The Hidden Dimension Edward T. Hall, 1969 **The Hidden Dimension** Edward Twitchell Hall, 1969 An examination of various cultural concepts of space and how differences among them affect modern society Introducing the science of proxemics Hall demonstrates how man s use of space can affect personal business relations cross cultural exchanges architecture city planning and urban renewal *The Routledge Companion to the Sound of Space* Emma-Kate Matthews, Jane Burry, Mark Burry, 2024-11-11 This companion explores a range of conceptual and practical relationships between sound and space across various disciplines providing insights from technical creative cultural political philosophical psychological and physiological perspectives The content spans a wide range of spatial typologies from large reverberant buildings to modest and intimate ones from external public squares to domestic interiors and from naturally formed environments to highly engineered spaces These compiled insights and observations explore the vast diversity of ways in which sonic and spatial realms interact This publication therefore forms important bridges between the intricate and diverse topics of technology philosophy composition performance and spatial design to contemplate the potential of sound and space as tools for creative expression and communication as well as for technical innovation It is hoped that by sharing these insights this book will inspire practitioners scholars and enthusiasts to incorporate new perspectives and methodologies into their own work Through a rich blend of theory practice and critical reflection this volume serves as a valuable resource for anyone interested in exploring the intricacy of relationships between space and sound whether they are students professionals or simply curious Our companion provides a cross section through shared territories between sonic and spatial disciplines from architecture engineering sound design music composition and performance urban design product design and much more **Dr. Calhoun's Mousery** Lee Alan Dugatkin, 2024-10-03 A bizarre and compelling biography of a scientist and his work using rodent cities to question the potential catastrophes of human overpopulation It was the strangest of experiments What began as a utopian environment where mice had sumptuous accommodations had all the food and water they could want and were free from disease and predators turned into a mouse hell Science writer and animal behaviorist Lee Alan Dugatkin introduces readers to the peculiar work of rodent researcher John Bumpass Calhoun In this enthralling tale Dugatkin shows how an ecologist turned psychologist turned futurist became a science rock star embedded in the culture of the 1960s and 1970s As interest grew in his rodent cities Calhoun was courted by city planners and his work was reflected in everything from Tom Wolfe s hard hitting writing to the children s book Mrs Frisby and the Rats of NIMH He was invited to meetings with the Royal Society and the pope and taken seriously when he proposed a worldwide cybernetic brain a decade before others made the internet a reality Readers see how Calhoun s experiments rodent apartment complexes like Mouse Universe 25 led to his concept of behavioral sinks with real effects on public policy discussions Overpopulation in Calhoun s mouse and rat complexes led to the loss of sex drive the absence of maternal care and a class of automatons that

included the beautiful ones who spent their time grooming themselves while shunning socialization Calhoun and those who followed his work saw the collapse of this mouse population as a harbinger of the ill effects of an overpopulated human world Drawing on previously unpublished archival research and interviews with Calhoun's family and former colleagues Dugatkin offers a riveting account of an intriguing scientific figure Considering Dr Calhoun's experiments he explores the changing nature of scientific research and delves into what the study of animal behavior can teach us about ourselves **The**

Sociology of Space Martina Löw, 2016-09-09 In this book the author develops a relational concept of space that encompasses social structure the material world of objects and bodies and the symbolic dimension of the social world Löw's guiding principle is the assumption that space emerges in the interplay between objects structures and actions Based on a critical discussion of classic theories of space Löw develops a new dynamic theory of space that accounts for the relational context in which space is constituted This innovative view on the interdependency of material social and symbolic dimensions of space also permits a new perspective on architecture and urban development *People-Centered Architecture* Milton Shinberg, 2025-05-08 Shinberg has done something truly impressive He has created a practical framework for architectural thinking and design grounded in the latest research on human perception and cognition His ideas and insights offer a fresh perspective that have helped me clarify many aspects of my own approach to design Stefan Behling Architect Senior Executive Partner Head of Studio Foster Partners London This book is a must read for architects and designers at any stage of their career His inspiring and practical narrative makes even the most complex concepts accessible Along the way he offers aspiring and experienced professionals a fresh perspective to reignite their passion for architecture Andrea de Paiva Architect Urban Planner and Author Director of NeuroAU at the University of Brasilia Milton Shinberg is at the vanguard of architects convinced that the design of buildings for people to flourish should incorporate a deep understanding of human psychology and neuroscience A very clearly written book rich with reflections from the science of human emotions embodiment and aesthetics *People Centered Architecture* will greatly enhance architectural thinking education and practice Anjan Chatterjee MD FAAN Professor of Neurology Psychology and Architecture University of Pennsylvania A veteran architect's pragmatic guide to re-energizing design thinking architectural practice and architectural education with pivotal insights from the human sciences and wisdom harvested from non architects *People Centered Architecture Design Practice Education* is a unique and probing exploration designed to help architects better serve everyone who uses what architects design In this one of a kind book architect and educator Milton Shinberg presents game changing approaches to enhance reorient and re-energize design thinking Shinberg draws from decades of dialogue with architects designers clients artists scientists teachers and his own students His prompts and provocations written in a clear and accessible narrative style are organized to help architects who are humanists come to know much more about humans Wise design becomes easier In one concise volume *People Centered Architecture Design Practice Education* delivers a vibrant framework for architectural

