SOM, 2009-11-17 Skidmore Owings Merrill founded in 1936 is one of the largest and most influential architecture firms in the world SOM has long been known for innovation experimentation design excellence and technical mastery for an abiding interest in the contributions that buildings can make to the life of cities and for a collaborative approach that extends to all aspects of the design and construction processes This volume which presents work from the 1970s and early 1980s reproduces a monograph first published in 1983 SOM's growth as a large architectural firm began almost fifty years ago By 1981 there were nine offices in the United States with a total of more than 2 100 members The decade 1973 1983 brought retirement to a number of well known founding partners Nevertheless SOM's reputation for design leadership has been maintained through creative dissidence as one of the younger partners describes it The firm moves with distinction into a third and fourth generation This book organized by region reveals the firm's architectural response to a decade that greatly changed American society The firm's work of the past decade belonged to the city and especially the urban office tower Architectural restraints new technology and programs created opportunity for a new generation of distinctive towers that have become important additions to the skylines of major American cities The tall building has evolved to new purposes and the result has been expanding variations on tower architecture The late Chicago partner Fazlur Khan who led the way by creating the flexible economical tube structure was enthusiastic about the tall

building claiming it permits work and residential space to locate where and when most needed The tall building for him was a remarkable economical and symbolic success which also performed an admirable social service The decade was also defined by wide public interest in preservation of historic buildings and contexts To this movement SOM's designers did not react with historical quotation or eclectic reference but rather by accepting the contextual obligation as part of their more urgent quest for a strong architecture that is both modern and compatible with its setting SOM addressed important urban problems with seminal studies for San Antonio Chicago and Washington as well as with designs for large urban transportation facilities on the East Coast At the same time the firm sought work abroad in the face of a barren domestic economy designing universities new towns airport terminals and commercial buildings on several continents Whereas regret surrounds plans for Iranian cities halted by political revolt planning projects of this kind introduced the firm's teams to social urgency and primary research into indigenous form The energy crisis brought still other challenges Its special requirements created new architectural opportunities that have been demonstrated by buildings in a variety of locations SOM early recognized the potential of computer analysis and pioneered its adoption in dealing with structural and architectural problems This capability dramatically extended SOM's capacity for the creative study of energy efficiency and performance calculations

SOM Architecture of Skidmore, Owings & Merrill, 1963-1973 Skidmore, Owings & Merrill, 1974 **SOM; Architecture of Skidmore, Owings & Merrill, 1984-1994** Stephen Dobney, 1995 **Skidmore, Owings & Merrill: Retail and office projects designed by SOM** Skidmore, Owings & Merrill, 1973 **Skidmore, Owings & Merrill** Skidmore, Owings & Merrill, 1995 THE MASTER ARCHITECT SERIES is a series of monographs on some of the greatest architects and architectural firms of our time Each monograph will contain 256 pages displaying several hundred color photographs drawings sketches and renderings Although primarily a pictorial essay the books will contain selected projects described in concise detail along with a critique or overview of the firm a resume of the partners and a comprehensive bibliography **Skidmore, Owings and Merrill** Nicholas Adams, 2006 **SOM Structural Engineering** Christian Schittich, 2015-06 This volume presents the theoretical background underpinning SOM's structural group and addresses the question of How high can you go as well as issues of efficiency and economy On the basis of a variety of projects from the James Turrell Skyspace to Burj Khalifa it considers how to find new structural solutions as well as how materials can be used innovatively to create next generation buildings *SOM*, 2009-11-17 Skidmore Owings the middle of the century to collaborations with legendary patrons such as Lever Brothers John Hancock Sears Roebuck and Yale University and the later years to charting a course for architecture at a time when modernism was beginning to embrace contextualism and local cultures In the years 1984-1996 SOM continued to develop the skills for which it had become known high standards of design imaginative structural solutions exceptional detailing city making on a grand scale expertise in managing large and complex sites and also addressed new areas of design and practice A contextual modernism one attentive to climate topography and

the regional vernacular a focus on restoration and reuse and an expansion of international work came to the fore in a time of great social and economic change In his introduction Detlef Mertins traces the firm s history in parallel with this restructuring a growth in real estate development and financial markets that fundamentally changed how buildings were commissioned and built Rows Wharf in Boston the USG and AT T Buildings in Chicago and Worldwide Plaza and the Islamic Cultural Center in New York are among the buildings that represent the firm s contextualism and inventive interpretation of historic precedents At the same time Exchange House in London demonstrates SOM s continued commitment to modernism and technological expression Many projects such as Enerplex in Plainsboro New Jersey and the Pacific Bell Administrative Complex in San Ramon California broke new ground in strategies for long term energy conservation Among the firm s important restorations of this era are the Civic Opera House in Chicago and the U S Court of Appeals in San Francisco as well as a series of historic train stations along the Northeast Corridor International works the National Commercial Bank in Saudi Arabia Ayala Tower One Philippine Stock Exchange the Hong Kong Convention and Exhibition Center and especially Canary Wharf in London an entire district based on a new model of urban planning demonstrate SOM s coordinated expertise in planning transportation and civil engineering and landscape design in an era of globalization Finally the most recent works especially the landmark Jin Mao Tower in China point the way to SOM s work of the twenty first century diverse contextual urbane and populist
