Century of Dutch Manuscript Illumination L M J Delaiss takes readers on a detailed journey through the unique

characteristics and historical significance of Dutch illumination during the late Middle Ages Unlike the luxury manuscripts produced for the royal courts of France and the dukes of Burgundy Dutch manuscripts developed their own artistic identity marked by an understated aesthetic and deeply spiritual undertones Delaiss emphasizes that while foreign influences from Cologne and France shaped this artistic tradition Dutch illumination maintained an originality that reflected the cultural and spiritual movements of the region particularly in the fifteenth century Despite not being as lavish as their European counterparts these manuscripts are rich in creativity and spiritual significance offering a distinct contrast to the grander more opulent styles of southern neighbors The book goes beyond a surface level appreciation of Dutch miniatures advocating for a more comprehensive study of these works within the broader context of bookmaking Delaiss argues that a new scholarly approach is needed to explore the interrelations between the format handwriting and decorative elements of these manuscripts which are intricately linked to their illuminations With gratitude to the many collectors institutions and scholars who contributed to this volume Delaiss offers an insightful exploration of Dutch manuscript illumination urging the academic community to recognize and appreciate its quiet but profound contributions to the art of medieval Europe This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1968

Enenkel, Walter Melion, 2020-12-29 This volume examines the image based methods of interpretation that pictorial and literary landscapists employed between 1500 and 1700 The seventeen essays ask how landscape construed as the description of place in image and or text more than merely inviting close viewing was often seen to call for interpretation or better for the application of a method or principle of interpretation Contributors Boudewijn Bakker William M Barton Stijn Bussels Reindert Falkenburg
