Farris, Alberto Toscano, Svenja Bromberg, 2021-11-17 The past decade has witnessed a resurgence of interest in Marxism both within and without the academy Marxian frameworks concepts and categories continue to be narratively relevant to the features and events of contemporary capitalism Most crucially an attention to shifting cultural conditions has lead contemporary researchers to re confront some classical and essential Marxist concepts as well as elaborating new critical frameworks for the analysis of capitalism today The SAGE Handbook of Marxism showcases this cutting edge of today s Marxism It advances the debate with essays that rigorously map and renew the concepts that have provided the groundwork and main currents for Marxist theory and showcases interventions that set the agenda for Marxist research in the 21st century A rigorous and challenging collection of scholarship this book contains a stunning range of contributions from contemporary academics writers and theorists from around the world and across disciplines invaluable to scholars and graduate students alike Part 1 Reworking the critique of political economy Part 2 Forms of domination subjects of struggle Part 3 Political perspectives Part 4 Philosophical dimensions Part 5 Land and existence Part 6 Domains Part 7 Inquiries and debates Recharting the History of Economic Thought Kevin Deane, Elisa van Waeyenberge, 2020-04-08 This ground breaking new textbook takes a thematic approach to the history of economic thought introducing current economic issues and examining the relevant arguments of key economists By taking this innovative approach the book sets these pivotal ideas in a contemporary context helping readers to engage with the material and see the applications to today s society and economy Based on courses developed by the authors the text introduces a range of perspectives and encourages critical reflection upon neoclassical economics Through exposure to a broader spectrum of sometimes conflicting propositions readers are able to evaluate the strengths weaknesses and relevance of different economic theories Recharting the History of Economic Thought is an invaluable companion for those taking courses in the History of Economic Thought the Development of Economic Ideas Developing Economic Thinking or Economic Thought and Policy It will also appeal to anyone looking for an introduction to pluralist approaches to economics A Biographical Dictionary of Dissenting Economists Philip Arestis, Malcolm C. Sawyer, 2001-01-01 Annotation **Towards a New Understanding of Sraffa** Scott Carter, 2014-10-22 This book provides fresh insights on Piero Sraffa s work by examining previously unpublished papers from Sraffa archives It offers new perspectives on the connection between Sraffa and Marx

and examines Sraffa's approach to money the role of equilibrium and of the surplus in economic theory **Economic Philosophy** Adelino Zanini, 2008 The book investigates the relationship between the economic and political writings of four seminal authors Adam Smith Karl Marx Joseph A Schumpeter and John M Keynes It underlines how in their works the nexus between ethics economics and politics has produced four exemplary solutions They represent the most relevant modern formulations of the idea of political interest to which the philosophical and political debate constantly returns as the thought of Carl Schmitt Hannah Arendt and Michel Foucault demonstrates The author discusses the different interpretations by considering economic science not as a natural but as moral and political science *Samuelsonian Economics and the Twenty-First Century* Michael Szenberg, Lall Ramrattan, Aron A. Gottesman, 2006-08-24 The underlying notion in this volume is to spotlight critically assess and illuminate Paul A Samuelson's extraordinarily voluminous diverse and groundbreaking contributions that encompass the entire field of economics through the lens of most eminent scholars All this in honor of his ninetieth birthday celebrated on May 15 2005 in Fairmont Hotel in Boston in the company of hundreds of scholars and their spouses Pref The Reading of Theoretical Texts Peter Ekegren, 2002-01-04 Since the structuralist debates of the 1970s the field of textual analysis has largely remained the preserve of literary theorists Social scientists while accepting that observation is theory laden have tended to take the meaning of texts as given and to explain differences of interpretation either in terms of ignorance or bias In this important contribution to methodological debate Peter Ekegren uses developments within literary criticism philosophy and critical theory to reclaim this study for the social sciences and to illuminate the ways in which different readings of a single text are created and defended *Marx Worldwide* Jan Hoff, 2016-11-21 In his study Jan Hoff charts the unprecedented global boost that has been experienced by critical Marxism since the mid 1960s In particular Hoff shows the development of interpretations of Marx's method of critical social theory oriented towards Marx's critique of political economy and of significant disputes concerning the different versions and iterations of the critical project that ultimately culminated in Capital His book investigates the globalisation of Marx debates the complex network of international theoretical approaches that have been devised between the poles of science and politics the transfer of theory and the historical development of schools of thought beyond national and linguistic borders Marx Worldwide provides an overview of Marx reception in various regions of the world in which the extra European process of theory formation receives particular attention and it shows how despite the supersession of Marxism in the sense of an all encompassing worldview the Marxian aim of providing an explication of the internal connection of economic categories and relations and thereby of accomplishing the de mystification of the deranged world of the economy is as relevant and as theoretically important as it has ever been First published in German by Akademie Verlag as Marx Global Zur Entwicklung des internationalen Marx Diskurses seit 1965 Berlin 2009 *Politics and Philosophy in the Thought of Destutt de Tracy* Brian W. Head, 2019-11-21 First published in 1987 This study describes and analyses the published writings of the French

