth century Focusing on Fuller's development of a powerful language that paired cultural critique with mythmaking Steele shows why her writing had such a vital impact on the woman's rights movement and modern conceptions of gender This groundbreaking study pays special attention to the ways in which Fuller's feminist consciousness and social theory emerged out of her mourning for herself and others her dialogue with Emersonian Transcendentalism and her eclectic reading in occult and mythical sources *Transfiguring America* is the first book to provide detailed analyses of all of Fuller's major texts including her mystical Dial essays correspondence with Emerson *Summer on the Lakes* 1844 poetry *Woman in the Nineteenth Century* and *New York Tribune* essays written both in New York and Europe Starting from her own profound sense of loss as a marginalized woman Fuller eventually recognized the ways in which the foundational myths of American society buttressed by conservative religious ideologies replicated dysfunctional images of manhood and womanhood With *Woman in the Nineteenth Century* after exploring the roots of oppression in her essays and poetry Fuller advanced the cause

of woman s rights by conceptualizing a more fluid and equitable model of gender founded upon the mythical reconfiguration of human potential But as her horizons expanded Fuller demanded not only political equality for women but also emotional intellectual and spiritual freedom for all victims of social oppression By the end of her career Steele shows Fuller had blended personal experience and cultural critique into the imaginative reconstruction of American society Beginning with a fervent belief in personal reform she ended her career with the apocalyptic conviction that the dominant myths both of selfhood and national identity must be transfigured Out of the ashes of personal turmoil and political revolution she looked for the phoenix of a revitalized society founded upon the ideal of political justice

### **The History of Metaphors of Nature**

Stephen A. Norwick,2006 This book shows how modern European Languages have a large number of metaphors which represent the whole of nature Metaphors used in natural science and literature such as Mother Nature have a powerful influence on the framing of scientific hypothesis making and these words have guided the history of natural science for several millennia while also influencing North American nature writing

### **The Art and Science of Heroism and Heroic Leadership**

Scott T. Allison,James K. Beggan,Olivia Efthimiou,2019-06-21 Heroism is a rich elusive phenomenon Any adequate understanding of heroic behavior requires a new type of scholarly imagination one that taps into human artistic sensibilities as much as it does the rigors of scientific inquiry In an important sense we invoke a meta version of the call to heroic imagination by Franco Blau and Zimbardo 2011 who describe such imagination as a mind set and a collection of attitudes p 13 that can steer everyday people toward heroic achievement This eBook also merges our understanding of heroism with heroic leadership demonstrating that heroic leadership applies the principles of heroism in moving groups toward noble collective goals This eBook represents an effort by a distinguished group of authors to unleash their own creative mindsets attitudes and imaginations in their scholarship on heroism and heroic leadership

**The United States and Latin America** Fredrick B. Pike, 2010-07-05 The lazy greaser asleep under a sombrero and the avaricious gringo with money stuffed pockets are only two of the negative stereotypes that North Americans and Latin Americans have cherished during several centuries of mutual misunderstanding This unique study probes the origins of these stereotypes and myths and explores how they have shaped North American impressions of Latin America from the time of the Pilgrims up to the end of the twentieth century Fredrick Pike s central thesis is that North Americans have identified themselves with civilization in all its manifestations while viewing Latin Americans as hopelessly trapped in primitivism the victims of nature rather than its masters He shows how this civilization nature duality arose from the first European settlers perception that nature and everything identified with it including American Indians African slaves all women and all children was something to be conquered and dominated This myth eventually came to color the North American establishment view of both immigrants to the United States and all our neighbors to the south

