Small Powers in Alignment Omer de Raeymaeker, 1974 **Asia-Pacific Secondary States as Kingmakers** Richard J. Cook, Maximilian Ohle, Zhaoying Han, 2025-05-30 Focusing on the Asia Pacific region Cook Ohle and Han investigate the escalating strategic competition between China and the US They explore the dynamics of key regional secondary states caught in the middle namely Japan South Korea the Philippines and Vietnam emphasising their crucial role as potential kingmakers in the shifting balance of power China and the US are competing to win influence over these regional linchpins to advance their geopolitical ambitions and ultimately win the strategic competition Elucidating a power of the weak paradox this contribution examines the challenging choices faced by these secondary states as they navigate alignment pressures which influence the trajectory of the great power strategic competition Drawing upon a range of first hand government sources and regional perspectives the authors take the temperature of the China US strategic competition revealing the intricate influencing dynamics and perilous choices linchpins are being pushed to make that will determine the fate of the Asia Pacific This is a timely resource for researchers students scholars and politicians navigating the complex realm of international relations by providing a profound exploration of power struggles strategic choices and the often overlooked role of secondary states **China's Rise and the Balance of Influence in Asia** William W. Keller, Thomas G.

Rawski, 2007-05-31 China's protracted boom and political transformation is a major episode in the history of global political economy Beginning in the late 1970s China experienced a quarter century of extraordinary growth that raised every indicator of material welfare lifted several hundred million out of poverty and rocketed China from near autarky to regional and even global prominence These striking developments transformed China into a major US trade and investment partner a regional military power and a major influence on national economies and cross national interchange throughout the Pacific region Beijing has emerged as a voice for East Asian economic interests and an arbiter in regional and even global diplomacy from the Asian financial crisis to the North Korean nuclear talks China's accession to the World Trade Organization promises to accentuate these trends The contributors to this volume provide a multifaceted examination of China in the areas of economics trade investment politics diplomacy technology and security affording a greater understanding of what relevant policies the United States must develop This book offers a counterweight to overwrought concerns about the emerging Chinese threat and makes the case for viewing China as a force for stability in the twenty first century **Strategic**

Adjustment and the Rise of China Robert S. Ross, Øystein Tunsjø, 2017-06-20 Strategic Adjustment and the Rise of China demonstrates how structural and domestic variables influence how East Asian states adjust their strategy in light of the rise of China including how China manages its own emerging role as a regional great power The contributors note that the shifting regional balance of power has fueled escalating tensions in East Asia and suggest that adjustment challenges are exacerbated by the politics of policymaking International and domestic pressures on policymaking are reflected in maritime

territorial disputes and in the broader range of regional security issues created by the rise of China Adjusting to power shifts and managing a new regional order in the face of inevitable domestic pressure including nationalism is a challenging process Both the United States and China have had to adjust to China's expanded capabilities China has sought an expanded influence in maritime East Asia the United States has responded by consolidating its alliances and expanding its naval presence in East Asia The region's smaller countries have also adjusted to the rise of China They have sought greater cooperation with China even as they try to sustain cooperation with the United States As China continues to rise and challenge the regional security order the contributors consider whether the region is destined to experience increased conflict and confrontation Contributors Ian Bowers Norwegian Defence University College and Norwegian Institute for Defence Studies Daniel W Drezner Tufts University Brookings Institution and Washington Post Taylor M Fravel Massachusetts Institute of Technology Bjørn Elias Mikalsen Grønning Norwegian Defence University College and Norwegian Institute for Defence Studies Chung in Moon Yonsei University and Chairman Presidential Committee on Northeast Asia Cooperation Initiative Republic of Korea James Reilly University of Sydney Robert S Ross Boston College and Harvard University Randall L Schweller The Ohio State University ystein Tunsj Norwegian Defence University College and the Norwegian Institute for Defence Studies Wang Dong Peking University

Cambodia's China Strategy Chanborey Cheunboran, 2021-06-21 This book explores the tensions within Cambodia's foreign policy between a tight alignment with China on the one hand and Cambodia's commitment to the Association of the Southeast Asian Nations ASEAN as well as its delicate foreign policy diversification towards other major powers on the other hand It traces the long history of Cambodia's quest for survival from its bigger and historically antagonistic neighbours the Thai and the Vietnamese and its struggle for security and independence from the two neighbours and external major powers particularly the United States and China It discusses Cambodia's geopolitical predicaments deriving from its location of being sandwiched between powerful neighbours and limited strategic options available for the Kingdom The book also assesses recent developments in Cambodia's relations with its neighbours and their implications for Cambodia's increasingly tight alignment with China in recent years It considers the extent to which the ruling regime in Cambodia depends on strong relations with China for its legitimacy and survival and argues that there are risks and danger for Cambodia in moving towards an increasingly tight alignment with China

