21st Century Guitar Richard Perks, John McGrath, 2023-01-12 In the 21st Century the guitar as both a material object and tool for artistic expression continues to be reimagined and reinvented From simple adaptations or modifications made by performers themselves to custom made instruments commissioned to fulfil specific functions to the mass production of new lines of commercially available instruments the extant and emergent forms of this much loved musical instrument vary perhaps more than ever before As guitars sporting multiple necks a greater number of strings and additional frets become increasingly common so too do those with reduced registers fewer strings and fretless fingerboards Furthermore as we approach the mark of the first quarter century the role of technology in relation to the guitar's protean nature is proving key from the use of external effects units to synergies with computers and AR headsets Such wide ranging evolutions and augmentations of the guitar reflect the advancing creative and expressive needs of the modern guitarist and offer myriad new affordances *21st Century Guitar* examines the diverse physical manifestations of the guitar across the modern performative landscape through a series of essays and interviews Academics performers and dual practitioners provide significant insights into the rich array of guitar based performance practices emerging and thriving in this century inviting a reassessment of the guitar's identity physicality and sound creating possibilities

Echo and Reverb Peter Doyle, 2024-08-06 Winner of the Association for Recorded Sound Collections ARSC Award for Excellence in Historical Recorded Sound Research 2006 *Echo and Reverb* is the first history of acoustically imagined space in popular music recording The book documents how acoustic effects reverberation room ambience and echo have been used in recordings since the 1920s to create virtual sonic architectures and landscapes Author Peter Doyle traces the development of these acoustically created worlds from the ancient Greek myth of Echo and Narcissus to the dramatic acoustic architectures of the medieval cathedral the grand concert halls of the 19th century and those created by the humble parlor phonograph of the early 20th century and finally the revolutionary age of rock n roll Citing recordings ranging from Gene Austin's *My Blue Heaven* to Elvis Presley's *Mystery Train* Doyle illustrates how non musical

sound constructs with all their rich and contradictory baggage became a central feature of recorded music The book traces various imagined worlds created with synthetic echo and reverb the heroic landscapes of the cowboy west the twilight shores of south sea islands the uncanny alleys of dark cityscapes the weird mindspaces of horror movies the private and collective spaces of teen experience and the funky juke joints of the mind
