The Ultimate Pi Day Party Jackie Lau, 2019-03-05 Josh Yu has a plan but he needs help. If there's one thing that might get my dad, a retired math teacher, to visit Toronto and have a real conversation with me for the first time in seventeen years, it's a big nerdy Pi Day party. And hopefully this party and seeing the tech company I built from nothing will finally be enough to impress him and make him forgive me for everything I did when I was a teenager. But it's got to be a really great party. That's where Sarah Winters comes in. She owns Happy as Pie, a sweet and savory pie shop, and wants to get into catering. She makes an amazing lamb, rosemary pie, cherry pie, lemon lime tart, you get the idea. She'll provide the food and help me plan the party, nothing more. No matter how much time we spend together, I'm not going to fall in love with her. At least that's what I tell myself. Jackie Lau writes soft and steamy romances with Asian characters and lots of food. The Baldwin Village series is set in a Toronto neighborhood and each book may be read as a standalone. Book 0.5: One Bed for Christmas; Book 1: The Ultimate Pi Day Party; Book 2: Ice Cream Lover; Book 3: Man vs Durian. KEYWORDS: interracial romance, foodie romance, bakery pie, Pi Day, Asian hero, CEO, small business owner, rom com, romantic comedy, contemporary romance, steamy romance, big city romance, Toronto, Canadian romance, happy ending.

Harnessing from these two main

tracks for information processing management and communication are held covering both research and application works of information management intelligent information processing interaction management networking telecommunications and social interaction This book creates unique opportunity for research convergence among truly diverse technology domains of computer science Leveraging from this diversity of topics researchers get to generate novel research ideas by seeking application of their research in a different technology domain This volume represents the collection of papers presented at the 13th International Conference on Ubiquitous Information Management and Communication IMCOM 2019 held on 4-6 January 2019 in Phuket Thailand Out of 228 papers submitted from all around the world 88 papers were accepted for presentations The 88 contributions to this volume are organized into 5 chapters Chapter 1 Network Evolution Chapter 2 Intelligent and Secure Network Chapter 3 Image and Video Processing Chapter 4 Information Technology and Society and Chapter 5 Data Mining and Learning Our editors wish readers to find this volume informative and enjoyable

Slope Stability Analysis and Stabilization Y. M. Cheng, C. K. Lau, 2008-06-03 A number of methods currently exist for the analysis and design of slopes This book provides a critical review of these and offers several more appropriate approaches for overcoming numerical convergence and the location of critical failure surfaces in two dimensional and three dimensional cases New concepts in three dimensional stability analysis finite element analysis and the extension of slope stability problems to lateral earth pressure problems are also addressed It gives helpful practical advice and design resources in the form of recommendations for good analysis and design practice design charts and tables for the engineer Limitations are detailed of both limit equilibrium and the finite element method in the assessment of the stability of a slope and guidance is provided for assessing the fundamental assumptions and limitations of stability analysis methods and computer modelling The book provides ample examples to illustrate how this range of problems should be dealt with The final chapter touches on design and its implementation on site The emphasis is on the transfer of the design to its physical implementation on site in a holistic way taking full account of the latest developments in construction technology Engineering and construction problems tend to be pigeonholed into different classes of problem such as slope stability bearing capacity and earth pressure behind retaining structures This is quite unnecessary This book offers a unified approach which is conceptually practically and philosophically more satisfying

1998 At this meeting the recent developments in the field of tryptophan research were presented by leading researchers from all over the world in 81 oral and 48 poster contributions Research on tryptophan and its derivatives provides an inexhaustible subject At the conference we tried to compose a multifaceted picture of the recent investigations through contributions from the major disciplines involved Thus we tried to strike a balance between basic research topics and clinical nutritional or industrial applications We offered workshops on tryptophan in sleep and mood melatonin IDO activation and the eosinophilia myalgia syndrome EMS as a platform for intensive discussion for the participants In these proceedings many contributions are multidisciplinary and have practical or theoretical implications for different research fields Hence we have organized this volume in nine main chapters according to basic disciplines and subjects We are aware that this classification is artificial but we hope that it is the best compromise for contributors and readers

Categorification and Higher Representation Theory Anna Beliakova, Aaron D. Lauda, 2017-02-21 The emergent mathematical philosophy of categorification is reshaping our view of modern mathematics by uncovering a hidden layer of structure in mathematics revealing richer and more robust structures capable of describing more complex phenomena Categorified representation theory or higher representation theory aims to understand a new level of structure present in representation theory Rather than studying actions of algebras on vector spaces where algebra elements act by linear endomorphisms of the vector space higher representation theory describes the structure present when algebras act on categories with algebra elements acting by functors The new level of structure in higher representation theory arises by studying the natural transformations between functors This enhanced perspective brings into play a powerful new set of tools that deepens our understanding of traditional representation theory This volume exhibits some of the current trends in higher representation theory and the diverse techniques that are being employed in this field with the aim of showcasing the many applications of higher representation theory The companion volume Contemporary Mathematics Volume 684 is devoted to categorification in geometry topology and physics

Distributed Computing and Internet Technology Goutam Chakraborty, 2005-12-09 The opening ceremony and pre conference tutorials on various related topics were held on December 21 The technical program started on December 22 and continued for three days The program was arranged in single track so as to enable participants to attend sessions of different tracks Papers from the DM IT SE and SS tracks were divided into two sessions whereas DC track sessions were held on the first two days of the conference The program also included two plenary talks The first talk was delivered by S S Iyengar from Louisiana State University USA The second talk was delivered by He Jifeng from the International Institute for Software Technology IIST Macau Prof Iyengar's talk on The Distributed Sensor Networks An Emerging Technology was focused on new ideas about the use of distributed systems for emerging technology while Prof Jifeng's talk on Linking Theories of Concurrency by Retraction dealt with semantics of concurrency All the conference committee members contributed towards the success of ICDCIT 2005 And it was a pleasant experience for me to work with

them The one name that sticks out is R K Ghosh Steering Committee Chair He really steered the group with his past experience as Program Chair of ICDCIT 2004
