Resilience and Governance José J. Pascual-Fernández, Cristina Pita, Maarten Bavinck, 2020-04-28 This book offers a comprehensive account of the status and dynamics of people participating in the small scale fisheries SSF of Europe It covers the situation of SSF in 25 coastal countries thereby providing a portrait of almost every coastal country on the continent and analyzing the recent evolution of the sector Small scale fisheries are argued to be extremely important in Europe as they provide employment and welfare while increasing food sovereignty and maintaining communities in coastal areas The recent worldwide focus on SSF derives from their environmental sustainability which distinguishes many of their activities from

those of large scale fisheries This book analyses the diversity of SSF and shows how fishing communities have sometimes developed successful governing models demonstrating social and economic resilience While the book emphasizes the strengths of SSF and the synergies that occur with other marine sectors it also presents cases of failure in which collective action and policy have actually contributed to a weakening of the sector In this context the book shows how governmental policies toward SSF vary considerably from country to country in a way that is not entirely consistent with European policies

Blue Justice Svein Jentoft,Ratana Chuenpagdee,Alicia Bugeja Said,Moenieba Isaacs,2022-03-07 For small scale fisheries around the world the Blue Growth and Blue Economy initiatives may provide sustainable development but only insofar as they align with the global consensus enshrined in the Voluntary Guidelines for Securing Sustainable Small Scale Fisheries in

the context of Food Security and Poverty Eradication If states do nothing to fulfill the promises they made when they endorsed these guidelines in 2014 the Blue Economy will come at a loss for small scale fisheries and further their marginalization in the ocean economy Under the umbrella of Blue Justice this book demonstrates that these risks are real and must be considered as states implement their sustainable ocean development plans These are human rights issues which are embedded into governance principles and institutions and which make a difference for small scale fisheries people in their daily lives In stressing the importance of policies and institutions that build on the experiences of small scale fisheries people in the contexts in which they operate this book draws on case studies of small scale fisheries from countries on all continents to clarify what Blue Justice entails for small scale fisheries and make suggestions for real change Through the Blue Justice paradigm this book flags the relevance of recognizing the potential impact that different factors including the Blue Economy approach could bring to fishing communities their livelihoods cultural traditions and other potential multidimensional conflicts Vulnerability in fishing communities can increase and inequalities can be reinforced at different levels if individuals and community capabilities are not strengthened A first of its kind not to be missed this book is informative purposeful and pertinent in an era of change Silvia Salas CINVESTAV Marine Resources Department Mrida Mexico The studies reveal that Blue Justice is a governability issue which requires establishing right institutions that are transdisciplinary integrated participatory and holistic It is implicit from these writings that the SSF Guidelines and Blue Growth initiatives do not form two different discourses and that the implementation of the former would resolve many of the justice issues caused by the latter in favor of small scale fisheries and their communities Oscar Amarasinghe Professor Chancellor Ocean University of Sri Lanka and President Sri Lanka Forum for Small Scale Fisheries SLFSSF

The Contribution of International Fisheries Law to Human Development Nienke Van Der Brugt, 2012-11-01

The Contribution of International Fisheries Law to Human Development An Analysis of Multilateral and ACP EU Fisheries Instruments examines whether and how legal fisheries instruments encompass a normative consensus on human development Focusing on both multilateral treaties and soft law as well as the ACP EU bilateral fisheries instruments Nienke van der Burgt provides a detailed analysis as to whether these different types of legal instruments reflect the principles of equity poverty eradication and participation which have been identified as key indicators of human development Moreover specific attention is paid to whether explicit reference is made to the small scale fisheries sector and to the role of women Concluding that despite increasing evidence of the potential and significant contribution of fisheries towards human development legal fisheries instruments seem to be struggling with the incorporation of a human development centred approach The Contribution of International Fisheries Law to Human Development is essential reading for all those involved in the fields of international environmental law and sustainable human development