practice for students and teachers of architecture and for clients and stakeholders Through this book each will see their project partners more clearly more empathetically and in ways that foster richer better brainstorming and more productive collaboration The coalition of the curious people intrigued by architecture and architects will get a peak behind the curtain

The Impacts of Green Space on Student Experience at an Urban Community College Vanita Naidoo, 2022-07-19 This book presents a rich case study examining physical and spatial factors of urban campus design that influence student experience and wellbeing The text details important historical context illustrating the foundational concepts and purpose of college sites in the United States and maps economic reforms and policies which have driven the development of today's inner city campuses Focusing on Bronx Community College New York and looking specifically at how the presence or absence of green space impacts students the text then draws on diverse student voices to examine how students use open spaces and how this influences their sense of belonging stress reduction and scholarly identities The author's historical and qualitative research presents original insights and relies on a rich body of textual and on site investigation This book will be a valuable resource for researchers and academics with an interest in urban education and higher education It will be of particular interest to those with a focus on multicultural education and education policy

Transforming Public Space through Play Gregor Mews, 2022-04-21 This book provides an empirical analysis of the concept of play as a form of spatial practice in urban public spaces The introduced City Play Framework CPF is a practical urban analysis tool that allows urban designers landscape architects and researchers to develop a shared awareness when opening up this window of possibility for adventure Two case studies substantiate and illustrate the development process and testing of the framework in Canberra Australia and Potsdam Germany The appropriation of public spaces that transcend boundaries can facilitate an intrinsic connection between people and their immediate environment towards a more joyful ontological state of human existence in which imagination co creation and a sense of agency are key elements of the design approach The framework presents an alternative understanding of public spaces and public life reflecting on theory and its implications for practice in a post pandemic world in dense urban centres A bridge between theory and practice this book explores possibilities on what future design ought to be when openness and ambiguity are consciously integrated parts of practice and process The book presents a valuable discussion on public space and play for academic audiences across a wide range of disciplines such as landscape architecture urban design planning architecture and urban sociology which is informative for future practice

The A.S.M.R. Asheru Romancha, 2024-02-12 This book shows the automatic spontaneous intelligent design from a feedback loop between the right hemisphere matching by form and the resulting sacred fractal geometry of self similar sexual mimicry in the four dimensional human body He shows how this is done through the ASMR and thrill intelligence The missing link is no longer missing His book is a magnum opus on the alchemy of this subject

Ethics in Design and Communication Laura Scherling, Andrew DeRosa, 2020-02-20 This timely collection brings together critical analytic historical and practical studies to address what

ethics means in the practice of design Designers face the same challenges as everyone else in the complex conditions of contemporary cultural life choices about consumption waste exploitation ecological damage and political problems built into the supply chains on which the global systems of inequity currently balance precariously But designers face the additional dilemma that their paid work is often entangled with promoting the same systems such critical approaches seek to redress how to reconcile this contradiction among others in seeking to chart an ethical course of action while still functioning effectively in the world Ethics in Design and Communication acknowledges the complexity of this subject matter while also demonstrating that in the ongoing struggle towards an equitable and sustainable world the talents of design and critical thought are essential Featured case studies include graphic design internships today the dark web and media coverage of the 2016 US presidential election The fact that within this book such a wide array of practitioners scholars critics and professionals commit to addressing current injustices is already a positive sign Nonetheless it is essential that we guard against confusing the coercive force of moral imperatives with ethical deliberation when conceiving a foundation for action

