Ideas and Actions in the Green Movement Brian Doherty, 2005-07-05 The Western green movement has grown rapidly in the last three decades green ministers are in government in several European countries Greenpeace has millions of paying supporters and green direct action against roads GM crops the WTO and neo liberalism have become ubiquitous The author argues that greens share a common ideological framework but are divided over strategy Using social movement theory and drawing on research from many countries he shows how the green movement became more differentiated over time as groups had to face the task of deciding what kind of action was appropriate In the breadth of its coverage and its novel focus on the relationship between

green ideas and action this book makes an important contribution to the understanding of green politics New Perspectives in Political Ethnography Lauren Joseph, Matthew Mahler, Javier Auyero, 2007-09-20 The use of ethnographic research social research based on the observation of individuals or institutions where the researcher becomes part of the group or very close to the group to better understand their actions is becoming more and more of a prevalent methodology within sociology As ethnography gains prominence within the discipline its focus theoretical underpinnings and narrative styles are also expanding to the yet unexamined worlds and institutions of society Politics political institutions and those working in politics state officials politicians and activists have so far missed the lens of the ethnographer As a group politicians and those in politics can be found in every corner of the world While political systems and politicians are by no means the same in every country what brings these people together to be part of the political process Ethnography is uniquely equipped to look microscopically at the foundations of political institutions and their attendant set of practices just as it is ideally suited to explain why political actors behave the way they do and to identify the causes processes and outcomes that are part and parcel of political life The volume based on a special issue of Qualitative Sociology has a two fold purpose to bring politics into the ethnographic literature and of ethnography in studies of politics The case studies included are based on the research of ethnographers studying the various level of politics in Brazil Japan El Salvador Bosnia the Philippines India and the United States It will be of interest to those in the sociology of politics political science and those looking for ethnographic research on a global level **Civil Society and International Governance** David Armstrong, Valeria Bello, 2010-11-23 Annotation This title examines the increasing impact of nongovernmental organisations and civil society on global and regional governance in relation to the UN the IMF the G8 and the WTO The authors assess civil society interaction with the EU Africa East Asia and the Middle East **The Cultural Contradictions of Progressive Politics** Donald Rosdil, 2012-09-10 Why do some U S cities like Seattle and Boston impose social exactions and sustainability targets on private investment while others like Las Vegas and Houston offer property tax and fee remissions to business tolerate environmentally hazardous activities such as oil drilling and express skepticism even about recycling mandates The behavior of the former cities appears especially puzzling in view of globalization processes that seemingly offer many more options to mobile capital and expose cities vulnerability to private investment decisions Cultural Contradictions examines the paradoxical finding that some U S cities can impose burdensome regulations and extract social and environmental contributions from the private sector despite an apparently weak bargaining position It uses cultural change and the growth of non traditional subcultures to explain why cities adopt these progressive policies Responding to the urban policy literature's tendency to prioritize economic considerations over other kinds of causal factors the book demonstrates the joint impact of culture and economics in encouraging policy outcomes which emphasize social justice human rights and environmental sustainability in large U S cities The book makes several specific contributions to urban literature First it argues that cities in

which nontraditional cultural beliefs and practices thrive and which are strongly linked to dynamic economic sectors such as information services professional scientific and technical services financial services and education and health care services are especially likely to adopt progressive policies It establishes this claim using both statistical analysis of large N city samples and a closer investigation of four case studies Second it reveals how progressive policies are a plausible response to psychological concerns associated with unconventional ways of life and the nature of postindustrial society Finally the book indicates how these new ways of life and postindustrial economic sectors grow in mutually reinforcing ways in order to make these policies acceptable to local economic elites and therefore favorable to the city s future development **Democratic**

Phoenix Pippa Norris,2002-09-02 Conventional wisdom suggests that citizens in many countries have become disengaged from the traditional channels of political participation Commentators highlight warning signs including sagging electoral turnout rising anti party sentiment and the decay of civic organizations But are these concerns justified This book compares systematic evidence for electoral turnout party membership and civic activism in countries around the world and suggests good reasons to question assumptions of decline Not only is the obituary for older forms of political activism premature but new forms of civic engagement may have emerged in modern societies to supplement traditional modes The process of societal modernization and rising levels of human capital are primarily responsible although participation is also explained by the structure of the state the role of agencies and social inequalities Beyond Post-communist Studies Terry D.

