Taxing Choice

William Shughart II, 2018-04-24 Taxing behavior deemed politically incorrect has long been a convenient way for politicians to fund programs benefiting special interest groups to the public's disadvantage Government policy toward various goods drugs tobacco and alcohol for example has been locked into a regulatory cycle of tax and taboo Support for legalizing other substances is buttressed by the revenue generating power of so called sin taxes And the products subjected to excise taxation have varied from soft drinks fishing gear and margarine to airline tickets telephone calls and gasoline *Taxing Choice* thoroughly addresses the costs and benefits of these predatory public policies Shughart notes that the record of such punitive selective taxation has been anything but successful hindering economic progress and failing to deliver the promised social benefits In addition the costs of selective taxes fall disproportionately on lower income people while more politically powerful interest groups benefit At the same time such policies are a poor way to raise funding for public services and foster political corruption and self serving bureaucracies accountable to no one Indeed policies discriminating against certain products may represent ominous trends easily extended into virtually every facet of people's lives One can envision policies proscribing foods sun bathing obesity and even books films and political and religious beliefs deemed dangerous Part I is devoted to the political economy of selective taxation Contributors trace the history and politics of selective excise taxes in the United States discussing the range of products that have been subject to such taxation from the founding period to the present Part II explains how these taxes emerge in a political marketplace with opposing pressure groups scrambling for wealth transfers in their own favor Part III looks at taxes on specific products as well as such banning policies as Prohibition and the war on drugs Constitutional economic and civil liberty issues including civil asset forfeiture and product liability are

discussed in Part IV With the accelerating national debate over tax reform and the downsizing of government Taxing Choice is a timely and far reaching contribution to a debate of great interest to economists policymakers historians sociologists and taxpayers in general

National Library of Medicine Current Catalog National Library of Medicine (U.S.), Second Thoughts on Capitalism and the State Leslie Sklair,2022-05-02 This collection of essays highlights the need for sociological and political analysis of actual alternatives to capitalism and the existing system of so called nation states It challenges the conventional idea that capitalism can be successfully reformed to meet the needs of most people in the world confronting it with the existential threats posed by the perfect storm of climate change and the Anthropocene hyper urbanization and the Coronavirus pandemic Written over a period of 50 years it charts the ways in which capitalism and socialism have evolved as global systems their successes and failures to the point that it is easier to imagine the end of the world than the end of capitalism It offers ways forward community by community

The Economics of Smoking Robert D. Tollison,Richard E. Wagner,2012-12-06 Cigarettes are under political attack at all_levels of government in the United States From Washington D C to state capitals to local govern ments proposals abound to increase the cigarette excise tax to impose smoking bans to prevent cigarette advertising to restrict the sale of cigarettes through vending machines to cut off the export of cigarettes to earmark the cigarette excise tax for health programs to divest the stock of cigarette companies and so on And all of these are purportedly being advocated in the name of health Undergirding and abetting the health argument is an economic argument that claims to place a value of up to 100 billion per year on the alleged health costs of smoking to the American economy which is more than 3 per pack of cigarettes smoked As our title suggests our interest lies in the economics of smoking and not in the health issues surrounding smoking We are professional economists and not medical scientists We will focus on what if any economic consequences arise for nonsmokers when smokers smoke For purposes of our discussion we simply accept the premise that smoking damages health and proceed with our analysis Since we have not studied the issue ourselves we have no way of knowing whether such a premise is true But it really does not matter for getting the economics of smoking right The important point resides in who pays for whatever to smoking