Human Scale Revisited Kirkpatrick Sale, 2017-04-15 Big government big business big everything Kirkpatrick Sale took giantism to task in his 1980 classic Human Scale and today takes a new look at how the crises that imperil modern America are the inevitable result of bigness grown out of control and what can be done about it The result is a keenly updated carefully argued case for bringing human endeavors back to scales we can comprehend and manage whether in our built environments our politics our business endeavors our energy plans or our mobility Sale walks readers back through history to a time when buildings were scaled to the human figure as was the Parthenon democracies were scaled to the societies they served and enterprise was scaled to communities Against that backdrop he dissects the bigger is better paradigm that has defined modern times and brought civilization to a crisis point Says Sale retreating from our calamity will take rebalancing our relationship to the environment adopting more human scale technologies right sizing our buildings communities and cities and bringing our critical services from energy food and garbage collection to transportation health and education back to human scale as well Like Small is Beautiful by E F Schumacher Human Scale has long been a classic of modern decentralist thought and communitarian values a key tool in the kit of those trying to localize create meaningful governance in bioregions or rethink our reverence of and dependence on growth financially and otherwise Rewritten to interpret the past few decades Human Scale offers compelling new insights on how to turn away from the giantism that has caused escalating ecological distress and inequality dysfunctional governments and unending warfare and shines a light on many possible pathways that could allow us to scale down survive and thrive Louis I. Kahn Per Olaf Fjeld, Emily Randall Fjeld, 2019-10-04 Louis I Kahn The Nordic Latitudes is a new and personal reading of the architecture teachings and legacy of Louis I Kahn from Per Olaf Fjeld's perspective as a former student The book explores Kahn's life and work offering a unique take on one of the twentieth century's most important architects Kahn's Nordic and European ties are emphasized in

this study that also covers his early childhood in Estonia his travels and his relationships with other architects including the Norwegian architect Arne Korsmo The authors have gathered personal reflections archival material and other student work to offer insight into the wisdom that Kahn imparted to his students in his famous masterclass Louis I Kahn The Nordic Latitudes addresses Kahn s legacy both personally and in terms of the profession documents a research trip the University of Pennsylvania s Louis I Kahn Collection and confronts the affiliation of Kahn s work with postmodernism Building Cities to LAST Jassen Callender,2021-12-30 Building Cities to LAST presents the myriad issues of sustainable urbanism in a clear and concise system and supports holistic thinking about sustainable development in urban environments by providing four broad measures of urban sustainability that differ radically from other less long lived patterns these are Lifecycle Aesthetics Scale and Technology LAST This framework for understanding the relationship between these four measures and the essential types of infrastructure grouped according to the basic human needs of Food Shelter Mobility and Water is laid out in a simple and easy to understand format These broad measures and infrastructures address the city as a whole and as a recognizable pattern of human activity and in turn increase the ability of cities and the human race to LAST This book will find wide readership particularly among students and young practitioners in architecture urban planning and landscape architecture

Musical Intimacy Zack Stiegler,Todd Campbell,2023-08-10 Discourse on popular music frequently describes artists recordings and performances as intimate Yet that discourse often stops short of elucidating how a mass produced commodity such as popular music is able to elicit feelings of intimacy with and among its audience Through detailed analysis of popular music s composition performance production and promotion Musical Intimacy examines how intimacy is constructed and perceived in popular music via its affective and technological affordances From the recording studio to the concert stage from collective experience to individual listening and perception this book presents a working understanding of musical intimacy

Interaction Constantine Stephanidis,Gavriel Salvendy,2024-09-28 The pervasive influence of technology continuously shapes our daily lives From smartphones to smart homes technology is revolutionizing the way we live work and interact with

each other Human computer interaction HCI is a multidisciplinary research field focusing on the study of people interacting with information technology and plays a critical role in the development of computing systems that work well for the people using them ensuring the seamless integration of interactive systems into our technologically driven lifestyles The book series contains six volumes providing extensive coverage of the field wherein each one addresses different theoretical and practical aspects of the HCI discipline Readers will discover a wealth of information encompassing the foundational elements state of the art review in established and emerging domains analysis of contemporary advancements brought about by the evolution of interactive technologies and artificial intelligence as well as the emergence of diverse societal needs and application domains These books Showcase the pivotal role of HCI in designing interactive applications across a diverse array of domains Explore the dynamic relationship between humans and intelligent environments with a specific emphasis on the role of Artificial Intelligence AI and the Internet of Things IoT Provide an extensive exploration of interaction design by examining a wide range of technologies interaction techniques styles and devices Discuss user experience methods and tools for the design of user friendly products and services Bridge the gap between software engineering and human computer interaction practices for usability inclusion and sustainability These volumes are an essential read for individuals interested in human computer interaction research and applications

