Long, 2021-12-09 Task based language teaching TBLT is an innovative approach to language teaching which emphasises the importance of engaging learners natural abilities for acquiring language incidentally The speed with which the field is expanding makes it difficult to keep up with recent developments for novices and experienced researchers alike This handbook meets that need providing a comprehensive up to date overview of the field written by a stellar line up of leading international experts Chapters are divided into five thematic areas and as well as covering theory also contain case studies to show how TBLT can be implemented in practice in a range of global contexts as well as questions for discussion and

Doughty, 2011-07-05 Bringing together an international and interdisciplinary team of contributors this Handbook is a wide ranging and invaluable reference guide to language teaching A comprehensive reference work on language teaching which combines the latest research findings coverage of core topics and examples of teaching experience from a variety of languages and settings Provides a unique breadth of coverage including the psycholinguistic underpinnings of language learning social political and educational contexts program design materials writing and course design teaching and testing teacher education and assessment and evaluation Offers a balanced evaluation of the major positions and approaches including examining the increasingly important social and political context of language teaching Written by an international and interdisciplinary group of authors from a dozen different countries English is only one of the many languages used as examples throughout the volume **The Ecology and Semiotics of Language Learning** Leo van Lier, 2006-04-18 In this

book I try to give a coherent and consistent overview of what an ecological approach to language learning might look like This is not a fully fledged grand theory that aims to provide an explanation of everything but an attempt to provide a rationale for taking an ecological world view and applying it to language education which I regard as one of the most important of all human activities Goethe once said that everything has been thought of before but that the difficulty is to think of it again The same certainly is true of the present effort If it has any innovative ideas to offer these lie in a novel combination of thoughts and ideas that have been around for a long long time The reader will encounter influences that range from Spinoza to Bakhtin and from Vygotsky to Halliday The scope of the work is intentionally broad covering all major themes that are part of the language learning process and the language teaching profession These themes include language perception and action self learning critical pedagogy and research At the same time I have attempted to look at both the macro and the micro sides of the ecological coin and address issues from both a theoretical and a practical perspective This then aims to be a book that can be read by practitioners and theoreticians alike and the main idea is that it should be readable and challenging at the same time **Teaching Modern Languages** Jean E. A. Price, 1979
