The significant changes that have dominated the social and the scientific world over the last thirty years have brought about upheavals and critical re appraisals that have proved quite positive in fostering 21st century thought This interdisciplinary collection of state of the art essays offers innovative and thought provoking insights concerning contemporary philosophical and cultural reflection on the nature culture interaction Starting from the assumption that the binary opposition between the two terms has been replaced by a continuum of the two the volume explores both the terms of this new interaction and its implications Technology occupies a central place in the shift towards a nature cultural continuum but it is not the only factor The consequences of economic globalization notably the global spread of digital mediation also account for this change of perspective Last but not least the climate change issue and a renewed urgency around the state of the environmental crisis also contribute to bring the natural much closer to home Digital mediation has by now become a standard way to live and interact The electronic frontier has altered dramatically the practice of education and research especially in the Humanities and social sciences with direct consequences for the institutional practice and the methodology of these disciplinary fields This book aims to explore the implications of these complex shifts for the practice of critical thinking The Purposive Self and the Dreaming Mind Frank Faranda,2009-09

The Self and the Dream will be explored as they intersect along the axis of an inherent developmental purpose within the psyche This function of purpose manifests as a series of processes that move the personality toward integration psychological healing and ongoing development Psychoanalytic theory of the self will be reviewed to bring into relief these purposive processes in relation to other aspects of self Psychoanalytic dream theory will be studied beginning with Freud s model and continuing to the present in order to uncover the ways in which the dream manifests as a function of these purposive processes Through these explorations Jungian ideas on the self and the dream will be interwoven to illuminate further the theoretical and experiential foundations for building a model of a purposive self

Jungian and Interdisciplinary Analyses of Emotions Elizabeth Brodersen, Isabelle Meier, Valeria Céspedes Musso, 2025-04-09 This comprehensive collection of chapters concentrates on the multifaceted theme of emotions and deepens our understanding of the role emotions play within the psyche. Leading international psychoanalysts and academics offer broad interdisciplinary dimensions using their own unique perspectives on the topic of emotions. Delineating into five parts, this volume focuses on key themes such as emotions, imagination, and method; the emotional basis of archetypes and complexes; relational trauma; mapping contagion across cultures; the contribution from neuroscience; and finally, dreams and the transcendent. Clinical cases presented underline the important role unconscious disassociated emotions play in the formation of symptomatology and how wholeness is facilitated through their acceptance. This collection offers a timely contribution to the interdisciplinary study of emotions, placing Jungian psychology firmly within that framework. It will be of great interest to Jungian analysts, trainees, and psychotherapists, as well as interdisciplinary academic researchers interested in methodology, unconscious processes, transference, and dreams.
