Genevieve Baudoin, 2015-04-17 *Interpreting Site* explains the basic methods architects use to translate what you perceive to represent the complex conditions that physically and mentally construe a site helping to shape the ultimate design. Within each of the four themes defining site: experiencing site, spatializing site, and systematizing site, theoretical, conceptual, and analytic methods and representational tools are introduced to give you a foundation to develop your own approach to the conditions of a site. Author Genevieve S. Baudoin examines longstanding representation methods in relation to emerging and experimental methods, offering an idiosyncratic and provocative look at different approaches. Four highly illustrated, full-colour case studies of key contemporary projects in Spain, the United States, the United Kingdom, and Norway demonstrate how architects have used conditions discovered on a site in their final design.
