In the book, Dr. Brandeis Hill Marshall discusses how the philosophy of "move fast and break things" is itself broken and requires change. You'll learn about the ways that discrimination rears its ugly head in the digital data space and how to address them with several known algorithms, including social network analysis and linear regression. A can't miss resource for junior-level to senior-level software developers who have gotten their hands dirty with at least a handful of significant software development projects. *Data Conscience* also provides readers with discussions of the importance of transparency, explorations of computational thinking in practice, strategies for encouraging accountability in tech, ways to avoid double-edged data visualization schemes, and schemes for governing data structures with law and algorithms. **99 Ways to Lead & Succeed** Lynn Bush, Howard Bultinck, 2013-10-18 Veteran educators Howard J.
