Sustainable Development Sakarama Somayaji, Ganisha Somayaji, 2009-01-01 At the dawn of this 21st century environmental concerns have received utmost attention from all segments of human society The extreme abuse of nature and ruthless hunt for material happiness are the reasons for post enlightenment destruction of the environment Many consider the issues related to environmental degradation as an environmental crisis During the last century humans have been exploiting nature not merely for need but also for greed Environmentally concerned individuals call for immediate action to stop being greedy and act positively In India too this environmental awareness is fast spreading and the Honourable

Supreme Court of India has directed the Central and state governments to introduce courses regarding environmental issues at all levels of education This book is a compilation of research results pertaining to development environment and sustainable development in the form of articles

Operations Research and Environmental Management Carlo Carraro, Alain Haurie, 2012-12-06 The activities of the Fondazione ENI Enrico Mattei cover a broad spectrum of research topics ranging from economics to engineering from environmental management at the industry or regional level to basic mathematical modelling research It is the combination of the activities on these last two topics that led the Fondazione to organise with the University of Geneva a workshop where operation research tools were designed with the aim to provide national and local policy makers with appropriate analytical and policy instruments for environmental management In the recent past attention has often been devoted to global environmental issues in which the level of policy making is either international through multi country agreements on emission control or national when environmental policies are designed to control domestic pollution Many environmental problems however have a local or regional dimension Even when their dimension is global e g in the case of the greenhouse gas effect relevant decisions on emission control such as the adoption of energy saving utilities are taken at the local level In many countries the current legislation imposes the local authorities to prepare plans and adopt measures to control energy consumption or to reduce waste of natural resources It is therefore important to analyze the way in which local or regional authorities optimise their environmental management
