The Kiribati Test:

Grappling with the Bomb Nic Maclellan, 2017-09-26 *Grappling with the Bomb* is a history of Britain's 1950s program to test the hydrogen bomb code name Operation Grapple. In 1957-58, nine atmospheric nuclear tests were held at Malden Island and Christmas Island, today part of the Pacific nation of Kiribati. Nearly 14,000 troops travelled to the central Pacific for the UK nuclear testing program; many are still living with the health and environmental consequences. Based on archival research and interviews with nuclear survivors, *Grappling with the Bomb* presents the story of a Kiribati woman, Sui Kiritome, a British pacifist, Harold Steele, a businessman, James Burns, a Fijian sailor, Paul Ah Poy, English volunteers Mary and Billie Burgess, and many other witnesses to Britain's nuclear folly.

Chapters 7, 8, and 9 demonstrate how in Iran, communications and remote sensing drive space technology. Chapter 10 outlines Brazil's road to space, begun in the mid-1960s with the launch of the Sonda sounding rockets. The following two chapters describe Brazil's satellites and space launch systems and plans for the future. Chapters 13 and 14 study Israel's space industry. The next chapters look at the burgeoning space programs of North and South Korea. The book ends by contrasting and comparing all the space programs and speculating how they may evolve in the future. An appendix lists all launches and launch attempts to date of the emerging space powers.
