Despite the interest and pervasiveness of mentoring there has been little attention devoted to professionalizing mentoring for program managers in learning organizations especially post secondary institutions and there are scant resources available for mentoring coordinators This book fills that gap Drawing on research on mentoring and coaching in psychology education and organizations this guide translates research into practice by helping program administrators learn more about the behaviors of mentoring stages of mentoring relationships elements of high quality relationships and recognizing and avoiding dysfunctional ones The book includes diagnostic surveys and case studies that coordinators might use in their programs and makes an important contribution to the literature on mentoring providing a practical up to date resource for those working in the field on how to set up run and evaluate their mentoring programs      *Western Humor and Irony Membership Serial Yearbook* ,1985      *The Primer of Humor Research* Victor Raskin,2008 The book is intended to provide a definitive view of the field of humor research for both beginning and established scholars in a variety of fields who are developing an interest in humor and need to familiarize themselves with the available body of knowledge Each chapter of the book is devoted to an important aspect of humor research or to a disciplinary approach to the field and each is written by the leading expert or emerging scholar in that area There are two primary motivations for the book The positive one is to collect and summarize the impressive body of knowledge accumulated in humor research in and around Humor The International Journal of Humor Research The negative motivation is to prevent the embarrassment to and from the first timers often established experts in their own field who venture into humor research without any notion that there already exists a body of knowledge they need to acquire before publishing anything on the subject unless they are in the business of reinventing the wheel and have serious doubts about its being round The organization of the book reflects the main groups of scholars participating in the increasingly popular and high powered humor research movement throughout the world an 800 to 1 000 strong contingent and growing The chapters are organized along the same lines History Research Issues Main Directions Current Situation Possible Future Bibliography and use the authors definitive credentials not to promote an individual view but rather to give the reader a good comprehensive and condensed view of the area
