Fieldwork, Participation and Practice Marlene de Laine, 2000-10-06 I would highly recommend Fieldwork Participation and Practice Ethics and Dilemmas in Qualitative Research as a text for the wide range of fields that currently engage in fieldwork She does an excellent job of moving beyond basic ethical principles and informs the reader of the complexity of contemporary fieldwork Forum for Qualitative Social Research follow the link below to read the complete review This timely and topical look at the role of ethics in fieldwork takes into account some of the major issues confronting qualitative researchers The main purposes of this book are twofold to promote an understanding of the harmful possibilities of fieldwork and to provide ways of dealing with ethical problems and dilemmas To these ends examples of actual fieldwork are provided that address ethical problems and dilemmas and posit ways of dealing with them [Advances in Social Simulation](#) Harko Verhagen, Melania Borit, Giangiacomo Bravo, Nanda Wijermans, 2020-04-30 This book presents the state of the art in social simulation as presented at the Social Simulation Conference 2018 in Stockholm Sweden It covers the developments in applications and methods of social simulation addressing societal issues such as socio ecological systems and policy making Methodological issues discussed include large scale empirical calibration model sharing and interdisciplinary research as well as decision making models validation and the use of qualitative data in simulation modeling Research areas covered include archaeology cognitive science economics organization science and social simulation education This collection gives readers insight into the increasing use of social simulation in both its theoretical development and in practical applications such as policy making whereby modelling and the behavior of complex systems is key The book will appeal to students researchers and professionals in the various fields

Interaction, Evolution and Chaos in Space Peter Nijkamp, Aura Reggiani, 2012-12-06 For many decades scholars from various disciplines have been intrigued by the question whether there are unifying principles or models that have a validity in different disciplines The building of such analytical frameworks bridging the gaps between scientific traditions is a very ambitious task and has not been very successful up till now In the past in a static context several such principles have been defined and advocated at the edge of the natural sciences on the one hand and social sciences in particular economics and geography on the other hand mainly based on the paradigm of social physics Some important contributions to the integration of the spatial systems sciences and physics can be found in gravity theory and entropy theory which have formed the corner stones of interaction models in space This book is about spatial interaction models It describes the origin the history and the correspondence of such models from a social physics perspective It is emphasized that such models need a clear behavioural underpinning as a sine qua non for a

valid use in spatial systems analysis This view also explains the use of micro based disaggregate choice models as a tool for analyzing spatial systems This is mainly analyzed in Part A of this book
