Unredeemed Land Erin Stewart Mauldin, 2021 Unredeemed Land examines the ways the Civil War and the emancipation of the slaves reconfigured the South's natural landscape revealing the environmental constraints that shaped the rural South's transition to capitalism during the late nineteenth century **Harper Adams Utility Poultry Journal**

, 1927 Insurance Against Poverty World Institute for Development Economics Research, 2005 Poor people in developing countries are often affected by droughts floods illness crop failure job loss and economic downturns Much of their energy goes into coping with these shocks and into day to day survival While insurance and credit markets combined with widespread social security provide an important cushion against poverty in rich countries the need for immediate survival may lock the poor into persistent poverty in developing countries The poor in developing countries do have informal mechanisms to cope with risk and misfortune These are based on income diversification risk avoidance self insurance by saving together with family and community based mutual assistance Nevertheless the scope of these mechanisms remains limited Repeated individual specific shocks such as illness or pests or covariate risks associated with drought flood or recession undermine the ability of individuals and their families to cope with risk We now know much more about vulnerability to risk and how poor people cope Even more importantly we have learned much about the large long term consequences of these risks which condemns many to persistent poverty and excludes them from economic growth But there is much that can be done The micro level studies that underpin this book offer new insights on how effective public action could be more effective in protecting the vulnerable against persistent poverty Policy should focus on providing a comprehensive menu of ex ante and post crisis protection mechanisms including new forms of insurance savings safety nets and the means to strengthen the poor's asset base Local communities have a big role to play public funds should not be used to replace indigenous community based support networks rather they should be used to build on the strengths of these networks to ensure broader and more effective protection With numerous thematic chapters and case studies of both best practice and of failure from a mix of low income and middle income countries across the developing world this book evaluates alternatives in widening insurance and protection provision and makes an important contribution to the topical field of insurance and risk *The Theory and Practice of Microcredit* Wahiduddin Mahmud, S. R. Osmani, 2016-10-04 The remarkable speed at which microcredit has expanded around the world in the last three decades has piqued the curiosity of practitioners and theorists alike By developing innovative ways of making credit available to the poor the idea of microcredit has challenged many traditional assumptions about both poverty reduction strategies and financial markets While this has

encouraged new theorising about how microcredit works the practice of microcredit has itself evolved often in unpredictable ways outpacing the development of theory The Theory and Practice of Microcredit aims to remedy this imbalance arguing that a proper understanding of the evolution of practice is essential both for developing theories that are relevant for the real world and for adopting policies that can better realize the full potential of microcredit By drawing upon their first hand knowledge of the nature of this evolution in Bangladesh the birthplace of microcredit the authors have pushed the frontiers of current knowledge through a rich blend of theoretical and empirical analysis The book breaks new grounds on a wide range of topics including the habit forming nature of credit repayment the institutional strength and community based role of microfinance institutions the relationships between microcredit and informal credit markets the pattern of long term participation in microcredit programmes and the variety of loan use the scaling up of microenterprises beyond subsistence the missing middle in the credit market and the prospects of linking micro entrepreneurship with economic development The book will be of interest to researchers development practitioners and university students of Development Economics Rural Development or Rural Finance as well as to public intellectuals Rush Todd G. Buchholz,2011-05-05 We think we will be happy when we have some downtime when we can finally go on vacation disconnect shut down But in this provocative book Todd Buchholz will convince you that what you really want is to chase your tail even if you never catch it Weaving in everything from neuroeconomics to evolutionary biology to renaissance art to General Motors Buchholz will convince you that the race to compete has not only made us taller and smarter it s what we love and need Among the book s many counterintuitive takeaways are Put off retirement it can make you stupid We all need to be control freaks In house competition is actually great for morale Never let the ninth place team take home a trophy Witty breezy and very funny Todd Buchholz shows that it s the race itself that literally delivers the rush even if we never reach the finish line **Banana Wars** Steve Striffler,Mark Moberg,2003-11-20 The history of banana cultivation and its huge impact on Latin American history politics and culture **The Indian Journal of Agricultural Economics** ,2006 Vols include Proceedings of the conference of the Indian Society of Agricultural Economics The Harper Adams Utility Poultry Journal ,1927 **Congressional Record** United States. Congress,2003 **Reclaiming Food Security** Michael S. Carolan,2013-04-17 In this challenging work the author argues that the goal of any food system should not simply be to provide the cheapest calories possible A secure food system is one that affords people and nations in both the present and future the capabilities to prosper and lead long happy and healthy lives For a variety of reasons food security has come to be synonymous with cheap calorie security On this measure the last fifty years have been a remarkable success But the author shows that these cheap calories have also come at great cost to the environment individual and societal well being human health and the food sovereignty of nations The book begins by reviewing the concept of food security particularly as it has been enacted within agrifood and international policy over the last century After proposing a coherent definition the author then assesses empirically whether

these policies have actually made us and the environment any better off One of the many ways the author accomplishes this task is by introducing the Food and Human Security Index FHSI in an original attempt to better measure and quantify the affording qualities of food systems A FHSI score is calculated for 126 countries based on indicators of objective and subjective well being nutrition ecological sustainability food dependency and food system market concentration The final FHSI ranking produces many counter intuitive results Why for example does Costa Rica top the ranking while the United States comes in at number fifty five The author concludes by arguing for the need to reclaim food security by returning the concept to something akin to its original spirit identified earlier in the book While starting at the level of the farm the concluding chapter focuses most of its attention beyond the farm gate recognizing that food security is more than just about issues surrounding production For example space is made in this chapter to address the important question of What can we eat if not GDP We need the author contends a thoroughly sociological rendering of food security a position that views food security not as a thing or an end in itself but as a process that ought to make people and the Planet better off