Reeuwijk, Henri E. Bal, Criel J.H. Jacobs, Koen Langendoen, 2012-07-20 Modern Compiler Design makes the topic of compiler design more accessible by focusing on principles and techniques of wide application By carefully distinguishing between the essential material that has a high chance of being useful and the incidental material that will be of benefit only in exceptional cases much useful information was packed in this comprehensive volume The student who has finished this book can expect to understand the workings of and add to a language processor for each of the modern paradigms and be able to read the literature on how to proceed The first provides a firm basis the second potential for growth *Write Great Code, Vol. 2* Randall Hyde, 2004 Provides information on how computer systems operate how compilers work and writing source code

Write Great Code, Volume 2, 2nd Edition Randall Hyde, 2020-08-04 Explains how compilers translate high level language source code like code written in Python into low level machine code code that the computer can understand to help readers understand how to produce the best low level computer readable machine code In the beginning most software was written in assembly the CPU's low level language in order to achieve acceptable performance on relatively slow hardware Early programmers were sparing in their use of high level language code knowing that a high level language compiler would generate crummy low level machine code for their software Today however many programmers write in high level languages like Python C C C Java Swift The result is often sloppy inefficient code But you don't need to give up the productivity and portability of high level languages in order to produce more efficient software In this second volume of the Write Great Code series you'll learn How to analyze the output of a compiler to verify that your code does indeed generate good machine code The types of machine code statements that compilers typically generate for common control structures so you can choose the best statements when writing HLL code Just enough 80x86 and PowerPC assembly language to read compiler output How compilers convert various constant and variable objects into machine data and how to use these objects to write faster and shorter programs NEW TO THIS EDITION COVERAGE OF Programming languages like Swift and Java Code generation on modern 64 bit CPUs ARM processors on mobile phones and tablets Stack based architectures like the Java Virtual Machine Modern language systems like the Microsoft Common Language Runtime With an understanding of how compilers work you'll be able to write source code that they can translate into elegant machine code That understanding starts right here with Write Great Code Volume 2 Thinking Low Level Writing High Level *How Realist Is India's National Security Policy?* Kanti Bajpai, 2023-03-30 In managing national security how Realist is India in terms of cultivating and using power and especially military power A conventional view of India is that it has been uncomfortable with realism or power politics as a guide to policy This volume shows that it has been more realist than is generally recognized and that it has increasingly become comfortable with power in the service of its interests The essays in this volume Examine the different aspects and types of realism in India's national security policy Include a range of perspectives from academics as well as former military officers and diplomats Focus on India's military and foreign policy in dealing with China Pakistan the United States Southeast Asia

and West Asia This key volume will be indispensable to scholars and researchers of politics and international relations defence and strategic studies and South Asian studies and to government officials journalists and general readers interested in the external dimensions of India's national security Images and Strategies for Autonomy Ole Elgström, 2013-11-11 How do small states approach their security problems What types of strategic instruments exist for small states and when and why are certain strategies chosen rather than others The security of weak states is problematic demanding trade offs in the decisions made Using 19th century Swedish security policy as an example it is argued here that small states in their pursuit of security and autonomy face a dilemma between abandonment and entrapment leading to a choice between balancing between great powers or making an approach to one of them This hard choice confronts both non aligned and allied states It is also argued that a focus on the images of decision makers is required as a complement to traditional realist theory in order to gain an in depth understanding of small state security decisions This book is special in its focus on small non aligned states Most studies on balance of power behaviour limit their analysis to alignment decisions The study also expands the domain of image constructs by introducing perceived regime characteristics into the analysis besides images of power and intentions Audience Scholars and students interested in foreign policy analysis particularly small state behaviour The book points to the importance of beliefs and ideas in security policy *Middle Powers and the Rise of China* Bruce Gilley, Andrew O'Neil, 2014-09-10 China's rise is changing the dynamics of the international system Middle Powers and the Rise of China is the first work to examine how the group of states referred to as middle powers are responding to China's growing economic diplomatic and military power States with capabilities immediately below those of great powers middle powers still exercise influence far above most other states Their role as significant trading partners and allies or adversaries in matters of regional security nuclear proliferation and global governance issues such as human rights and climate change are reshaping international politics Contributors review middle power relations with China in the cases of South Korea Malaysia Thailand Indonesia Australia South Africa Turkey and Brazil addressing how these diverse nations are responding to a rising China the impact of Chinese power on each and whether these states are being attracted to China or deterred by its new power and assertiveness Chapters also explore how much or how little China and for comparison the US value middle powers and examine whether or not middle powers can actually shape China's behavior By bringing a new analytic approach to a key issue in international politics this unique treatment of emerging middle powers and the rise of China will interest scholars and students of international relations security studies China and the diverse countries covered in the book **Geopolitics** Jason Dittmer, Jo Sharp, 2014-06-27 It has been increasingly impossible to think about our changing world without coming across the term geopolitics In the wake of the invasion and occupation of Iraq by the United States United Kingdom and others geopolitics has been offered as an explanation for the occupation's failure to reinvent the Iraqi state and as a blueprint for future action But what is geopolitics Drawing both on academic and political material this book introduces readers to the

