Social Research And Basic Computer Programming:

Social Research and Basic Computer Programming Elwood W. Guernsey, 1973-01-01 *Computer Applications in the Social Sciences* Edward E. Brent, Ronald E. Anderson, 1990 Presenting an introduction to computing and advice on computer applications this book examines hardware and software with respect to the needs of the social scientist It offers a framework for the use of computers with focus on the work station the center of which is a personal computer connected to networks by a telephone based modem Methods of Social Research Kenneth D. Bailey, 1994 An introduction for undergraduates to every stage of sociological research showing how to deal effectively with typical problems they might encounter The book is fully updated to include examples from the LA riots and the 1992 presidential elections **The Use of Social Research in Federal Domestic Programs** United States. Congress. House. Committee on Government Operations. Research and Technical Programs Subcommittee, 1967 **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1976 **Computer Literacy in Human Services Education** Richard Reinoehl, B. Jeanne Mueller, 1990 This volume provides a unique and notable contribution to the investigation and exemplification of computer literacy in human services education A significant contribution to the development of the contemporary human services curriculum this helpful guide introduces the computer literate curriculum explores the nature of computer literacy and its ramifications for teaching in the human services and discusses the computer's effect on scholarly thinking Computer Literacy in Human Services Education is divided into two major sections the first dealing with teaching about computers and the second addressing the use of computers in teaching In the first section the authors introduce the topic of computer literacy in human services education and look at some general issues which have broad implications for the educator They also explore program wide curriculum development and the development of individual courses In the second section the authors discuss computers as devices which can facilitate both learning and thinking in human services and suggest that some theories explaining human behavior may also apply to human computer interaction Other topics covered in the section are the use of computers in teaching about human services including Computer Assisted Instruction CAI simulations and interactive video The volume concludes with an examination of the ways computers can affect the thinking of scholars in teaching and in model and theory building in the human services **Handbook of Research on Socio-Technical Design and Social Networking Systems** Whitworth, Brian, de Moor, Aldo, 2009-03-31 Addresses current issues of research into socio technical systems STSs Provides suggestions on how social knowledge can synergize with technical knowledge **1977 National Science Foundation Authorization** United States. Xennials Gian Marco Campagnolo, 2020-11-30 This book explores the tension between analogue and digital as part of an evolving research programme and focuses on the sequencing of methods within it The book will be an invaluable reference for scholars who routinely engage in critical sociological analysis of the digital workplace and find it easier to treat the digital as an object of study It describes how the transformations taking place in the 10 year arc of a career spent doing fieldwork in the IT sector led the author to progressively embrace new forms of data and methods In a time where sociological imagination takes the shape of whatever new phenomenon can be studied by transactional data and machine learning methods it is a reminder that longstanding engagement with a particular field of practice is the basis of empirical social science expertise This short book by Gian Marco Campagnolo is remarkably wide ranging It draws on theoretical perspectives as varied as Harold Garfinkel s ethnomethodology and Andrew Abbott s linked ecologies to discuss topics as diverse as the adoption of packaged enterprise software in the public sector in Italy and the careers of often influential industry analysts Campagnolo s methods are primarily qualitative and ethnographic but he shows a proper appreciation for quantitative methods such as text mining and sequence analysis The book ends with a discussion of the famously difficult issue of achieving explainability in machine learning Campagnolo tantalisingly suggests the usefulness here of how ethnomethodologists view accountability as a practical accomplishment that is hampered rather than fostered by efforts to give full explanations Donald MacKenzie Professor of Sociology Edinburgh University Scotland The author adopts a processual perspective on social data science as means of exploring and reflecting on the emergence of an academic career within this new domain of interdisciplinary inquiry This is certainly a novel and interesting approach given the fact that data science is work in progress and is characterized by a number of competing occupational groups that are struggling to define this emerging field William Housley Professor University of Cardiff UK Having myself written about the relationships between ethnography and computer science I see this book as a timely contribution in that it extends the existing debate to data science Data science is an emerging discipline that is gaining central stage in industry and in the public discourse The aim of this book to indicate the importance of interdisciplinarity in this field is commendable Giolo Fele Professor University of Trento Italy This book provides two entwined accounts a reflective personal journey across different projects and methods and a grounded genealogically sound analysis of the approaches and contributions of social science to understanding the digital society These dual accounts are adroitly communicated Their bold combination yields a unique and invaluable contribution to fundamental discussions in the social sciences as well as an exemplar for how to combine ethnographic and data driven analysis in a theoretically and epistemologically informed manner With this book Campagnolo brings us close to the methods and opens up an inspiring and challenging agenda for combining old and new forms of inquiry into sociological problems Anne Beaulieu Director Data Research Centre University of Groningen Netherlands *Inside Interviewing* James Holstein, Jaber F. Gubrium, 2003-03-21 *Inside Interviewing* highlights the fluctuating and diverse moral worlds put into place

