This paper reconsiders the emergence of language in the hominin lineage from the perspective of general ecology, multispecies theory, phenomenology, and semiotics. We propose that changing communicative environments and their shifting foci of hominin-animal and hominin-hominin interaction are fundamental to understanding the evolution of language in the hominin lineage. After reviewing the available contextual evidence on the nature and transformation of communicative ecologies in the deep-past, we pledge for interpretive conservatism and argue that an “extended short chronology” for the evolution of human language is currently best supported by the archaeological data (in sync with a prolonged period of intensified “indexical” communication). We further propose that this evolutionary trajectory is best understood as a form of non-linear “co-evolution” and hence interlaced with key developments in multiple hominin behavioral arenas and material registers, such as animal relationships, technical behavior, artistic expression and the modalities and scale of social life. Systematically mapping and exploring this broader “general ecology” of communicative needs, concerns, functions, and horizons minimally requires the integration of archaeology, ethology, linguistics, and phenomenology.

1. Introduction: Shifting the Theoretical Focus

Asking for the origins and evolution of human language is a long-standing conundrum. The available evidence is necessarily indirect – language does not “fossilize” – and assumptions about what precisely constitutes evidence for language in the first place – and more difficult even, language evolution – differ vastly across disciplinary and theoretical spectra. Accounts of the evolution of human language range from cognitive approaches, localizing language as an extension or foundation of generalized capacities for symbolic thought (e.g., Noble & Davidson, 1991; Donald 1991; Henshilwood & d’Errico, 2011;

The Language Of Human Ecology A General Systems Perspective:

The Language of Human Ecology Robert J. Griffore, Lillian A. Phenice, 2001 *Continuities in Sociological Human Ecology* Michael Micklin, Dudley L. Poston, 2013-11-11 The completion of this volume would not have been possible without the generous and dedicated help of numerous people The book had its genesis in a conference held at Cornell University in the fall of 1990 that was organized by Dudley Poston Paul Eberts and Michael Hannan all professors at the time at Cornell With the very generous financial assistance of David Call then the dean of Cornell's College of Agriculture and Life Sciences Poston Eberts and Hannan put together a two day conference of lectures and papers by human ecologists from Cornell University and elsewhere The conference focused on sociological human ecology and celebrated the fortieth anniversary of the publication of Amos Hawley's *Human Ecology* Ronald Press 1950 Professor Hawley was the keynote speaker at the conference Many of the authors of the chapters in this volume presented earlier versions at the Cornell conference in 1990 Cornell's Departments of Rural Sociology and Sociology also contributed financial assistance however without Dean Call's very generous support the conference would not have been possible A few months after the conference Poston and Michael Micklin discussed the possibility of asking the various authors of the Cornell conference papers to revise them for publication in a volume on sociological human ecology Many opted to do so but others did not because of time and other kinds of commitments and constraints

Practice Janet L. Finn, 2020-12-01 Just Practice A Social Justice Approach to Social Work provides a foundation for critical and creative social work that integrates theory history ethics skills and rights to respond to the complex terrain of 21st century social work Just Practice puts the field of social work's expressed commitment to social justice at center stage with a framework that builds upon five key concepts meaning context power history and possibility How do we give meaning to the experiences and conditions that shape our lives What are the contexts in which those experiences and conditions occur How do structures and relations of power shape people's lives and the practice of social work How might a historical perspective help us to grasp the ways in which struggles over meaning and power have played out and to better appreciate the human consequences of those struggles Taken together these concepts provide a guide for integrative social work that bridges direct practice and community building The text prepares readers with the theoretical knowledge and practice skills to address the complex challenges of contemporary social work from direct practice with individuals and families to group work organizational and community change and policy analysis and advocacy Each chapter includes learning activities reflection moments practice examples and the stories and voices of practitioners and service users to engage students as critical thinkers and practitioners The author encourages teachers and students alike to take risks move from safe familiar pedagogical spaces and practices challenge assumptions and embrace uncertainty *The Ecological Transition* John W. Bennett, 2017-09-29 Written during the height of the ecology movement The Ecological Transition is a stunning interdisciplinary work It combines anthropology ecology and sociology to formulate an understanding of cultural environmental relationships While anthropologists have been studying relationships between humans and the physical environment for a very long time only in the last thirty years have questions inherent in these relationships broadened beyond description and classification For example the concept of environment has been extended beyond the physical into the social Although anthropologists have adopted many of the concepts that Bennett develops in the book he also feels that

the central issues have never been addressed either by anthropologists or by people in related disciplines The most important of these in Bennett's opinion is the failure to incorporate a respect for the environmental in contemporary culture which would allow making exceptions in certain human practices in order to protect the environment His point in *The Ecological Transition* is that a basic cultural change in modern civilization is necessary to achieve this end Both a theoretical and a practical work *The Ecological Transition* emphasizes the relationships between human culture the physical environment technology and social policy *The Ecological Transition* is a challenging volume that makes us face the consequences of human behavior in the modern world its effect on pollution natural resources agriculture the economy and population to name just a few areas The book remains a significant contribution to the discourse on social economic and environmental problems While the book was first published in 1976 it still reads as a contemporary tract
