It's starting to look like the ball python may have been stolen when Stephen and Renée get word that more homes have been broken into all of their clients of Noble Dog Walking. The case turns desperate as one by one their clients leave. After losing Ping and Pong as clients too, Stephen and Renée pin their last hope on gathering all the suspects at the animal shelter and a real catastrophe ensues. *A Snake Mistake* Mavis Smith, 1991 After Farmer Henry uses light bulbs as fake eggs to fool his hens into laying more eggs, Jake the Snake makes a big mistake. Parallels between Science & Religion and Philosophy & Science BK Jagdish Chander, It has become almost a fashion for those who write and speak on Religion or Philosophy to quote certain reputed scientists and to give some parallels from Science especially Physics in an attempt to make religious views easily acceptable to scientists and rationalists It is also becoming a favourite choice or even a pastime of an increasing number of scientists especially those who had an exposure to the oriental thought to give parallels from ancient mythology mysticism or religious concepts of the cosmos and consciousness either with the avowed object of widening the field of that science or showing the overlapping areas between the two fields or sometimes even for the dubious purpose of covering up the blurred nebulous or mystic nature of their scientific concepts The writer of this small book has only elementary knowledge in the field of science and is a mere ordinary student of religion and philosophy and has absolutely no claim to any erudition or in depth understanding of many advanced theories of science and formulations of mathematics and deep and profound religious concepts He considers himself only a lay person who has his own interest in both the fields so as to widen his horizon of understanding and he applies only commonsense to comprehend what the writers or speakers in anyone of these fields write or say He would not have therefore ventured to enter a field which even the angels are afraid to tread but he thought that it would be better if even a feeble voice is raised or view is recorded to point out that certain scientific theories which are being oft quoted to support a religious dogma do not in fact support it The author may be wrong in what he has expressed in the following pages and would in that case beg an apology from the more knowledgeable readers but the chances are that he is right and he would be satisfied if he has done a service
