referred to as microgreens left him feeling overwhelmed and uninterested There had to be a simpler way to grow greens for his family indoors After some research and diligent experimenting Burke discovered he was right there was a way And it was even easier than he ever could have hoped and the greens more nutrient packed He didn't even need a south facing window and he already had most of the needed supplies just sitting in his pantry The result healthy homegrown salad greens at a fraction of the cost of buying them at the market The secret start them in the dark Growing Soil Sprouts Burke's own descriptive term for sprouted seeds grown in soil as opposed to in jars employs a method that encourages a long stem without expansive roots and provides delicious salad greens in just seven to ten days way earlier than any other method with much less work Indeed of all the ways to grow immature greens this is the easiest and most productive technique Forget about grow lights and heat lamps This book is a revolutionary and inviting guide for both first time and experienced gardeners in rural or urban environments All you need is a windowsill or two In fact Burke has grown up to six pounds of greens per day using just the windowsills in his kitchen Year Round Indoor Salad Gardening offers detailed step by step instructions to mastering this method hint it's impossible not to succeed it's so easy tools and accessories to have on hand seeds and greens varieties soil and compost trays and planters shelving harvest and storage recipes scaling up to serve local markets and much more
