Classic Shrewd Challenges Terry H. Stickels,2005 **Free Will** Nicholas Rescher,2017-07-05 This volume is a reassessment of free will and as such seeks to answer the question Do humans ever act under the guidance of the

will To determine if humans have free will Rescher first examines what exactly free will is and how it should function While the literature on the subject of free will is vast a good deal still remains to be done to avert obscurity and confusion Rescher leads the reader through a conceptual web of distinctions that taken together provide a satisfying contribution to philosophical thought on free will in general Rescher sharpens his highly conceptual assessment by making distinctions between productive or metaphysical and moral or motivational freedom free decision and free action motivational and causal determination of choices durational events and the instantaneous eventuations that mark their commencements and completions and between pre determination and precedence determination In doing so he also examines the role of nature nurture and free choice Each of these distinctions defines the characteristics of free will and averts a group of problems and difficulties traditionally ascribed to the doctrine With these in place it becomes possible to validate the compatibility between freedom of the will and a certain special mode of determinism Rescher s conceptual perspective in this age old debate opens up the prospect of naturalizing free volition through its natural emergence via the same process of evoking development that has seen the emergence of intelligence on the world s stage That is only after the conceptual issues are settled can the question of how things actually stand be answered This work will be an important reassessment of free will not just because of the author s final conclusion but because of the issue illuminating path he takes to get there

frames and bases in tensor product of hilbert spaces arxiv org - May 02 2023

web since tensor product is use ful in approximation theory in this article we consider the frames in tensor product of hilbert spaces and extend some of the known results about bases to frames let h be a separable complex hilbert space as usual we denote the set of all bounded linear operators on h by $B(h)$

tensor product dual frames journal of inequalities and - Jun 03 2023

web mar 27 2019 abstract to construct dual frames with good structure for a given frame is a fundamental problem in the theory of frames the tensor product duals of tensor product frames can provide a rank one decomposition of bounded antilinear operators between two hilbert spaces this paper addresses tensor product dual frames

the tensor product of frames springerlink - Sep 06 2023

web jan 1 2008 abstract in this paper we prove that the tensor product of two sequences is a frame riesz basis if and only if each part of this product is a frame riesz basis using this result we extend some density and sampling theorems to higher dimensions
