Bio- and Nano-sensing Technologies for Food Processing and Packaging Ashutosh Kumar Shukla, 2022-10-19 The importance of processing and

packaging food items so that they are safe for the consumer cannot be underestimated. Sensors have an important role to play in this and sensing technologies have attracted the attention of the scientific community in view of increasing environmental and societal concerns. This edited volume presents a collection of ten chapters discussing the current trends of bio and nano sensing technologies for processing and packaging of food items. Starting with an overview chapter which introduces the field, the book goes on to discuss novel applications related to preservation, authenticity and safety of foods. Intelligent food packaging and nano based sensing are covered and the book finishes with a look towards the pros and cons of how this will revolutionise sensing throughout the food sector. It will be of benefit to scientists and practising professionals conducting research in the areas of food processing, contamination and food safety and academic researchers and graduate students studying food technology or food engineering.

Food Safety and Human Health Ram Lakhan Singh, Sukanta Mondal, 2019-07-30. Despite advances in hygiene, food treatment and food processing, diseases caused by foodborne pathogens continue to constitute a worldwide public health concern. Ensuring food safety to protect public health remains a significant challenge in both developing and developed nations. Food Safety and Human Health provides a framework to manage food safety risks and assure a safe food system. Political, economic and ecological changes have led to the re-emergence of many foodborne pathogens. The globalization of food markets, for example, has increased the challenge to manage the microbial risks. This reference will help to identify potential new approaches in the development of new microbiologically safe foods that will aid in preventing food borne illness outbreaks and provides the basic principles of food toxicology, food processing and food safety. Food Safety and Human Health is an essential resource to help students, researchers and industry professionals understand and address day to day problems regarding food contamination and safety. Encompasses the first pedagogic treatment of the entire range of toxic compounds found naturally in foods or introduced by industrial contamination. Identifies areas of vital concern to consumers such as toxicological implications of food and human health implications of food processing. Focuses on safety aspects of genetically modified foods and the range of processing techniques along with the important food safety laws.

Application of Nanotechnology in Food Science, Processing and Packaging Chukwuebuka Egbuna, Jaison Jeevanandam, Kingsley C. Patrick-Iwuanyanwu, Eugene N. Onyeike, 2022-05-03. This book entitled Application of Nanotechnology in Food Science, Processing and Packaging presents up to date information on the emerging roles of nanotechnology in food industry, its fundamental concepts, techniques and applications. The application of nanotechnology in the food industry is an emerging area which has found tremendous use in improving food quality through the enhancement of food taste, texture, colour and flavour. Also, its application has improved the bioavailability and target delivery of certain bioactive food ingredients through controlled release of nutrients, a feature that is impossible with the conventional methods of food processing. The application of nanotechnology in food packaging for the detection of contaminants, pathogens, biotoxins and pesticides through nanosensor safety evaluations has led to the increase in shelf life of

products and quality assurance through the detection and monitoring of toxins This book taps from the experience of subject experts from key institutions around the world The users of this book will benefit greatly as the chapters were simplified and arranged carefully to aid proper understanding consistency and continuity Internet of Things in the Food Industry Anna Rogala, Renata Nestorowicz, Ewa Jerzyk, 2024-04-02 The food industry is experiencing a digital transformation across the entire supply chain from farm to fork This book offers comprehensive insights into the challenges and opportunities faced specifically examining the application of the Internet of Things The authors analyse the benefits and the related threats from the perspective of the participants of the entire supply chain including consumers Taking the reader on a journey this book begins with an analysis of technology use in farming production logistics and retailing before delving into the use of digitalization in educating consumers on sustainable consumption practices The multifaceted analysis of the Internet of Food potential combines science and practice enriching theoretical analysis with case studies This book will be of interest to those researching and studying supply chain management logistics innovation and technology management and consumption with a particular interest in the food industry Sensor Technologies for Food Quality and Safety Ashish Kapoor, Anandhakumar Sundaramurthy, 2025-06-02 The multidisciplinary field of food sensor development is evolving rapidly Prompt detection of food contaminants is vital for public health protection Significant advances are taking place in the design and development of sensitive affordable and user friendly sensors for food safety and security This book covers various recent advances in food sensor development using illustrative descriptions of successful practical applications as well as identifying existing challenges and prospects Compiling current progress in food quality sensors such as electrochemical sensors nanocomposite sensors aptamer based immunosensors and microfluidic lab on a chip devices it fills a gap in the literature by laying down a framework for food sensor development from idea to implementation With an emphasis on multidisciplinary aspects the book appeals to students academics researchers and industry personnel from diverse backgrounds with an interest in food science and food quality assurance **HCI International 2016 - Posters' Extended Abstracts** Constantine Stephanidis, 2016-07-04 This is the second volume of the two volume set CCIS 617 and CCIS 618 that contains extended abstracts of the posters presented during the 18th International Conference on Human Computer Interaction HCII 2016 held in Toronto Canada in July 2016 The total of 1287 papers and 186 posters presented at the HCII 2016 conferences was carefully reviewed and selected from 4354 submissions These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems The papers thoroughly cover the entire field of Human Computer Interaction addressing major advances in knowledge and effective use of computers in a variety of application areas The papers included in this volume are organized in the following topical sections web social media and communities gesture and motion based interaction expressions and emotions recognition and psychophysiological monitoring technologies for learning and creativity health applications location based and navigation applications smart environments
