This book argues that the expressivist justice model provides a meaningful foundation for the participation of victims in international criminal proceedings. Traditional criminal justice theories have tended to marginalise the role afforded to victims while informing the criminal procedures utilised by international criminal courts. As a result, giving content to shaping and enhancing victims participatory rights have been some of the most debated issues in international criminal justice. This book contributes to this debate by advancing expressivism which has the capacity to create a historical narrative of gross human rights violations as a core of international criminal justice able to provide a worthwhile basis for the participation of victims in proceedings and clarifying the scope and content of their participatory rights. The work provides an in depth discussion on issues related to victims participatory rights from the perspective of international human rights law, victimology and the philosophical foundation of international criminal justice. The book will be a valuable resource for researchers, academics and policymakers working in the areas of international criminal justice, international human rights law, transitional justice and conflict studies.

Third Place Learning Glyn M. Rimmington, Mara Alagic, 2008-06-01. The hybridity and dynamism of today's interconnected, interdependent and culturally diverse world poses challenges and opportunities for learning and communication. This book introduces an approach to facilitate global learning opportunities while facing these challenges. The approach is based on the cage painting metaphor for dialogic co-construction of meaning and understanding of multiple perspectives. Resolving disorienting dilemmas or preconceptions requires a dialectic flow of thinking since the root of the problem may lay deep in person's beliefs and values. Such experiences might be transformative in their nature, causing change in person's perspective, better understanding the culture of themselves and other people, reflective and mindful inquiry into one's worldview, the third place processes. Misunderstandings are more prevalent when using technology, global reach between people from distant locations, different cultures. To prepare people for these challenges, we offer a Web 2.0 based instructional design blueprint. Dependent on the context and content of the planned activities, the cage painting and global learning processes may be facilitated simultaneously or sequentially. The approach presented in this book has attracted interest of educators in different disciplines as well as human resources leaders concerned with key characteristics of today's global business workers: intercultural, global communication and collaboration. The ideas emerged from six years of studying ways in which we and our colleagues from 25 other countries integrated global learning into classrooms in a range of discipline areas. In this book, we explore the competences needed to communicate interculturally and avoid the effects of preconceptions on our communication and collaboration. We review metaphors commonly used in intercultural communication and then introduce a new metaphor called Cage Painting. The process of Cage Painting requires certain conditions during intercultural communication, whether it is face to face or via global reach using technology. The transformative processes that we undergo as we confront cultural disorienting dilemmas, smiling being a simple example of one, are named the Third Place.

Post-Conflict Rebuilding and International Law Ray Murphy, 2017-03-02. This volume

presents the research analysis of a range of scholars and experts on post conflict peacebuilding and international law from a variety of perspectives and missions The selected essays show that peacebuilding like the concept of peacekeeping is not specifically provided for in the UN Charter They also demonstrate that the record of peacebuilding like that of peacekeeping is varied and while both concepts are intrinsically linked neither lends itself to precise definition The essays consider the historical approaches to peacebuilding such as the role played by the UN in the Congo in the early 1960s and the work of the United States and its allies in rebuilding Germany and Japan in the aftermath of World War II Finally essays consider the major challenge for contemporary peacebuilding operations to make international administrations accountable and to ensure the involvement of the international community in helping rebuild communities and prevent the resurgence of violence

Interculturality, Interaction and Language Learning Jane Woodin, 2018-05-23 This book opens up new lines of debate in language learning and intercultural communication through an investigation of tandem language learning a method of language learning based on mutual language exchange between native speakers and learners of each other's language in connection with intercultural learning and identity construction Through an empirical study of face to face tandem conversations Jane Woodin provides compelling evidence for the re definition of the tandem partnership beyond the traditional native speaker non native speaker NS NNS paradigm By analyzing conversation shapes learner identification of self and other and interactants own focus on culture this book reveals how interactants themselves address the complexities of language learning ownership and meaning The book also questions the prevalence of models of intercultural competence which describe the competence of the individual with little recognition of the role of the relationship or interaction Woodin considers the broader applicability of the tandem framework of autonomy and reciprocity and suggests new directions for further research on tandem learning

Unlawful Attacks in Combat Situations Héctor Olásolo, 2008 Death and destruction are unavoidable effects of war and combat situations The fact that people have been killed or injured or property has been destroyed should not encourage anyone to rush to the conclusion that war crimes have been committed On the contrary before reaching such a conclusion it is necessary to carefully analyze the conduct of the person causing death injury or damage in order to ascertain whether such conduct is consistent with international humanitarian law Technology law and public opinion on what is acceptable has greatly evolved since World War II The issue of civilian damage caused in combat operations has become an important topic in public opinion since Operation Desert Storm in 1991 Public pressure to limit incidental civilian damage has notably increased following the NATO aerial campaign in Kosovo in 1999 and the subsequent conflicts in Afghanistan in 2001 Iraq in 2003 and Lebanon 2006 *Unlawful Attacks in Combat Situations* focuses on the manner in which unlawful attacks launched during the conduct of hostilities have been dealt with in the Rome Statute of the International Criminal Court the international treaty which to date deals most comprehensively with war crimes committed in international and non international armed conflicts and in the case law of the International Criminal Tribunal for the Former
