Social Transformation And Private Education In China:

Social Transformation and Private Education in China Jing Lin, 1999-10-30 Private schools resurfaced in China after 1978 when the Chinese government embarked on an economic reform for modernization This book offers a comprehensive review of the development characteristics issues and problems of private schools at primary secondary and university levels especially elite private schools for children of very wealthy families Based on fieldwork at about 40 private and public schools in China this study also critically examines social response and government reactions to private education development and ends with reflections on its significance and future prospects touching on issues concerning social equality efficiency public school reform and democratization in China **Gridlock and Solutions** Shui Bing, **Education and Social Change in China: Inequality in a Market Economy** Gerard A. Postiglione, 2015-01-28 Market reform financial decentralization and economic globalization have greatly accentuated China's social and regional inequalities Education is expected to address these inequalities in a context of rapid social change including the rise of an urban middle class changed status of women resurgence of ethnic identities growing rural to urban migration and lingering poverty in remote areas But some argue that state policies have not sufficiently addressed inequitable practices and that schools actually perpetuate and reproduce inequities giving rise to a new system of social stratification driven more by market forces than socialist principles Featuring all original previously unpublished material this volume examines this argument through analysis of selected aspects of educational stratification in China during the reform era Chapters focus on the new urban middle class poor rural residents the migrant population in urban areas rural girls and ethnic minorities The contributors are established scholars in the field and they build a conceptual framework for assessing the degree to which China's educational reforms are inclusive equitable and integrative across social categories and groups **John Dewey, Liang Shuming, and China's Education Reform** Huajun Zhang, 2013-04-19 This book explores the central question of how to cultivate a continued sense of self in the radically changing Chinese society a question that is highly related to the current ongoing educational reform If education cannot respond to the problem of students disconnection from the changing society learning cannot truly happen in school and the reform will fail Zhang suggests a philosophy of education that highlights the cultivation of students unique but inclusive individuality so that students learn how to nurture their own mind in this profoundly changing society rather than becoming empty and lost The discussion of this proposed question is inspired by the thoughts of the American pragmatist John Dewey and Chinese Confucian scholar Liang Shuming It is not the author's intention to have a pure philosophical discussion but rather to refer to their philosophies to help answer the practical question of cultivating individuality in an educational setting during this period of China's modern transition Education and Reform in China Emily Hannum, Albert Park, 2012-11-12 Transformative market reforms in China since the late 1970s have improved living standards dramatically but have also led to unprecedented economic inequality During this period China's educational system was restructured to

support economic development with educational reforms occurring at a startling pace Today the educational system has diversified in structure finance and content it has become more market oriented and it is serving an increasingly diverse student population These changes carry significant consequences for China's social mobility and inequality and future economic prospects In *Education and Reform in China* leading scholars in the fields of education sociology demography and economics investigate the evolution of educational access and attainment educational quality and the economic consequences of being educated *Education and Reform in China* shows that economic advancement is increasingly tied to education in China even as educational services are increasingly marketized The volume investigates the varying impact of change for different social ethnic economic and geographic groups Offering interdisciplinary views on the changing role of education in Chinese society and on China's educational achievements and policy challenges this book will be an important resource for those interested in education public policy and development issues in China **The Impact and**

Transformation of Education Policy in China Alexander W. Wiseman, Tiedan Huang, 2011-12-08 Examines the transformation of education policy in China with an emphasis on transformations in the post 1978 period This title also emphasises on policy change and its subsequent impact on different aspects of education at various levels of educational institutions particularly in areas of educational financing and curriculum reform *Politics, Education and Social Change*

Agnieszka Gromkowska-Melosik, Inetta Nowosad, Aleksandra Boroń, Marzanna Farnicka, Marcin Gierczyk, 2025-01-20 The authors analyse macro level political decisions across various societies as well as individual actions and experiences to advocate for a more inclusive and effective education system capable of driving social change They consider relationships between politics education and social change in various contexts and dimensions The macro level of educational policy and politics is confronted with the micro realities of human biographies However the authors do not consider people who are influenced by political decisions as incapacitated mass Thus social change always results from these macro micro connections This interdisciplinary book includes themes related to political sciences education and sociology which resulted from the authors study of contemporary social and education phenomena It gives insight into interesting paradoxes and controversies *Choosing Choice* David Nathan Plank, Gary Sykes, 2003-01-01 The first cross national comparative study on school choice policies this volume features prominent scholars who analyze experiences in countries around the world England Chile South Africa the Czech Republic China Australia New Zealand and Sweden Together they answer such important questions as Why are policies that expand educational options being adopted in such a diverse set of countries Why have governments in widely varying circumstances come to view school choice as an apt response to educational dilemmas What have we learned about the impacts of these policies on existing educational systems and the quality of teaching and learning in the classroom The analyses presented here illuminate school choice policies as a critical worldwide development in education noting both similarities and differences across countries This volume broadens our understanding
