Situated Utterances:

Situated Utterances Harry Berger, 2005 In *Situated Utterances* Berger designs an analytical model of New Criticism shows how it was dismantled after the Second World War and demonstrates practice in studies of specific works The scope of the practice is broadened to the connection between cultural representations and institutional change Plato's dialogues are also covered

Approaching Dialogue Per Linell, 1998 *Approaching Dialogue* has its primary focus on the theoretical understanding and empirical analysis of talk in interaction It deals with conversation in general as well as talk within institutions against a backdrop of Conversation Analysis context based discourse analysis social pragmatics socio cultural theory and interdisciplinary dialogue analysis People's communicative projects and the structures and functions of talk in interaction are analyzed from the most local sequences to the comprehensive communicative activity types and genres A second aim of the book is to explore the possibilities and limitations of dialogism as a general epistemology for cognition and communication On this point it portrays the dialogical approach as a major alternative to the mainstream theories of cognition as individually based information processing communication as information transfer and language as a code Stressing aspects of interaction joint construction and cultural embeddedness and drawing upon extensive theoretical and empirical research carried out in different traditions this book aims at an integrating synthesis It is largely interdisciplinary in nature and has been written in such a way that it can be used at advanced undergraduate courses in linguistics

sociopragmatics of language communication studies sociology social psychology and cognitive science About the author Per Linell holds a Ph D in linguistics and has been professor within the interdisciplinary graduate program of Communication Studies at the University of Linköping Sweden since 1981 He has published widely in the fields of discourse studies and social pragmatics of language

Handbook of Methods in Cultural Anthropology H. Russell Bernard, Clarence C. Gravlee, 2014-07-08 The *Handbook of Methods in Cultural Anthropology* now in its second edition maintains a strong benchmark for understanding the scope of contemporary anthropological field methods Avoiding divisive debates over science and humanism the contributors draw upon both traditions to explore fieldwork in practice The second edition also reflects major developments of the past decade including the rising prominence of mixed methods the emergence of new technologies and evolving views on ethnographic writing Spanning the chain of research from designing a project through methods of data collection and interpretive analysis the *Handbook* features new chapters on ethnography of online communities social survey research and network and geospatial analysis Considered discussion of ethics epistemology and the presentation of research results to diverse audiences round out the volume The result is an essential guide for all scholars professionals and advanced students