philosopher Antoine Destutt de Tracy The author focuses on the three decades from the calling of the États généraux to the early years of the Restoration the period of Tracy's entire literary production and the period of his greatest influence and reputation This title will be of great interest to students of history philosophy and politics Pluralist Readings in Economics: Key Concepts and Policy Tools for the 21st Century Maria Alejandra Madi, 2017-06-15 The era of globalization has brought about unprecedented social political and environmental challenges for policy makers around the world due to the global impact of economic decisions In view of these challenges economics as a discipline needs to be taught with the goal of broadening the dialogue on social responsibility and developing a new pluralist culture of decision making which is inclusive to different schools of economic thought Pluralist Readings in Economics Key concepts and policy tools for the 21st century highlights the long standing debates regarding economic systems business models criteria of justice and economic policies by providing conceptual openings to economic theory in an engaging and accessible way The author provides broad coverage of relevant topics through the selection of influential economic thinkers and introduces the reader to their ideas context and relevant interpretations While dealing with complex problems the author goes beyond commonly known concepts by presenting questions on the historical context of globalization The study of economic concepts in this way leads to asking new questions concerning various issues relevant to economics The goal of the text is to provide an interdisciplinary perspective to readers in order to equip them with information that is key to address global economic challenges Thus this pluralist approach calls for a reflection of the evolution of global social and economic conditions to demonstrate problem solving approaches that align with the goal of addressing these challenges Pluralist Readings in Economics Key concepts and policy tools for the 21st century is suitable to a broad interdisciplinary readership as it will benefit all those who seek to better understand the complex stakes of the capitalist system in the tensions between regulatory policies free market equilibria and participatory openings in governance This introductory work also prepares the reader for debates and discussion in economic theory aimed at shaping policy transformations towards a more equitable just and sustainable world

History of Economic Thought Isaac Ilyich Rubin, 1987-01-01 This is an important and unparalleled work which situated Marx's economic theory in relation to the economic theories that predate him from mercantilism to John Stuart Mill First published in 1929 the book dates from the fertile period of Marxist economic theory that produced the works of Preobrazhensky Kondratiev and Bukharin However as a review of pre Marxist economics it stands out from the many books which dwell only on the contemporary industrialisation debates This is a selective reading of economic thought offering analysis of those elements in past economics that accord with the areas of interest to Marxism Each section gives a brief analysis of a specific school of thought with particular attention to the social and ideological climate within which it evolved The book differs from orthodox accounts in not merely mentioning historical background but using it as a central explanation of the evolution of economic theories As a counterpoint to Rubin Catherine Colliot Thelene has written a daring essay which locates a crucial flaw in the logical structure of Marx's Capital

Handbook of the History of Economic Thought Jürgen Backhaus, 2011-11-12 This reader in the history of economic thought challenges the assumption that today's prevailing economic theories are always the most appropriate ones As Leland Yeager has pointed out unlike the scientists of the natural sciences economists provide their ideas largely to politicians and political appointees who have rather different incentives that might prevent them from choosing the best economic theory In this book the life and work of each of the founders of economics is examined by the best available expert on that founding figure These contributors present rather novel and certainly not mainstream interpretations of the founders of modern economics The primary theme concerns the development of economic thought as this emerged in the various continental traditions including the Islamic tradition These continental traditions differed substantially both substantively and methodologically from the Anglo Saxon orientation that has been dominant in the last century for example in the study of public finance or the very construct of the state itself This book maps the various channels of continental economics particularly from the late 18th through the early 20th centuries explaining and demonstrating the underlying unity amid the surface diversity In particular the book emphasizes the writings of John Stuart Mill his predecessor David Ricardo and his follower Jeremy Bentham the theory of Marginalism by von Thünen Cournot and Gossen the legacy of Karl Marx the innovations in developmental economics by Friedrich List the economic and monetary contributions and struggle of escape

by John Maynard Keynes the formidable theory in public finance and economics by Joseph Schumpeter a reinterpretation of Alfred Marshall L. on Walras Heinrich von Stackelberg Knut Wicksell Werner Sombart and Friedrich August von Hayek are each dealt with in their own right
