Criminal Justice in Hong Kong Carol Jones,Jon Vagg,2017-09-29 Containing a wealth of archival material and statistical data on crime and criminal justice Criminal Justice in Hong Kong presents a detailed evaluation of Hong Kong s criminal justice system both past and present Exploring the justice system and the perceptions of popular culture this book demonstrates how the current criminal justice system has been influenced and shaped over time by Hong Kong s historical position between East and West Jones and Vagg s examination of the justice system not only takes into account geographical changes like the erection of the border with

communist China in 1950 but also insists that any deep understanding of the current system requires a dialogue with the rich and complex narratives of Hong Kong's history. It explores a range of questions including: How were Hong Kong's criminal justice institutions and practices formed? What has been its experience of law and order? How has Hong Kong's status as between East and West affected its social, political, and legal institutions? Careful and detailed analysis of one of the most economically successful, politically stable, and safe yet frequently misrepresented cities is a valuable addition to the bookshelves of all undergraduate and postgraduate students studying Asian law. Between Resistance and Martyrdom Detlef Garbe, 2008 Privatization: the transfer of responsibility for public services from the public to the private sector currently evokes intense interest from policy makers. To its advocates, privatization conjures up visions of a lean, streamlined public sector reliant upon the private marketplace for the delivery of public services. To opponents, it conjures up visions of a beleaguered government bureaucracy ceding vital public services to unreliable entrepreneurs. At best, privatization can reduce the costs of government and introduce new possibilities for the better delivery of services. At worst, it may undermine equity, quality, and accountability.

Privatization and Its Alternatives distinguished scholars from several social science disciplines evaluate privatization efforts in the United States and abroad and at different levels of government: federal, state, and local. They look primarily at three important policy areas: education, housing, and law enforcement that sharply illustrate the dilemmas facing policy makers as the debate about privatization shifts from the delivery of hard services such as refuse collection to human services. Contributors have very different perspectives: some are enthusiastic about privatization, others are very skeptical. Indeed, none of these papers has been published elsewhere. The volume developed from a 1987 conference on privatization sponsored by the La Follette Institute of Public Affairs at the University of Wisconsin-Madison. A particular strength of this collection lies in its consideration of alternative forms of service delivery. The privatization of public housing, for instance, may involve subsidies to the poor, vouchers, tenant management, a hybrid form of privatization, or outright sale. How and how well have such policies worked? Examples from other countries may prove especially enlightening. The English sale of public housing to tenants is one of the largest asset sales in the entire privatization movement. Australia has experimented with public subsidies to private schools, and Japan has experimented with the privatization of law enforcement and corrections. These issues are the subject of lively public debate in the United States today and are discussed at length in this volume. Thus **Privatization and Its Alternatives** speaks not only to scholars of public policy but also to a wide range of practitioners who must decide whether or how to privatize.
