Global Threat Robert Mandel, 2008-09-30 This book provides a fresh perspective on causes consequences and cures surrounding today's most pressing global security challenges After explaining the changes in post Cold War threat it develops a novel target centered approach to assessment and management that is more useful in coping with current foreign dangers than current best practices After explaining the challenge in coping with current global threat this book begins by analyzing the distinctiveness of post Cold War threat and of the nature of enemies prevalent in today's world Then it considers prevailing threat analysis deficiencies and develops an alternative target centered conceptual

approach for recognizing and prioritizing threat. Illustrating the value of this approach are four post 9/11 case studies: the weapons of mass destruction and terrorism threat linked to the 2003 Iraq War, the natural calamity threat linked to the 2004 tsunami disaster, the terrorist threat linked to the 2005 London Transport bombings, and the undesired mass population threat linked to the 2006 American illegal immigration tensions. The study concludes by presenting some target-centered ideas about how to cope better with incoming threat, calling in the end for strategic transformation.

Terrorists in Our Midst Yonah Alexander, 2010-04-09. This unique work analyzes for the first time how foreign affinity terrorism works in a major democratic nation like the United States and what this country must do to survive the terror challenge on both conventional and unconventional levels. To date, no definitive study has dealt specifically with the role of American citizens in supporting a foreign political, ideological, and religious illegal agenda. ***Terrorists in Our Midst*** Combating Foreign Affinity Terrorism in America remedies that, as six expert authors discuss, the threats of Americans to security interests in the United States and elsewhere, exploring what can and should be done to reduce a risk that may threaten the very survival of the free world. ***Terrorists in Our Midst*** focuses not only on foreign nationals operating in the United States but also on American citizens participating in terror networks at home and abroad. The book presents an overview of both conventional and unconventional terrorism, surveys the terrorist threat in the United States by state and nonstate actors, and analyzes the foreign affinity links of American operatives in this country and abroad. Most important for the safety and security of the United States, it offers an assessment of what policies worked and what did not work, specifying a best practices agenda of recommendations that should be adopted by the United States and the international community.

International Year Book Number, 1923. **Constitutional Law, Religion and Equal Liberty** Azin Tadjini, 2019-09-19. During the 20th century, many countries embarked on a process of constitutional secularization by which the role of religion gradually became limited. Yet by the late 20th century and increasingly following the end of the Cold War, this development began to be challenged. This book examines the return of religion in constitutions through the concept of constitutional de secularization. It places this phenomenon in the context of the constitutional memory of the countries in which it has taken place and critically examines it against the development and standards of constitutionalism as the prevailing constitutional legal and political theory. Central to this analysis is the impact of constitutional de secularization on the regulation of equality in liberty, that is, both the regulation of constitutional rights and

the scope for equality of those who are granted such rights The book argues that equal liberty forms an essential part of constitutionalism as a theory and that constitutionalism therefore entails a continuous development towards expanding it The first and second part of the book presents a conceptual framework for the study of constitutional de secularization The third part presents and analyses three cases of constitutional de secularization in Afghanistan Iran and Iraq The book will be of interest to researchers and policy makers interested in constitutional history and theory and the role of religion in law and its compatibility with human rights Original Sin Bleddyn E. Bowen, 2023-01-01

Space technology was developed to enhance the killing power of the state The Moon landings and the launch of the Space Shuttle were mere sideshows drawing public attention away from the real goal military and economic control of space as a source of power on Earth Today as Bleddyn E Bowen vividly recounts thousands of satellites work silently in the background to provide essential military intelligence and economic capabilities No major power can do without them Beyond Washington Moscow and Beijing truly global technologies have evolved from the ground floor of the nuclear missile revolution to today's orbital battlefield shaping the wars to come World powers including India Japan and Europe are fully realizing the strategic benefits of commanding Earth's cosmic coastline as a stage for war development and prestige Yet as new contenders spend more and more on outer space there is scope for cautious optimism about the future of the Space Age if we can recognize rather than hide its original sin