concept of geopolitics from the first usage of the term to its more recent reconceptualisations The concept of geopolitics is introduced through four thematic sections Imperial Geopolitics Cold War Geopolitics Geopolitics after the Cold War and Reconceptualising Geopolitics Each section includes key writings from a range of diverse and leading authors such as Said Agnew Dalby O Tuathail Gregory Barnett and Kaplan and is accompanied by a critical introduction by the editors to guide the reader through the material This Reader establishes the foundations of geopolitics while also introducing readers to the continuing significance of the concept in the 21st century This Reader provides an essential resource that exposes students to original writing The Editors provide a pathway through the material with Section Introductions to assist the readers understanding of the context of the material and impacts of the writings The readings included draw from a range of authors writing from a range of locations The Reader concludes with the latest changes in geopolitical thought incorporating feminist and other perspectives

Asian Geopolitics and the US-China Rivalry Felix Heiduk,2021-07-22 This book analyses the ways in which foreign policy actors in Asia have responded to the emerging great power conflict between the US and the People s Republic of China focusing on medium and small states across the Indo Pacific The book offers a much needed counterpoint to existing analyses on the Indo Pacific and China s BRI and presents a new perspective by examining how great power politics are locally reinterpreted conditioned or at times even contested It illustrates the policy level challenges which the US China rivalry poses for established political and economic practices and outlines how these challenges can be best addressed by smaller states and their societies A timely assessment of the power play in the Indo Pacific with the angle of Sino American rivalry this book makes an important contribution to the study of Political Science International Relations Asian Studies and Security Studies Chapter 10 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Crucible of Beliefs Dan Reiter,2019-05-15 How do foreign policymakers learn from history When do states enter alliances Why have some small powers chosen to enter alliances whereas others have stayed neutral In Crucible of Beliefs Dan Reiter uses work in social psychology and organization theory to build a formative events model of learning in international politics History does inform the decisions of policymakers he suggests but it is history of a specific sort based on firsthand experience in major events such as wars Tested against balance of threat theory the leading realist explanation of alliance behavior Reiter s formative events model of learning emerges as a far better predictor of states decisions Crucible of Beliefs shows that contrary to balance of threat theory state leaders ignore the level of international threat and focus instead on avoiding past mistakes and repeating past successes A serious blow to realism these findings demonstrate that to understand the dynamics of world politics it is essential to know how leaders learn from history War Peace and Hegemony in A Globalized World Chandra Chari,2010 This book focuses on how the US could adapt its foreign policy initiatives to fit in with the growing aspirations of a multipolar world for a more balanced international order Written by

leading scholars such as Joseph Nye, Eric Hobsbawm and Akira Iriye, the volume examines if the absence of a superpower status would lead to anarchy or if an alternative is possible. In view of the globalization process and the changing perceptions of US hegemony in the various regions of the world, it addresses the possibility of re-examining and redefining the nineteenth century classical balance of power. Divided into two sections, it analyzes global perspectives on war, peace and hegemony and the role of the United States in each region of the world in the context of the unfolding processes of globalization, the various ways in which economic and socio-political organizations are impacting inter and intra-regionally, and the role of the United States vis-à-vis the individual countries and regions.

Military Strategy of Middle Powers Håkan Edström, Jacob Westberg, 2020-10-15

Military Strategy of Middle Powers explores to what degree twenty-first century middle powers adjust their military strategies due to changes in the international order such as the decline in US power. The overarching objective of the book is to explain continuity and change in the strategies of a group of middle powers during the twenty-first century. These strategies are described, compared and explained through the lens of Realism. In order to find potential explanations for change or continuity within the cases as well as for similarities and differences between the cases, the strategies of 11 middle powers are analysed: Canada, Germany, Italy, Spain, Australia, Brazil, Indonesia, South Africa, India, Japan and South Korea. This group of countries are considered similar in several important aspects, primarily regarding relative power capacity. When searching for potential explanations for different strategic behaviours among the middle powers, their unique regional characteristics are a key focus, and consequently the impact of the structure and polarity as well as the patterns of amity and enmity of the regional context are analysed. The empirical investigation is focused on security strategies used since the terrorist attacks 9/11/2001, which was one of the first major challenges to US hegemony. This book will be of much interest to students of military and strategic studies, foreign policy and International Relations in general.
