*Philosophy of Social Science* Mark Risjord, 2022-07-25

*Philosophy of Social Science* A Contemporary Introduction examines perennial questions of philosophy through engaging the empirical study of society Questions of normativity concern the place of values in social scientific inquiry Questions of naturalism concern the relationship between the natural and the social sciences And questions of reductionism ask how social institutions relate to the people who constitute them This accessible text offers a comprehensive overview of debates in the field with special attention to new research programs Topics include the relationship of social policy to social science interpretive research cognitive and evolutionary explanations intentional action explanation rational choice theory conventions and social norms joint intentionality causal inference and experimentation Detailed examples of social scientific research motivate the philosophical questions and illustrate the important concepts Treating philosophical commitments as implicit in social science students of the social sciences will benefit from its application of philosophical argument to methodological and theoretical problems The text argues that social science transforms philosophical questions and students of philosophy will benefit from its direct engagement with contemporary debates The Second Edition provides updates with the most recent literature and adds two new chapters one on modeling and one on the role of race and gender in the social sciences

**Key Updates to the Second Edition** A new chapter on Modeling and Explaining which explores how models represent social systems and whether highly idealized models explain A new chapter on Race and Other Social Constructions capturing much of the recent empirical research and philosophical interest in the social construction of categories like race and gender Revised and updated

chapters throughout clarifying earlier presentations and bringing discussions from the First Edition into line with new research Updated annotated Further Reading lists which now include relevant publications from 2013 to 2022 **Harvey Sacks : Social Science and Conversation Analysis** London David Silverman Professor of Sociology Goldsmiths College,1998-09-30 Harvey Sacks s early death in 1975 robbed the social sciences of one of its most original thinkers Although he published relatively little in his lifetime his lectures and papers were enormously influential in sociology and sociolinguistics and they played a major role in the development of ethnomethodology and conversation analysis The recent publication of Sacks s Lectures on Conversation has provided an excellent opportunity for a wide ranging reassessment of his contribution In this new book David Silverman provides a clear introduction to Sacks s work and reassesses its value for sociology linguistics anthropology and psychology Using a variety of examples he explains Sacks s ideas on method language and talk interaction He argues that Sack s work offers a highly original perspective on language and social life and raises fundamental questions for the social sciences questions which after more than twenty years remain vitally important and largely unanswered Written in a lively and accessible way this book will be of particular interest to students of sociology sociolinguistics social theory and method but it will also be of interest to students and researchers in anthropology psychology and related disciplines **Reflections on Uneven Democracies** Daniel Brinks,Marcelo Leiras,Scott Mainwaring,2014-09-22 A tour de force analysis of the current state of democracy studies as seen through the scholarly legacy of Guillermo O Donnell Winner of the CHOICE Outstanding Academic Title of the Choice ACRL The third wave of democratization produced a wealth of enduring social science Beginning in the 1970s it prompted scholars to develop important theories on authoritarian breakdowns and transitions to democracy No one in the field was more influential than Guillermo O Donnell 1936 2011 whose pathbreaking work shaped the scholarship of generations of social scientists Reflections on Uneven Democracies honors the legacy of O Donnell s research by advancing debates related to his work on democracy Drawing together a veritable Who s Who of eminent scholars including two of O Donnell s closest collaborators Philippe Schmitter and Laurence Whitehead the volume examines issues related to democratic breakdowns and stability the nature and quality of new democracies institutional strength the rule of law and delegative democracy This reexamination of some of the most influential arguments about democracy of the past forty years leads to original approaches and insights for a new era of democracy studies Students of democracy and institutional performance both Latin Americanists and comparativists more generally will find this essential reading **Great Expectations** Commission on the Social Sciences,2017-10-19 The social sciences in the United Kingdom are extensive diverse and influential At any one time more than four million students study the social sciences in schools and about a half million students study social science in universities Total university income from the social sciences is at the four billion dollar level Beyond that many social scientists hold key positions in government business the media civil service and the voluntary sector Great Expectations

reviews the status of the social sciences in Great Britain at the beginning of the twenty first century While making clear that work opportunities for social scientists are substantial and that levels of intellectual performance equal that of graduates in physics it provides a hard hitting empirically grounded examination of a near crisis situation The report goes far beyond what one conventionally expects in commissioned reports arguing that the academic treadmill driven by excessive accountability burdens reduces the originality and quality of much academic research The report emphasizes the ideological and parochial nature of much British social research As a result there is little applicability internationally even less interdisciplinary work and at times an outright bias against the market economy as such The Commission Report is even handed tough minded and frank in discussing how it is that social science and new social and technical forces do not always mesh The optimism exuded is measured but genuine Great Expectations offers policy recommendations and scientific goals that can be serviceable not only in the United Kingdom but in all advanced societies in which social research is a central component of economic stability and development It is a superb reference volume enriched by original analysis and pungent clear headed writing Members of the commission include Professor David Rhind Vice Chancellor of the City University served as Chairman of the Commission Members included Huw Beynon Cardiff Patricia Broadbent Bristol Vicki Bruce Edinburgh Barry Buzzan LSE Sue Duncan Government Researcher Stuart Etherington National Council for Voluntary Organizations Janet Lewis Oxford Denise Lievesley UNESCO Richard Portes LBS Marc Renaud Research Council of Canada Michael Tonry Cambridge and David Walker The Guardian

**Philosophy and the Social Sciences** Vernon Pratt,2003-09-02 Published in the year 2004 Philosophy and the Social Sciences is a valuable contribution to the field of Sociology Columbia Studies in the Social Sciences ,1919

**Practicing Social Science** Devorah Kalekin-Fishman,2016-12-01 How is the process of globalization effecting changes in the structure of knowledge in sociology This path breaking volume looks at the human dimension of developments in the discipline by compiling a set of interviews that exemplify the life and work of a sociologist today Their ideas and conceptualizations show to what extent a paradigm shift has taken root answering questions such as whether sociology still remains a differentiated relatively autonomous social science The chosen interviewees are about equally divided according to gender and have been selected from among professional sociologists in different parts of the globe with an emphasis on areas that are under represented in English publications such as East Asia Latin America and Africa Analysis focuses on changes which are becoming clear from the on going confrontation between traditional sociology which emerged as a project of modernity and the sociology practiced by sociologists who are called upon to adapt the discipline to the upheavals of the twenty first century

Non-humans in Social Science Petr Gibas,Karolína Pauknerová,Marco

Stella,2012-04-01 Ideas of dead inert space non living machinelike reflexive controlled bodies and passive meaningless things are very modern At the very heart of the program of modernity resource exploitation and consumption is the idea that non humans have no agency they are simply resources to be manipulated and exploited at our will Mostly leaving aside the more and more evident ethical concerns of this worldview and this setting of the human non human boundary this volume attempts to explore what social sciences have to say about the relationship between the human and non human The intention of this book is to offer a non human perspective We realize that it is sometimes difficult to say whether the outcome of such a perspective would be just a shallow tendency to anthropomorphize or whether we could reach some of the previously unseen properties of non humans Being aware of the dangers this volume puts together different case studies that are more or less inspired by this non human perspective The aim is to explore what has been for a long time put aside and to provide new insights new revelations that can lead social science to undiscovered or hidden realms The outcome of this thrilling adventure can in the end be a discovery that the role of natural and social sciences or even more the character of the nature culture dichotomy would have to be re evaluated
