David Sapsford, John-ren Chen, 1998-08-10 Hans Singer is undoubtedly one of if not the world's major scholars in the field of Development Economics. Over the last six decades he has made numerous contributions to the subject both as scholar and practitioner. J. Barry

Jones, 2002-09-11 This three-volume Encyclopedia offers the first comprehensive and authoritative survey of the rapidly developing field of international political economy. Its entries cover the major theoretical issues and analytical approaches within the field. The set also provides detailed discussion of the contributions of key individuals and surveys a wide range of empirical conditions and developments within the global political economy, including its major institutions. The Encyclopedia has been designed to be eclectic in approach and wide-ranging in coverage. Theoretical entries range from discussions of the definition and scope of the field through core methodological questions such as rationalism and the structure-agent problem to surveys of the major theories and approaches employed in the study of the international political economy. **The Gypsy Economist** Alex Millmow, 2021-03-11 This book offers the first intellectual biography of the Anglo-Australian economist Colin Clark. Despite taking the economics world by storm with a mercurial ability for statistical analysis, Clark's work has been largely overlooked in the 30 years since his death. His career was punctuated by a number of firsts. He was the first economist to derive the concept of GNP, the first to broach development economics and to foresee the re-emergence of India and China within the global economy. In 1945 he predicted the rise and persistence of inflation when taxation levels exceeded 25 per cent of GNP. And he was also the first economist to debunk post-war predictions of mass hunger by arguing that rapid population growth engendered economic development. Clark wandered through the fields of applied economics in much the same way as he rambled through the English countryside and the Australian bush. His imaginative wanderings qualify him as the eminent gypsy economist for the 20th century.
