System 6 Alternatives Bruce G. Hansen, 1984 S2 Three system 6 mill size alternatives were designed and evaluated to determine their overall economic potential for producing standard size hardwood blanks The study focused on developing standard discounted cash flow measures Internal rates of return ranged from about 15 to 35 percent after taxes Secondary effort was directed at providing accounting cost summaries to facilitate cost comparison of standard size blanks with rough dimension stock Cost per square foot of blanks ranged from about 0.88 to 1.19 depending on mill size and the amount of new investment required S3 **NE-RP**, 1987 **Soil Survey of La Salle Parish, Louisiana** P. Lawnfield, James A. Garfield National Historic Site Paul Newman, 1992 *Perspectives on the Age of the Earth and Why They Matter* Francis Ö. Dudás, 2020-02-13 Polls show almost half of US adults believe that Earth is only 10,000 years old whereas scientists consider our planet to be 4.56 billion years old Examining these conflicting views illuminates aspects of the perceived conflict between religion and science and helps us understand the battles between evolutionist and creationist advocates This book examines how we approach knowledge and how we look at certainty It disentangles the threads of the traditional knowledge we are taught from the knowledge we gain from our own investigation of truth It argues that nature the basis of science and scripture the basis of religion derive from a single source Because of their shared origins religious and scientific perspectives grounded in verifiable truths must be in harmony The book presents the science behind the

reliability of isotopic dates and critiques young earth creationist attacks on isotopic studies Though the nature of time is a philosophical issue its measurement is a scientific venture that has affirmed that Earth is 4 56 billion years old The harmony of science and religion based on recognition of their single source is a prerequisite for the progress of humanity as a whole
