Course in Pencil Sketching Ernest W. Watson, 1967 *Landscape Drawing in Pencil* Frank M. Rines, 2006-05-12

Originally published Pelham, New York: Bridgman, 1929. [Pencil Sketching From Nature \(Classic Reprint\)](#) James Parton Haney, 2016-10-01

Excerpt from *Pencil Sketching From Nature*: From a study of these, the student will be led to see that the successful sketch largely depends upon the development of satisfactory contrasts of light and dark. Natural contrasts are emphasized, and others are created at will by the draughtsman who seeks rather to suggest the planes of his drawing than to represent them in their true values. Indeed, the latter were impossible. Pencil sketching is suggestive and not photographic. Subtleties must perforce be ignored, and contrasts often forced, so that simplicity may be secured while the illusion of solidity is created. As the student has but few tones of black at his command, he cannot hope to reproduce values as a painter reproduces them. He must instead seek pleasing relations of light and shade and familiarize himself with those devices which will enable him to suggest color and present attractive relations of sun light and shadow in his sketch.