Playing with Mental Models Henri de Jongste, 2020-06-03 In this book the author uses a mental model theory of communication to investigate the acclaimed British situation comedy *The Office* The approach taken is multi disciplinary and focuses on questions as What are mental models and what role do they play in communication in general and in creating and watching *The Office* in particular Whose mental models are involved in creating and watching *The Office* How do these mental models relate to each other How exactly do the creators of *The Office* and their audience engage in constructing exchanging and coordinating mental models How do mental models and their comic use relate to humour and humour theories and what is the nature of play in the deployment of mental models in comedy The book is aimed at humour scholars from various backgrounds and at people interested in communication in general

[Interaction Techniques and Technologies in Human-Computer Interaction](#) Constantine Stephanidis, Gavriel Salvendy, 2024-08-30 This book offers a thorough exploration of interaction design by examining various technologies interaction techniques styles and devices This book Assists readers in acquiring a deep understanding of diverse ways humans interact with computer technologies and in selecting the most suitable approach for various interactive scenarios Introduces cutting edge interaction techniques including multimodal and gesture based interaction wearables haptic speech and sound based interaction embodied interaction and more Advances beyond traditional interfaces to large and multiscreen interactions proxemics brain computer interfaces affective computing and Extended Reality This book will appeal to individuals interested in Human Computer Interaction research and applications

Understanding Social Signals: How Do We Recognize the Intentions of Others? Sebastian Loth, Jan P. De Ruiter, 2016-05-30 Powerful and economic sensors

such as high definition cameras and corresponding recognition software have become readily available e.g. for face and motion recognition. However, designing user interfaces for robots, phones and computers that facilitate a seamless, intuitive and apparently effortless communication as between humans is still highly challenging. This has shifted the focus from developing ever faster and higher resolution sensors to interpreting available sensor data for understanding social signals and recognising users' intentions. Psychologists, Ethnologists, Linguists and Sociologists have investigated social behaviour in human-human interaction. But their findings are rarely applied in the human-robot interaction domain. Instead, robot designers tend to rely on either proof of concept or machine learning based methods. In proving the concept, developers effectively demonstrate that users are able to adapt to robots deployed in the public space. Typically, an initial period of collecting human-robot interaction data is used for identifying frequently occurring problems. These are then addressed by adjusting the interaction policies on the basis of the collected data. However, the updated policies are strongly biased by the initial design of the robot and might not reflect natural, spontaneous user behaviour. In the machine learning approach, learning algorithms are used for finding a mapping between the sensor data space and a hypothesised or estimated set of intentions. However, this brute force approach ignores the possibility that some signals or modalities are superfluous or even disruptive in intention recognition. Furthermore, this method is very sensitive to peculiarities of the training data. In sum, both methods cannot reliably support natural interaction as they crucially depend on an accurate model of human intention recognition. Therefore, approaches to social robotics from engineers and computer scientists urgently have to be informed by studies of intention recognition in natural human-human communication. Combining the investigation of natural human behaviour and the design of computer and robot interfaces can significantly improve the usability of modern technology. For example, robots will be easier to use by a broad public if they can interpret the social signals that users spontaneously produce for conveying their intentions anyway. By correctly identifying and even anticipating the user's intention, the user will perceive that the system truly understands her/his needs. Vice versa, if a robot produces socially appropriate signals, it will be easier for its users to understand the robot's intentions. Furthermore, studying natural behaviour as a basis for controlling robots and other devices results in greater robustness, responsiveness and approachability. Thus, we welcome submissions that:

- investigate how relevant social signals can be identified in human behaviour
- investigate the meaning of social signals in a specific context or task
- identify the minimal set of intentions for describing a context or task
- demonstrate how insights from the analysis of social behaviour can improve a robot's capabilities
- demonstrate how a robot can make itself more understandable to the user by producing more human-like social signals

Landscape Architecture as Storytelling

Bob Scarfo, 2022-11-30. This book introduces students, practitioners and laypeople to a comfortable approach to learning landscape architectural design, free of design jargon and derived from their existing knowledge. A step-by-step process has readers consider their knowledge of language as metaphorically related to basic design and landscape design. Through

information delivery and questioning processes readers build on what they already know their tacit understanding of language as applied to problem solving and storytelling Everyone is a storyteller Taken one step at a time through a three tiered analogy of language basic design and landscape design readers learn the makeup and role of such design features as points lines planes volumes and sequential volumetric spaces that make up their worlds With that in a sense new world view and numerous questions and examples readers begin to see that they in fact daily read the environments in which they live work play raise families and grow old Once they realize how they read their surroundings they are helped to recognize that they can build narratives into their surroundings At that point the existence of authored landscape narratives finds readers understanding a design process that relies on the designer as author landscape as text and participant user as reader That process has the reader write a first or second person narrative visually interpret the written narrative into a storyboard and turn the storyboard into a final design the physical makeup of which is read by those who participate in it
