The book is divided into seven sections covering the principal areas of Habermas's work. Each section includes an introduction and a selection of substantial extracts from relevant books. In the general introduction Outhwaite outlines the central themes of Habermas's work and analyses the development of his views over the years. Subsequent sections are organized thematically and chronologically so that the book will be easy to use by students. There are extracts from all of Habermas's major works including his early work on the public sphere and on science and technology his writings on the methodology and epistemology of the social sciences his work on evolution and legitimation his theory of communication and discourse ethics his analysis of modernity and his critique of postmodernism and his most recent work on law and the state. *The Public Sphere* Alan McKee, 2005-02-21 What is happening to public debate in Western cultures? Is our public sphere disintegrating? In the face of popular tabloid newspapers new forms of reality television and an increasing lack of respect for traditional authorities many critics are concerned that our society no longer has a rational informed and unified space where everyone can communicate about the issues that affect us all. In this book Alan McKee answers these questions by providing an introduction to the

concept of the public sphere the history of the term and the philosophical arguments about its function By drawing on many examples from contemporary mediated culture McKee looks at how we communicate with each other in public and how we decide whether changing forms of communication are a good thing for the public sphere     The Television Studies Reader Robert Clyde Allen, Annette Hill, 2004 The Television Studies Reader brings together key writings in the expanding field of television studies providing an overview of the discipline and addressing issues of industry genre audiences production and ownership and representation The Reader charts the ways in which television and television studies are being redefined by new and alternative ways of producing broadcasting and watching TV such as cable satellite and digital broadcasting home video internet broadcasting and interactive TV as well as exploring the recent boom in genres such as reality TV and docu-soaps It brings together articles from leading international scholars to provide perspectives on television programmes and practices from around the world acknowledging both television's status as a global medium and the many and varied local contexts of its production and reception Articles are grouped in seven themed sections each with an introduction by the editors Institutions of Television Spaces of Television Modes of Television Making Television Social Representation on Television Watching Television Transforming Television     *Decolonizing the Body of Christ* D. Joy, J. Duggan, 2012-06-14 The first book in the new Postcolonialism and Religions series offers a preview of the series focus on multireligious indigenous and transnational scholarly voices In this book the once arch enemies of Religious studies and Postcolonial theory become critical companions in shared analysis of major postcolonial themes     The Democratic Plan: Analysis and Diagnosis Alan March, 2016-03-16 Despite ongoing technical and professional advances urban and regional planning is often far less effective than we might hope Conflicting approaches and variable governmental settings have undermined planning's legitimacy and allowed its goals to be eroded and co-opted in the face of mounting challenges Deeper organising principles for self-understanding action and productive critique are lacking This book takes steps toward resolving these problems by providing a clear theoretical position to practically examine urban planning systems within democratic governance settings the basis of planning's legitimacy and action Joining practical planning with political science perspectives and the work of critical theorists such as Jürgen Habermas it directly examines urban planning as a process of governance The dilemmas inherent to democracy are used as key organising principles and challenges for planning Collective knowledge development and steering processes are examined as the core purposes of urban planning Communicative planning's grounding in the work of Habermas is revisited to develop practical ways of examining overall planning systems This theoretical approach can be adapted to a range of planning systems and settings beyond those examined in the book such as corporate or political realms It is one of only a few analyses that bring together theoretical understandings and grounded and practical analyses of an Australian planning system Conceptual and highly practical explanations of how and why the Victorian system does and doesn't work are revealed The book demonstrates how specific place-based understandings and meaningful comparison

between planning systems can be made using critical theory to suggest positive change      *Derrida* Madeleine Fagan, 2007-04-18 death of Jacques Derrida in 2004 represented a major interruption in contemporary intellectual life This death calls for an engagement with Derrida's work and an attempt to understand his legacy Such a discussion is fraught with tension between remaining faithful after death and putting Derrida's writing to work in new directions posing challenges and exposing limitations In short this legacy is necessarily a negotiation The aim of this book is to grapple with this specific theme and to explore the implications of Derrida's death for the future of critical thought itself The authors demonstrate that there is no single way to adopt or inherit Derrida's thought Rather through their engagement with contemporary themes within Politics and International Studies Philosophy Literary Studies and Postcolonial Studies each chapter illuminates the degree to which on going reflection radical critique and above all radical self critique are demanded by deconstruction This book provides the key st      *Habermas* Peter Dews, 1999-11-15 Comprised of classic and newly commissioned papers from leading theorists this volume provides a wide ranging critical introduction to the thought of Jurgen Habermas Some contributions explore the relation between Habermas's philosophy and the thought of major predecessors including Kant Hegel Marx and Heidegger Others elucidate the political context of Habermas's thinking while a final section presents the responses of leading German contemporaries to his work The result is a more rounded picture of Habermas's oeuvre and achievement than has previously been available Habermas emerges as a thinker whose outstanding powers of renewal and innovation are inseparable from his engagement with the major traditions of European thought and his own intellectual and political context
