Smart Thinking The Essence Of Strategy In The New Millennium:

Smart Thinking James Seligman, 2005-02 Some people seem to be more successful than others and we all wonder why successful people think smart and use effective strategies to achieve their outcomes By understanding people and how their knowledge and beliefs are created one is provided with incredible insight into behaviour It also allows you to use this smart thinking to create effective strategies at home at the office on the playing field or anywhere you interact with people Powerful and effective communication with others created and formed with an understanding of reactions gives you the competitive edge in any negotiation We are all taught to sell ourselves and what we believe in to impress others to get our point across Most of us never think smart beforehand and actually evaluate what a person wants to hear By looking at the receiving end of communication we can create more effective strategies in any situation without alienating or making the receiver defensive By thinking smart about our strategies in communication and negotiation we can be more successful Smart Thinking explores techniques and new ways to achieve dynamic outcomes in which you or your organisation excel

perilous situation pertaining to strategy formulation and direction Using current management and organizational models the author intends to identify the fundamental weaknesses within the two armies alpha strategies More importantly as both armies engage enterprise wide transformation the author will demonstrate how this fundamental weakness in cognition and application has the very real possibility of jeopardizing the relevancy of both nations alpha land forces
