

DEMOGRAPHIC TRANSITION MODEL

The demographic transition model portrays how a country moves from high birth and death rates to low birth and death rates as it becomes increasingly industrialized.

STAGE 1

High Fluctuating

The first stage consists of high birth and death rates. At this stage, the population is stable or grows quite slowly because the number of births and deaths are almost equal.

STAGE 2

Early Expanding

In the second stage, there is a sharp decline in death rates, causing the population to grow rapidly.

STAGE 3

Late Expanding

The third stage sees the birth rate fall, which slows down population growth.

STAGE 4

Low Fluctuating

In the fourth stage, both the birth and death rates are low, resulting in a falling and then stable population.

STAGE 5

Declining

The fifth and final stage shows little population change, although it is somewhat ambiguous.

debate about the future of democracy in post authoritarian societies is increasingly tied to the strength of civil society A

strong civil society is thought to be crucial to the emergence of successful democracies while a weak civil society is deemed the cause of flawed or frozen democracies Using contrasting evidence from Spain and Brazil this study challenges these widespread assumptions about contemporary democratization It argues that it is the performance of political institutions rather than the configuration of civil society that determines the consolidation of democratic regimes *The Routledge Handbook of Nonprofit Communication* Gisela Gonçalves, Evandro Oliveira, 2022-10-12 This handbook brings together multidisciplinary and internationally diverse contributors to provide an overview of theory research and practice in the nonprofit and nongovernmental organization NGO communication field It is structured in four main parts the first introduces metatheoretical and multidisciplinary approaches to the nonprofit sector the second offers distinctive structural approaches to communication and their models of reputation marketing and communication management the third focuses on nonprofit organizations strategic communications strategies and discourses and the fourth assembles campaigns and case studies of different areas of practice causes and geographies The handbook is essential reading for scholars educators and advanced students in nonprofit and NGO communication within public relations and strategic communication organizational communication sociology management economics marketing and political science as well as a useful reference for leaders and communication professionals in the nonprofit sector *The Handbook of Social Capital* Dario Castiglione, Jan W. van Deth, Guglielmo Wolleb, 2008-04-17 Social capital is a relatively new concept in the social sciences In the last twenty or so years it has come to indicate that networks of social relationships represent a resource for both the individual and society since they provide support for the individual and facilitate collective action Although this is not an entirely new idea the more systematic way in which social capital captures such an intuition has created a new theoretical paradigm and helped to develop a series of innovative research programmes in politics economics and the study of human well being The concept has gained currency beyond academia extending its influence to political and policy making circles at local national and international levels It has also affected the way in which social surveys are conceived and public policies assessed As the idea of social capital has spread the literature about it has increased exponentially After twenty years of rapid expansion it is time for a more considered and critical assessment of how the original concept has been adapted and refined and how successful its application has been The Handbook of Social Capital intends to do precisely that It offers a state of the art view of discussions about the concept of social capital and the way in which it has been applied in empirical research The organization of the Handbook reflects this intention by focusing on conceptual development and analysis in the first part by identifying two main areas of research in which social capital has favoured the development of new and influential research programmes political participation in democratic societies and economic development and by exploring the more normative and policy oriented consequences of social capital All chapters comprising the volume were specifically written for the Handbook by some of the main experts in the fields The book provides authoritative and innovative introduction to the study
