The Known And Unknown:

Annual Report of the Board of Regents of the Smithsonian Institution Smithsonian Institution. Board of Regents, 1901 Reports for 1884 1886 87 issued in 2 pts pt 2 being the Report of the National Museum Lean Architecture James O. Coplien, Gertrud Bjørnvig, 2010-07-26 More and more Agile projects are seeking architectural roots as they struggle with complexity and scale and they're seeking lightweight ways to do it Still seeking In this book the authors help you to find your own path Taking cues from Lean development they can help steer your project toward practices with longstanding track records Up front architecture Sure You can deliver an architecture as code that compiles and that concretely guides development without bogging it down in a mass of documents and guesses about the implementation Documentation Even a whiteboard diagram or a CRC card is documentation the goal isn't to avoid documentation but to document just the right things in just the right amount Process This all works within the frameworks of Scrum XP and other Agile approaches

Statutes at Large of the State of New York: Revised statutes New York (State), 1869 The Knowledge Café Benjamin Anyacho, 2021-07-06 Knowledge Caf is a process for sharing information whether face to face or virtual This popular and practical knowledge management tool supports a culture where projects and innovation thrive The Knowledge Caf is a mindset and environment for engaging discussing and exchanging knowledge within a group either face to face or virtually At the caf participants can discuss hard to solve project issues or resolve a family or community crisis This metaphorical town square supports knowledge circulation and rejuvenation and increases its velocity making it a breeding ground for innovation The aha moments at one Knowledge Caf can match the benefits of multiple conferences workshops and training put together When knowledge management KM is part of an organization's culture performance improves collaboration increases and the competitive advantage accelerates No one can force knowledge transfer We must create the right environment where knowledge is freely shared rewarded and fun This book demonstrates why the Knowledge Caf is such an effective KM tool and shows how to design optimal caf experiences and increase learning agility The premium on knowledge and agility has never been greater This book offers a technique for managing knowledge toward the greater good Tips templates practical and relatable experiences case studies and examples of knowledge brokers creators and sharers across cultures are sprinkled throughout the book to show how the caf interfaces with other KM techniques and in different work and project spaces

The Other Side of the Error Term N. Raz, 1998-04-23 It has been said more than once in psychology that one person's effect is another person's error term By minimising and occasionally ignoring individual and group variability cognitive psychology has yielded many fine achievements However when investigators are working with special populations the subjects and the unique nature of the sample come into focus and become the goal in itself For developmental psychologists gerontologists and psychopathologists research progresses with an eye on their target populations of study Yet every good study in any of these domains inevitably has another dimension Whenever a study is

designed to turn a spotlight on a special population the light is also shed on the mainstream from which the target deviates This book examines what we can learn about general and universal phenomena in cognition and its brain substrates from examining the odd the rare the transient the exceptional and the abnormal

Talking Conflict Anna M. Wittmann, 2016-12-05 In today's information era the use of specific words and language can serve as powerful tools that incite violence or sanitize and conceal the ugliness of war This book examines the complex twisted language of conflict Why is the term collateral damage used when military strikes kill civilians What is a catastrophic success What is the difference between a privileged and unprivileged enemy belligerent How does deterrence differ from detente What does hybrid warfare mean and how is it different from asymmetric warfare How is shell shock different from battle fatigue and PTSD These are only a few of the questions that Talking Conflict The Loaded Language of Genocide Political Violence Terrorism and Warfare answers in its exploration of euphemisms warspeak doublespeak and propagandistic terms This handbook of alphabetically listed entries is prefaced by an introductory overview that provides background information about how language is used to obfuscate or minimize descriptions of armed conflict or genocide and presents examples of the major rhetorical devices used in this subject matter The book focuses on the loaded language of

conflict with many of the entries demonstrating the function of given terms as euphemisms propaganda or circumlocutions Each entry is accompanied by a list of cross references and Further Reading suggestions that point readers to pertinent sources for further research This book is ideal for students especially those studying political science international relations and genocide as well as general readers

Big Data for Big Decisions Krishna Pera, 2022-12-30 Building a data driven organization DDO is an enterprise wide initiative that may consume and lock up resources for the long term Understandably any organization considering such an initiative would insist on a roadmap and business case to be prepared and evaluated prior to approval This book presents a step by step methodology in order to create a roadmap and business case and provides a narration of the constraints and experiences of managers who have attempted the setting up of DDOs The emphasis is on the big decisions the key decisions that influence 90% of business outcomes starting from decision first and reengineering the data to the decisions process chain and data governance so as to ensure the right data are available at the right time every time Investing in artificial intelligence and data driven decision making are now being considered a survival necessity for organizations to stay competitive While every enterprise aspires to become 100% data driven and every Chief Information Officer CIO has a budget Gartner estimates over 80% of all analytics projects fail to deliver intended value Most CIOs think a data driven organization is a distant dream especially while they are still struggling to explain the value from analytics They know a few isolated successes or a one time leveraging of big data for decision making does not make an organization data driven As of now there is no precise definition for data driven organization or what qualifies an organization to call itself data driven Given the hype in the market for big data analytics and AI every CIO has a budget for analytics but very little clarity on where to begin or how to choose and prioritize the analytics projects Most end up investing in a visualization platform like Tableau or QlikView which in essence is an improved version of their BI dashboard that the organization had invested into not too long ago The most important stakeholders the decision makers are rarely kept in the loop while choosing analytics projects This book provides a fail safe methodology for assured success in deriving intended value from investments into analytics It is a practitioners handbook for creating a step by step transformational roadmap prioritizing the big data for the big decisions the 10% of decisions that influence 90% of business outcomes and delivering material improvements in the quality of decisions as well as measurable value from analytics investments The acid test for a data driven organization is when all the big decisions especially top level strategic decisions are taken based on data and not on the collective gut feeling of the decision makers in the organization
