In a blog, "*Reducing the price barrier for organic food*", I argued that the 'two-price system' which operates in some organic shops in Europe, offers the better off an opportunity to pay a little more for their food order to help the less well off. There are other ways in which the price barrier might be tackled of course and one of these would be to change the whole system of subsidies paid to farmers.

It's now nearly fifty years since the Mansholt Plan proposed that agriculture in Europe should be modernized and that small farms should be forced out and the land amalgamated to make holdings of increased size - but it's also forty years since the publication of E. F. Schumacher's, *Small is Beautiful – a study of economics as if people mattered* (Schumacher, 1974). Schumacher was a leading critic of Dr. Mansholt's plan. He believed its effects would be rural depopulation, the breakdown of rural culture and the increased exploitation of irreplaceable natural assets. So in contrast to Mansholt's policy to accelerate the drift out of agriculture, Schumacher called for policies to reconstruct rural culture and for more employment on the land. He also argued that economic policy was doing nothing to help the poor but in fact had "*the result of making those already rich and powerful, richer and more powerful.*" (Schumacher, 1974 p 72)

Although hostile reaction to the Mansholt Plan meant that many of the proposals were whittled down (Stead, 2007), the drive to modernization was under way and the trend toward larger-scale agricultural units accelerated. Over the ensuing years we have seen a fall in the total number of farms across the EU but this overall trend masks the process of consolidation (aka mergers and acquisitions), which has seen the swallowing up of small-scale farms by large-scale farms. Between 2003 and 2010, for example, the total number of European agricultural holdings fell by 20% but the fall was only in the number of smaller holdings under 50 ha because the number of holdings over 50 ha increased - by 4%.

Joseph Pearce

Small Is Still Beautiful:

Small is Still Beautiful Joseph Pearce, 2023-10-17 A third of a century ago E F Schumacher rang out a timely warning against the idolatry of giantism with his book *Small Is Beautiful*. Schumacher, a highly respected economist and adviser to third world governments, broke ranks with the accepted wisdom of his peers to warn of impending calamity if rampant consumerism, technological dynamism, and economic expansionism were not checked by human and environmental considerations. Joseph Pearce revisits Schumacher's arguments and examines the multifarious ways in which Schumacher's ideas themselves still matter. Faced though we are with fearful new technological possibilities and the continued centralization of power in large governmental and economic structures, there is still the possibility of pursuing a saner and more sustainable vision for humanity. Bigger is not always best. Pearce reminds us, and *Small is Still Beautiful*. Humanity was lurching blindly in the wrong direction, argued Schumacher. Its obsessive pursuit of wealth would not, as so many believed, ultimately lead to utopia but more probably to catastrophe. Schumacher's greatest achievement was the fusion of ancient wisdom and modern economics in a language that encapsulated contemporary doubts and fears about the industrialized world. The wisdom of the ages, the perennial truths that have guided humanity throughout its history, serves as a constant reminder to each new generation of the limits to human ambition. But if this wisdom is a warning, it is also a battle cry. Schumacher saw that we needed to relearn the beauty of smallness of human scale technology and environments. **The**

State of the System Paul W. Bennett, 2020-09-23 Over the last fifty years, Canada's public schools have been absorbed into a modern education system that functions much like Max Weber's infamous iron cage. Crying out for democratic school level reform, the system is now a centralized bureaucratic fortress that every year becomes softer on standards for students less accessible to parents, further out of touch with communities, and surprisingly unresponsive to classroom teachers. Exploring the nature of the Canadian education order in all its dimensions, *The State of the System* explains how public schools came to be so bureaucratic, confronts the critical issues facing kindergarten to grade 12 public schools in all ten provinces, and addresses the need for systemic reform. Going beyond a diagnosis of the stresses, strains, and ills present in the system, Paul Bennett proposes a bold plan to re-engineer schools on a more human scale as the first step in truly reforming public education. In place of school consolidation and managerialism, one size fits all uniformity, limited school choice, and the success for all curriculum, Bennett advocates for a new set of priorities: decentralize school governance, deprogram education ministries, and school districts listen to parents and teachers and revitalize local education democracy. Tackling the thorny issues besetting contemporary school systems in Canada, *The State of the System* issues a clarion call for more responsive, engaged, and accountable public schools. **How Big And Still Beautiful?: Macro- Engineering Revisited** Frank P.

Davidson, 2019-04-08 This volume examines fundamental issues of macro engineering, now a planetary norm, from the viewpoints of psychiatry, social science, management, and law. The contributors suggest a general theory to guide future

decisions on large scale projects and programs and analyze specific cases in the context of a set of public interest guidelines

Developing Leadership Christopher Mabey, Wolfgang Mayrhofer, 2015-06-18 What kind of a leader do you want to become The role of business schools in developing future managers and leaders has long been scrutinised and critiqued This has been exacerbated by the recent financial crisis and many books have been written that condemn business schools for producing leaders who graduate without the ability to respond to the changing world around them innovate or act in a responsible way By way of remedy this provocative book takes the critique and debate further proposing a number of ethical and spiritual resources including Heiggarian philosophy classical Greek philosophy and the Maori notion of wairua It explores existing teaching practices and suggests ways that business schools can Encourage a greater understanding of different world views Introduce different perspectives such as the arts philosophy and spirituality Encourage the practice of responsible and ethical leadership Nurture innovation and creativity Developing Leadership is accompanied by filmed seminars exploring the central debates and interviews with the expert team of contributors A rare thing this book gives more than the label promises The title is about questions yet each chapter gives us answers to why important issues are not addressed in business schools and what to do about it This is a manifesto for reform and the next big question is what will you reader do about it Professor Jonathan Gosling Director Centre for Leadership Studies University of Exeter UK and Distinguished Visiting Professor of Leadership Development INSEAD France
