Strategies to play the lottery.** Félix González, It is worth mentioning that when my publisher presented me with this project I did not hesitate for a moment Almost as if it were a Disney movie a memory from my youth came to mind You see my father always told me that if every person gave him a coin he would be a millionaire And that is the basis of lottery games that each person participates with a small amount that accumulates until it becomes a millionaire As I

was telling you when I was young I tested that idea and together with my father we played the lottery week after week until one day we won a considerable prize not the biggest prize but a good prize After a while I entered my higher education and stopped this ritual with my father I dedicated myself fully to my studies in mathematics among which I focused my attention to Game Theory which roughly speaking looks for strategies to win games from a mathematical point of view Going back to my anecdote when I was young I didn t use any strategy to win we just came up with numbers and wrote them down on the

ticket so when my editor presented me with this project I didn't hesitate and immediately a huge number of ideas came to my mind to win money with the lottery game. It is important to mention that although what I present has a theoretical basis each of the strategies that I present were carried out in a real way entering lottery tickets week by week for each of the strategies that we will see in this text.
