Social Inequality And Class Radicalism In France And Britain:

Social Inequality and Class Radicalism in France and Britain Duncan Gallie, 1984-01-26 This book first published in 1983 examines in depth the nature and sources of class radicalism in France and Britain and takes issue with some of the major theories of class consciousness and class action Drawing on data both from detailed case studies and from wider national surveys it shows that the conflict of class interests within capitalist societies can lead to sharply diverging attitudes to class inequality It argues that the explanation of such differences cannot be found in some general law of the evolution of social conflict in capitalist society It must be sought in the profound institutional differences that exist between the two societies In particular the study argues for a reassessment of the importance of the experience of war and of the way in which the business and political elite handled the social crises generated by war in accounting for the long term structural divergence of capitalist societies

Pluralist Thought and the State in Britain and France, 1900-25 Cécile Laborde, 2000-03-07 This is the first comparative study of early twentieth century French and British schools of political pluralism A wide ranging survey of the works of thinkers such as JN Figgis GDH Cole Harold Laski Edouard Berth Maxime Leroy and L on Duguit **Pluralist Thought and the State in Britain and France 1900 25** is a major contribution both to the study of national tradition of political thought and to the understanding of relationships between state groups and individuals in democratic societies

Cultures of Solidarity Rick Fantasia, 1989-08-18 A commonplace assumption about American workers is that they lack class consciousness This perception has baffled social scientists demoralized activists and generated a significant literature on American exceptionalism In this provocative book a young sociologist takes the prevailing assumptions to task and sheds new light upon this very important issue In three vivid case studies Fantasia explores the complicated multi faceted dynamics of American working class consciousness and collective action

State Capitalism and Working-class Radicalism in the French Aircraft Industry Herrick Chapman, 1991-01-01 Using the example of the aircraft industry which takes him like an arrow to the heart of many of the key conflicts in French life between 1936 and 1948 Herrick Chapman has written a penetrating and exceptionally well documented account of the way that France developed her present style of industrial relations in which the state plays such a central role No book I know so successfully integrates the history of aviation with the political and social history of France Both thorough and thoughtful it is an impressive achievement Robert Wohl University of California Los Angeles An unusual innovative book based on impressive research that throws new light in a major way on twentieth century French politics and society one of the most interesting and original monographs in modern French history in a long time Robert O Paxton Columbia University This is a breakthrough of considerable importance Chapman will become the leading North American perhaps even English speaking historian of contemporary France George Ross Brandeis University

Large Firms and Institutional Change Bob Hancké, 2002
 Between 1980 and 1985 the French economy and industry faced a dramatic crisis in the ten years that followed it witnessed a remarkable revival How did the French economy make this transition While the state is still an important economic agent in France and the market certainly has become more central in the organization of the French economy both state and market centered perspectives fail to understand critical elements of this adjustment Building on the new Varieties of Capitalism approach in political economy which puts firms at the center of the analysis this book argues that the post war state led system changed into a system organized by and around the large firms Large firms have always been central in the French post war economic development model In the past however they adapted to patterns set by the central state By exploiting the possibilities in government policies in different areas such as finance labour relations and regional policies the large firms were able to induce their main interlocutors the state banks labour unions workers and small firms to adjust in a way which was congruent with their own interests From subservient economic agents they became the drivers of economic adjustment Through this case study of readjustment in France this book offers a subtle critique of neo institutionalist perspectives on firms Institutional frameworks do not simply offer scenarios for adjustment but are themselves constructions of economic and political actors and therefore subject to change and reorganization By analysing how large firms in France arguably one of the least likely places to harbour such endogenous capacities changed their institutional environment to fit their own needs this book offers an important new perspective on the political economy of industrial and economic change

Reworking Class John R. Hall, 2018-09-05 The twelve essays in this volume propose new directions in the analysis of class John R Hall argues that recent historical and

intellectual developments require reworking basic assumptions about classes and their dynamics The contributors effectively abandon the notion of a transcendent class struggle They seek instead to understand the historically contingent ways in which economic interests are pursued under institutionally socially and culturally structured circumstances In his introduction Hall proposes a neo Weberian venue intended to bring the most promising contemporary approaches to class analysis into productive exchange with one another Some of the chapters that follow rework how classes are conceptualized Others offer historical and sociological reflections on questions of class identity A third cluster focuses on the politics of class mobilizations and social movements in contexts of national and global economic change

Engineering Labour Peter Meiksins, Chris Smith, Boel Berner, 1996-08-17 Engineers often perceived as central agents of industrial capitalism are thought to be the same in all capitalist societies occupying roughly the same social status and performing similar functions in the capitalist enterprise What the essays in this volume reveal however is that engineers are trained and organized quite distinctly in different national contexts The book includes case studies of engineers in six major industrial economies Japan France Germany Sweden Britain and the United States Through a comparison of these six cases the authors develop an approach to national differences which both retains the place of historical diversity in the experience of capitalism and accommodates the forces of convergence from increasing globalisation and economic integration Contributions from Boel Berner Stephen Crawford Kees Gispens Kevin McCormick and Peter Whalley

Nation and Citizenship in the Global Age R. Münch, 2001-08-08 This book is about the formation of nationhood and citizenship and their transformation in the global age The different collective identities which evolved affected particularly by immigration in Britain France the United States and Germany are outlined in a historical genetic and comparative perspective with special emphasis on the case of Germany It looks at the question of transnational civil ties and the identities which emerge during the process of European integration and how they relate to national and sub national identities

The End of Organized Capitalism Scott Lash, John Urry, 2018-03-08 In this thought provoking new book Anthony Smith analyses key debates between historians and social scientists on the role of nations and nationalism in history In a wide ranging analysis of the work of historians sociologists political scientists and others he argues that there are three key issues which have shaped debates in this field first the nature and origin of nations and nationalism second the antiquity or modernity of nations and nationalism and third the role of nations and nationalism in historical and especially recent social change Anthony Smith provides an incisive critique of the debate between modernists perennialists and primordialists over the origins development and contemporary significance of nations and nationalism Drawing on a wide range of examples from antiquity and the medieval epoch as well as the modern world he develops a distinctive ethnosymbolic account of nations and nationalism This important book by one of the world's leading authorities on nationalism and ethnicity will be of particular interest to students and scholars in history sociology and politics

Redefining Regional French David Hornsby, 2022-10-10 This study challenges the orthodox view that emergent

regional varieties of French represent no more than an ephemeral dialect residue of little theoretical interest. It follows the life cycle of an obsolescent urban Picard variety spoken in a mining town in the Pas de Calais and attempts to unravel the complex reasons behind the survival of some local variants at the expense of others. Applying a sociolinguistic model developed by Peter Trudgill, it shows how the processes of levelling and simplification have driven change in a dialect contact situation, giving rise to a new stable variety or koine. This is compared with other new urban varieties in Sweden and the UK where different economic, social and demographic conditions have produced very different linguistic outcomes. The emergence of Regional French in the north, it is argued, may herald the start of a new diversification of French in Europe. This book will therefore interest both students of French and of language variation more generally.