**Authors of the Impossible** Jeffrey J. Kripal, 2024-05-31 Outstanding and almost certainly controversial Kripal has promise to revitalize and extend the reach of religious studies Choice Most scholars dismiss research into the paranormal as pseudoscience a frivolous pursuit for the paranoid or gullible Even historians of religion whose work naturally attends to events beyond the realm of empirical science have shown scant interest in the subject But the history of psychical phenomena Jeffrey J Kripal contends is an untapped source of insight into the sacred and by tracing that history through the last two centuries of Western thought we can see its potential centrality to the critical study of religion Kripal grounds his study in the work of four major figures in the history of paranormal research psychical researcher Frederic Myers writer and humorist Charles Fort astronomer computer scientist and ufologist Jacques Vallee and philosopher and sociologist Bertrand M heust Through incisive analyses of these thinkers Kripal ushers the reader into a beguiling world somewhere between fact fiction and fraud The cultural history of telepathy teleportation and UFOs a ghostly love story the occult dimensions of science fiction cold war psychic espionage galactic colonialism and the intimate relationship between consciousness and culture all come together in Authors of the Impossible a dazzling and profound look at how the paranormal bridges the sacred and the scientific An excellent book engaging witty and thoughtful Christopher Partridge Lancaster University Kripal demands nothing short of a paradigm shift in order to make sense of the odd the anomalous and the inexplicable Catherine L Albanese University of California Santa Barbara Quietly earth shattering Victoria Nelson author

of The Secret Life of Puppets      Subject Guide to Books in Print ,1993      **Handbook of Behaviorism** William O'Donohue,Richard Kitchener,1998-10-21 Handbook of Behaviorism provides a comprehensive single source that summarizes what behaviorism is how the various flavors of behaviorism have differed between major theorists both in psychology and philosophy and what aspects of those theories have been borne out in research findings and continue to be of use in understanding human behavior      Educational Psychology Barry J. Zimmerman,Dale H. Schunk,2014-08-13 Educational Psychology A Century of Contributions the first comprehensive book length treatment of this topic looks at the historic contributions of 16 leading psychologists as well as others who influenced the field of educational psychology from its philosophical moorings in the late 19th century to its current scientific status at the dawn of the 21st It presents information regarding these individuals ideas and scientific discoveries along with a sense of the historical context in which they lived The book is divided into three sections that correspond to three eras in the history of the discipline the founding period 1880s to 1920 the rise to prominence period 1920 to1960 and the modern period 1960 to the present Each section begins with an overview chapter describing the period in terms of key social political and historical events affecting educational theory research and practice In addition the overview chapters discuss major theoretical methodological and instructional contributions of the period and how they changed the course of educational psychology The biographical chapters describe the scholar s major contribution in terms of theory research and practice and his or her legacy and impact These descriptions portray these individuals as real human beings responding to historical events and social influences of their time in personal and collective ways that changed the nature and direction of the field Educational Psychology A Century of Contributions is a cohesive collection appropriate for graduate and advanced undergraduate students in educational psychology      **Art and Revolution in Latin America, 1910-1990** David Craven,2006-01-01 In this uniquely wide ranging book David Craven investigates the extraordinary impact of three Latin American revolutions on the visual arts and on cultural policy The three great upheavals in Mexico 1910 40 in Cuba 1959 89 and in Nicaragua 1979 90 were defining moments in twentieth century life in the Americas Craven discusses the structural logic of each movement s artistic project by whom how and for whom artworks were produced and assesses their legacies In each case he demonstrates how the consequences of the revolution reverberated in the arts and cultures far beyond national borders The book not only examines specific artworks originating from each revolution s attempt to deal with the challenge of socializing the arts but also the engagement of the working classes in Mexico Cuba and Nicaragua with a tradition of the fine arts made newly accessible through social transformation Craven considers how each revolution dealt with the pressing problem of creating a dialogical art one that reconfigures the existing artistic resource rather than one that just reproduces a populist art to keep things as they were In addition the author charts the impact on the revolutionary processes of theories of art and education articulated by such thinkers as John Dewey and Paulo Freire The book provides a fascinating new view of the Latin American revolutionaries from artists to

political leaders who defined art as a fundamental force for the transformation of society and who bequeathed new ways of thinking about the relations among art ideology and class within a revolutionary process