Trade and Environmental Law Panos Delimatsis and Leonie Reins, 2021-12-14 This extensive volume of the Elgar Encyclopedia of Environmental Law probes the essential concepts contemporary research and key elements of law at the intersection of international trade and international environmental law Its succinct structured entries provide a definitive and comprehensive assessment of the interactions between these fields written by internationally renowned and recognized experts

Reducing Poverty through Investments in Agricultural Water Management Van Koppen, Barbara, Namara, Regassa, Safilios-Rothschild, Constantina, 2005 The overall goal of the Collaborative Program on Investments in Agricultural Water Management in Sub Saharan Africa is to contribute to broad based sustainable poverty reduction and smallholder agricultural growth The component on Poverty considerations in investments in agricultural water management focuses in more detail on poverty and gender dimensions It consists of two parts The first part is thematic and elaborates poverty and gender issues emerging from the literature that complement the other components of the Collaborative Program Part two is empirical Acknowledging the lack of empirical data on poverty impacts of investments in agricultural water management the Collaborative Program initiated case studies throughout Sub Saharan Africa Eight case studies on Agricultural Water Development for Poverty Reduction in Eastern and Southern Africa for which the field research was conducted in 2003 2004 were supported by IFAD Peacock 2005 Further the African Development Bank supported three case studies in West Africa in 2004 two by Kamara et al 2004 and one by Babatunde Omilola 2005 Part two synthesizes the empirical findings of these case studies

Nature's Matrix Ivette Perfecto, John Vandermeer, Angus Wright, 2019-05-31 When first published in 2009 Nature's Matrix set out a radical new approach to the conservation of biodiversity This new edition pushes the frontier of the biodiversity agriculture debate further making an even stronger case for the need to transform agriculture and support small and medium scale agroecology and food sovereignty In the first edition the authors set out a radical new approach to the

conservation of biodiversity This is based on the concept of a landscape as a matrix of diverse small scale agricultural ecosystems providing opportunities to enhance conservation under the stewardship of local farmers This contrasts with the alternative view of industrial scale farms and large protected areas which exclude local people However since then the debate around conservation and agriculture has developed significantly and this is reflected in this updated second edition The text is thoroughly revised including a reorganization of chapters with new and timely topics introduced updates to the discussion of agroecology and food sovereignty bringing it in line with the current debates greater coverage of the role of agroecology in particular agroforestry as an important component of climate change adaptation and mitigation highlighting recent studies on the role of intensive agriculture in climate change and loss of biodiversity and more attention given to the discussion of land sparing versus land sharing By integrating the ecological aspects of agriculture and conservation biology with a political and social analysis as well as historical perspective the book continues to set a progressive agenda and appeals to a wide range of students and professionals

The Great Bird Flu Hoax Joseph Mercola, 2009-03-15 The U S government is now practically screaming that a new avian super flu will likely kill millions of Americans The mainstream media is entirely onboard as are drug companies and other corporations poised to benefit immensely off the paranoia But there is NO coming bird flu pandemic It s an elaborate scheme contrived by the government and big business for reasons that boil down to power and money Presenting eye opening evidence that casts serious doubt on the truthfulness of reports about the virus s ability to transmit and its mortality rates around the world renowned physician Dr Joseph Mercola reveals the secrets about the great bird flu hoax In compelling fashion he provides you the real facts you need to know to protect you from a far greater ill corporate and governmental greed

The View from Vermont Blake A. Harrison, 2006 With its small native population proximity to major metropolitan areas and bucolic rural beauty Vermont was fated to be a tourist mecca forever associated in the popular imagination with maple syrup fall colors and ski bunnies Tourism for good and ill has always been the decisive factor in the conception of rural Vermont What is surprising however is the degree to which we have accepted this notion of rural Vermont as a somehow timeless entity Blake Harrison s rich and rewarding study instead presents the construction of Vermont s landscape as a complex and ever changing dynamic informed by progressive modernist and reformist thought competing views of economic expansion rural and urban prejudice and social exclusion and more recently by land use planning and environmentalism This broad based study includes the early history of Vermont tourism the concomitant abandonment of farms with the rise of the summer home the creation of an unspoiled Vermont from billboards at least the impact of Vermont s ski industry on tradition bound tourism and later efforts to legislate growth and protect an increasingly static ideal of a rural Vermont While grounded within a specific Vermont view Harrison has much to contribute to broader studies of rural places tourism and landscapes in American culture His analysis of how physical landscapes affect and are affected by our imagined landscape and the insight afforded by his juxtaposition of leisure and

labor will deeply inform our understanding of rural tourist landscapes for years to come This is a truly interdisciplinary work that will satisfy and challenge historians and geographers alike *The Farmers' Advocate and Home Magazine* ,1918
