*Mathematical Modelling for Sustainable Development* Marion Hersch, 2006-01-02 Many people are convinced that Sustainable Development and Mathematics are completely unrelated Sustainable Development in its role of a value laden imperative for polluting and over consuming societies seems to be totally unconnected to mathematical reasoning and ignorant of the values behind its symbols Still they are not only connected they need each other Mathematics needs Sustainable Development When science was gradually reinvented in European medieval societies it was legitimised as contributing to the disclosure of God s divine creation The conflicts that emerged became well known as a result of the clash between Galileo and the Church Science found a new legitimacy through recognition that it was a powerful force against superstition In the Enlightenment the argument was pushed forward by attributing Progress to the advancement of science science could produce a better world by promoting rationality In our modern society science has become intimately linked to technology Science for its own sake unfortunately rarely has positive outcomes in terms of research grant applications Meanwhile science and technology and the progress they are supposed to produce meet with wide scale scepticism We all know of the current global problems climate change resource depletion a thinning ozone layer space debris declining biodiversity malnutrition dying ecosystems global inequity and the risk of unprecedented nuclear wars Science has to engage with these problems or lose its legitimacy

**Good-Bye Hegemony!** Simon Reich, Richard Ned Lebow, 2014-03-23 Many policymakers

journalists and scholars insist that U S hegemony is essential for warding off global chaos Good Bye Hegemony argues that hegemony is a fiction propagated to support a large defense establishment justify American claims to world leadership and buttress the self esteem of voters It is also contrary to American interests and the global order Simon Reich and Richard Ned Lebow argue that hegemony should instead find expression in agenda setting economic custodianship and the sponsorship of global initiatives Today these functions are diffused through the system with European countries China and lesser powers making important contributions In contrast the United States has often been a source of political and economic instability Rejecting the focus on power common to American realists and liberals the authors offer a novel analysis of influence In the process they differentiate influence from power and power from material resources Their analysis shows why the United States the greatest power the world has ever seen is increasingly incapable of translating its power into influence Reich and Lebow use their analysis to formulate a more realistic place for America in world affairs Non-Proliferation Export

Conceptual and Contextual Perspectives on the Modern Law of Treaties Michael J. Bowman,Dino Kritsiotis,2018-10-31 In recent years there has been a flourishing body of work on the Law of Treaties crucial for all fields within international law However scholarship on modern treaty law falls into two distinct strands which have not previously been effectively synthesized One concerns the investigation of concepts which are fundamental to or inherent in the law of treaties generally such as consent object and purpose breach of obligation and provisional application while the other focuses upon the application of treaties and of treaty law in particular substantive e g human rights international humanitarian law investment protection environmental regulation or institutional contexts including the Security Council the World Health Organization the International Labour Organization and the World Trade Organization This volume represents the culmination of a series of collaborative explorations by leading experts into the operation development and effectiveness of the modern law of treaties as viewed through these contrasting perspectives *The Treaty on Conventional Armed Forces in Europe* Mark Wilcox,2024-03-04 This work examines the CFE Treaty as a factor in Russia s foreign and security policy Moscow showed amazing persistence in their relationship with the cornerstone of European security Their approach to the treaty was a

genuine attempt to shape the security environment in Europe and the former USSR The treaty also enabled the dismantling of large conventional forces as they returned from Eastern Europe and transitioned into the armies of the newly independent states of the former USSR The CFE Treaty though proved ineffective at constraining the enlargement of NATO Simultaneously Moscow's foreign and security policy evolved from one that focused on the domestic development of the country to that of a more confident state reasserting itself as a great power Drawing extensively on primary sources and analyses by Russian authors this book employs two historical narratives case studies and a conceptual framework to show that while Moscow remained engaged with the CFE Treaty undesired effects on Russia's national interests gradually accrued at the expense of desired ones leading Vladimir Putin to withdraw Russia from the treaty as an act of decoupling from the collective West This book is relevant to scholars and policymakers who want to understand Russia's approach to arms control as an element of military security