during interview research when gender race culture and other subject positions are brought narratively to the foreground It explores the facts thoughts feelings and perspectives of respondents and how this impacts on the research process

Congress. House. Committee on Appropriations. Subcommittee on Foreign Operations, Export Financing, and Related Programs,2001 **Mindful Inquiry in Social Research** Valerie Malhotra Bentz,Jeremy J. Shapiro,1998-06-24 This innovative introduction to research in the social sciences guides students and new researchers through the maze of research traditions cultures of inquiry and epistemological frameworks It introduces the underlying logic of ten cultures of inquiry ethnography quantitative behavioral science phenomenology action research hermeneutics evaluation research feminist research critical social science historical comparative research and theoretical research It clarifies conceptual and intellectual traditions in research and puts researchers firmly in the investigative saddle able to choose justify and explain the intellectual framework and personal rationale of their research *Digital Social Research* Giuseppe A. Veltri,2019-10-25 To analyse social and behavioural phenomena in our digitalized world it is necessary to understand the main research opportunities and challenges specific to online and digital data This book presents an overview of the many techniques that are part of the fundamental toolbox of the digital social scientist Placing online methods within the wider tradition of social research Giuseppe Veltri discusses the principles and frameworks that underlie each technique of digital research This practical guide covers methodological issues such as dealing with different types of digital data construct validity representativeness and big data sampling It looks at different forms of unobtrusive data collection methods such as web scraping and social media mining as well as obtrusive methods including qualitative methods web surveys and experiments Special extended attention is given to computational approaches to statistical analysis text mining and network analysis Digital Social Research will be a welcome resource for students and researchers across the social sciences and humanities carrying out digital research or interested in the future of social research Designing Social Research Norman Blaikie,2009-11-16 The basic requirements for research designs and research proposals are laid out at the beginning of the book followed by discussion of the major design elements and the choices that need to be made about them Four sample research designs at the end of the volume illustrate the application of

the research strategies **Handbook of Interview Research** Jaber F. Gubrium, James A. Holstein, 2002 The Handbook of Interview Research is the most ambitious attempt yet at examining the place of the interview in contemporary society Interviewing is the predominant mode of research in the social sciences It is also the stock in trade of information seekers in organizations and institutions of all kinds as well as in the mass media Across the board interviews provide today's leading window on the world of experience The Handbook offers a comprehensive examination of the interview at the cutting edge of information technology Drawing upon leading experts from a wide range of professional disciplines this book addresses conceptual and technical challenges that confront both academic researchers and interviewers with more applied goals From interview theory to the nuts and bolts of the interview process the coverage is impressively broad and authoritative The Handbook of Interview Research is both encyclopedic and thematic As an encyclopedia it provides extensive discussions of the methodological issues now surrounding interview practice offering a multi faceted assessment of what has become the method of choice for obtaining personal information in today's society But the Handbook also is a story which spins a particular tale of interviewing one that moves from the commonly recognized individual interview to what is called the interview society The gist of the presentation is that we can no longer regard the interview as simply an instrument for gathering data but must now also view it as an integral part of society Social Research Methods H. Russell Bernard, 2013 Bernard does an excellent job of not only showing how to practice research but also provides a detailed discussion of broader historical and philosophical contexts that are important for understanding research **Doing Research/Reading Research** Paul Dowling, 2005-11-29 This best selling text provides a scheme which enables the beginning researcher to organize and evaluate the research that they read and to plan and implement small scale research projects of their own The authors also give structured practical guidance on the development of a research question techniques of data collection qualitative and quantitative forms of analysis and the writing and dissemination of research
