Gender, State and Social Power in

Contemporary Indonesia Kate O'Shaughnessy, 2009-01-13 This book examines gender state and social power in Indonesia focusing in particular on state regulation of divorce from 1965 to 2005 and its impact on women Indonesia experienced high divorce rates in the 1950s and 1960s followed by a remarkable decline Already falling divorce rates were reinforced by the 1974 Marriage Law which for the first time regulated marriage for both Muslim and non Muslim Indonesians and restricted access to divorce This law defined the roles of men and women in Indonesian society vesting household leadership with husbands and the management of the household with wives Drawing on a wide selection of primary sources including court records legal codes newspaper reports fiction interviews and case studies this book provides a detailed historical account of this period of important social change exploring fully the impact and operation of state regulation of divorce including the New Order government's aims in enacting this legal framework its effects in practice and how it was utilised by citizens both men and women to advance their own agendas It argues that the Marriage Law was a tool of social control enacted by the New Order government in response to the social upheaval and protests experienced in the mid 1970s However it also shows that state power was not hegemonic it was both contested and co-opted by citizens with men and women enjoying different degrees of autonomy from the state This book explores all of these issues providing important insights on the nature of the New Order regime social power and gender relations both during the years of its rule and since its collapse

Marginality, Power and Social Structure Rutledge M. Dennis,2005-04-08 The articles in this book are intended to be a much needed corrective to the literature on marginality In the recent past and at present the concept of marginality has been used with little specificity and when used with specificity the delineation of the complex dimensions of the term has been less than satisfactory To illustrate the many ways in which marginality exists and operates in many societies Rutledge Dennis has assembled a rich array of articles designed to highlight the history and evolution of the concept of marginality along with the theorists issues and situations which prompted the use of the term and the issues for which the term is applicable today The very title of the volume comes into play here because though many of the early marginality theorists took the term into the realm of psychology the contributors to this volume who discussed the theory highlighted the social structural foundation of marginality Dennis sought a marriage of theory and research while assembling the articles for this volume For this reason he actively sought papers which used divergent research strategies to uncover the existence of marginality in its various forms and contexts Thus some of the papers utilize ethnographic and life history approaches whereas others use statistical analysis and historical data analysis In addition to theoretical and methodological concerns a major theme for this volume is the combination of both theory and method towards an investigation of issues and problems emanate from the social structure and are closely linked to power and domination

Javanese Shadow Plays, Javanese Selves Ward Keeler,2017-03-14 As with many performing arts in Asia neither the highly stylized images of the Javanese shadow play nor its musical complexity detracts from its wide popularity By a context sensitive analysis of shadow play performances Ward Keeler shows that they fascinate so many people in Java because they dramatize consistent Javanese concerns about potency status and speech Originally published in 1987 The Princeton Legacy

The Vortex of Power Airlangga Pribadi Kusman, 2018-07-17 This book explores the role of intellectuals and governance processes in post-authoritarian Indonesia. Focusing on East Java, the author argues that intellectuals have played an increasingly direct and practical role in the exercise of governance at the local level of Indonesian politics. The book provides insights into how the collaboration between intellectuals and local politico-business elites has shaped good governance and democratic institution building, validating power structures that continue to obstruct political participation in the country. In addition, the book also delves into the contribution of local intellectuals in resolving the contradictions between technocratic ideas and governance practices in the interest of local elites. Empirical studies included in the book add to the broader literature on the social role of intellectuals, highlighting their role as not just defined by their capacity to produce and circulate knowledge but also by their particular position in concrete social and political struggle. The author also explores the manner in which relationships between intellectuals, business, and political elites and NGOs in local political and economic practices intersect with national level contests over power and resources.
