Researching Language and Literacy in Social Context David Graddol, Janet Maybin, Barry Stierer, 1994 This volume shows how experienced researchers have approached investigations of talk or reading and writing behaviour and what they have discovered about the social and cultural embeddedness of

language and literacy practices      *Language and Situation* Michael Gregory, Susanne Carroll, 2018-09-14 Originally published in 1978 This book provides and explains a framework for understanding and describing variations of style of language in relation to the social context in which it is used Constant features of language users such as their temporal geographical and social origins their range of intelligibility and their individualities are related to concepts of dialects but dialects are not the only kind of language variety There are features of language situations that yield others the medium used the roles of the users and their relationships as well as recurring situations and cultural habits all relate to the style employed Variety in language can be seen in terms of the major functions of language as content as inter action and as texture Studying variety in language from sociological and linguistic aspects this book is also interesting for psycholinguistics and literary study      *Appropriate Methodology and Social Context* Adrian Holliday, 1994-09-22 An ethnographic framework to describe the varying cultures of classrooms teacher communities and student groups in different countries and educational contexts      The social context for language learning, a neglected situation? [Extras] Michael P. BREEN, 1985      *Adult Learning in the Social Context* Peter Jarvis, 2012-04-27 This book is a logical progression from *The Sociology of Adult and Continuing Education* The author takes a completely new approach to the subject and puts forward a model of adult learning which is analysed in depth This model arises from the results of a research project in which adults analysed their own learning experiences      Learning in Social Context: The Nature and Profit of Living in Groups for Development Ildikó Király, David Buttelmann, 2017-05-25 One of the distinctive features of humans is their unique sociality Humans live in organized societies that are characterized by a high level of interdependence of group members in various aspects of life ranging from the economic phenomenon of labour division to providing emotional support to others Under these circumstances the capacity to track social connections within and between groups has great adaptive value in managing everyday life We may understand the importance and adaptive value of tracking the scope of culturally shared knowledge if we consider the importance of cultural norms in guiding behaviour To become a competent member of their cultural group one must be able to conform to the group s specific behavioural norms and to accumulate culturally shared knowledge Acquiring this knowledge is essential for successful social interactions In contrast to current dominant explanatory theories emphasizing that social category formation is simply rooted in humans need to belong and affiliate with a group the aim of this e book is to provide evidence that in addition to its affiliative role children form social categories for epistemic purposes We show that children use specific cues like kinship patterns of resource allocation and consensus to understand group cohesion Section 1 Once children figured out who is in group and who is out group they show a significant in group bias in attention acting and learning Section 2 Yet this in group bias can be attenuated by induced synchronous behavior Section 3

Nevala, Minna Palander-Collin, 2024-03-15 The chapters in this volume study the construction representation and negotiation of a variety of social roles through self and other reference markers or the discussion of reference as a tool for identification The chapters uncover new insights both from a historical and present day perspective and show how positioning the self and other varies what kind of reference choices language users make and what follows from these choices The data come from a variety of public texts private encounters and questionnaires and the methodologies range from macro to micro perspectives including combinations of qualitative close reading and quantitative corpus methods and synchronic and diachronic perspectives The findings enhance our understanding and use of reference practices in the context of global institutional political and multicultural as well as media texts      **Language and social context** Pier Paolo Giglioli, 1973      Genre and Institutions Frances Christie, J. R. Martin, 2005-03-01 This book examines genres as instances of social processes enacting a range of important institutional practices hence also shaping people's subjectivities Genres represent purposive and staged ways of building means in a culture The book's particular claim to originality is that using systemic functional grammar it demonstrates how given genres build or enact social practice how educational settings provide contexts in which some apprenticeship into such genres occurs and how theorizing about such matters helps build a theory of social action revealing how powerful is the systemic functional analysis in addressing questions concerning the social construction of reality The discussion is built around extensive analysis of instances of texts collected in a number of worksites and school settings While most are instances of written genres some are spoken most notably the chapter that is devoted to the discussion of the spoken classroom texts in which the teaching and learning of the written genres take place      Japanese Mood and Modality in Systemic Functional Linguistics Ken-Ichi Kadooka, 2021-03-15 This book is a cross linguistic and interdisciplinary exploration of modality within systemic functional linguistics SFL Drawing upon the broad SFL notion of modality that refers to the intermediate degrees between the positive and negative poles the individual papers probe into the modality systems in English and Japanese The papers cover issues such as the conceptual nature of modality in both languages the characterization of modulation in Japanese the trans grammatical aspects of modality in relation to mood and grammatical metaphor in both languages and the modality uses and pragmatic impairment by individuals with a developmental disorder from a neurocognitive perspective The book demonstrates a functional account of Japanese within an SFL model of language with a fresh perspective to Japanese linguistics It also refers to cross linguistic issues concerning how the principles and theories of SFL serve to empirically elaborate descriptions of individual languages which will lead to the enrichment of the theory and practice of linguistics and beyond      Writing with Students Lucy Macnaught, 2024-08-08 Beginning with a review of the theory and pedagogic practices that have been influential in English for Academic Purposes EAP contexts this book examines the practice of joint construction in a genre based approach to literacy pedagogy It investigates how teachers guide students to co construct a text drawing attention to the contested rationale for teachers taking a leading role when writing

collaboratively with their students Informed by systemic functional linguistics the book puts forward an accessible approach to the analysis of classroom discourse that centres on the dynamic mediation of meaning Through examples of classroom interaction involving international students who are studying EAP and specifically as preparation for university entrance it illuminates how classroom metalanguage and the organisation of classroom talk enables teachers to guide but not provide wording metalanguage also enables students to critique and justify their choices as they try out new academic language modify and improve their writing