Clark,2016-07-08 This book makes the case that several East Central European countries have emerged as fully consolidated democracies As such they may be integrated into the mainstream of political science research and not consigned forever to a transitional category encompassing countries that are now fully democracies as well as some that are not democratic at all The author outlines the steps of another transition from post communist studies to political science research He demonstrates how institutionalist or rational choice theories can be applied to the analysis of political processes in the successfully democratized countries and proposes a new research agenda for political scientists studying the region The results of this work can enrich political science as well as our understanding of both democracy and the politics of contemporary Eastern Europe *Bowling Alone* Robert D. NGOs in Contemporary Britain N. Crowson,M. Hilton,J. Political Protest in Western Europe Mario Quaranta,2015-09-14 This book analyzes the individual and contextual determinants of protest politics in Western Europe Building on different theoretical perspectives from social movements theory to political behavior approaches the author provides new empirical evidence on the patterns of protest politics

Readers will discover why some citizens are more likely to get involved in protests than others and why levels of protest differ from country to country The author illustrates that engagement in political protest is often rooted in the interplay of the protester s individual characteristics and their home country s contextual characteristics The World Says No to War Stefaan Walgrave, Dieter Rucht, On February 15 2003 the largest one day protest in human history took place as millions of people in hundreds of cities marched in the streets rallying against the imminent invasion of Iraq This was activism on an unprecedented scale The World Says No to War strives to understand who spoke out why they did and how so many people were mobilized for a global demonstration Using surveys collected by researchers from eight countries Belgium Britain Germany Italy the Netherlands Spain Switzerland and the United States The World Says No to War analyzes how the new tools of the Internet were combined with more conventional means of mobilization to rally millions many with little experience in activism around common goals and against common targets Contributors W Lance Bennett U of Washington Michelle Beyeler U Bern Christian Breunig U of Toronto Mario Diani U of Trento Terri E Givens U of Texas Austin Bert Klandermans Free U Amsterdam Donatella della Porta European U Institute Wolfgang Rüdiger U of Strathclyde Sidney Tarrow Cornell U Peter Van Aelst U of Antwerp *Violence Against Women in the Global South* Andrea Jean Baker, Celeste González de Bustamante, Jeannine E. Rely, 2023-08-01 Bringing together 14 journalism scholars from around the world this edited collection addresses the deficit of coverage of violence against women in the Global South by examining the role of the legacy press and social media that report on and highlight ways to improve reporting Authors investigate the ontological limitations which present structural and systemic challenges for journalists who report on the normalization of violence against women in country cases in Argentina Brazil Mexico Indonesia Kenya Nigeria South Africa Egypt Libya Syria and Yemen Challenges include patriarchal forces gender imbalance in newsrooms propaganda and censorship strategies by repressive hyper masculine and populist political regimes economic and digital inequities and civil and transnational wars Presenting diverse conceptual methodological and empirical chapters the collection offers a revision of existing frameworks and guidelines and aims to promote more gender sensitive trauma informed solutions driven and victim or survivor centered reporting in the region **Social Movements and Protest Politics** Greg Martin, 2023-12-22 This fully revised and updated edition of Social Movements and Protest Politics provides interdisciplinary perspectives on the sociology of protest movements It considers major theories and concepts which are presented in a clear accessible and engaging format The second edition contains new chapters on methods and ethics of social movement research and legal mobilisation protest policing and criminal justice activism including calls to abolish or defund police made at protests during the COVID 19 pandemic This edition introduces readers to the concept of the post protest society wherein the right to protest is whittled away to near vanishing point and authorities have considerable legal recourse to ban protests and render the tactics of protest movements ineffective The book also looks at recent developments and novel social movements including Black Lives Matter Extinction Rebellion Gilets

Jaunes MeToo and Hong Kong's Umbrella Movement as well as the rise of contemporary forms of populism in democratic societies. The book presents specific chapters outlining the early origins of social movement studies and more recent theoretical and conceptual developments. It considers key ideas from resource mobilisation theory, the political process model and new social movement approaches. It provides extensive commentary on the role of culture in social protest, including visual images, emotions, storytelling, music and sport, religious movements, geography and struggles over space, media and movements and global activism. Historical and contemporary case studies and examples from a variety of countries are provided throughout, including the American civil rights movement, Greenpeace, Pussy Riot, Indigenous peoples' movements, liberation theology, Indignados, Occupy, Tea Party and Arab Spring. Each chapter also contains illustrations and boxed case studies to demonstrate the issues under discussion. *Social Movements and Protest Politics* will be an indispensable resource for undergraduate and postgraduate students in the social sciences and humanities wanting to be introduced to or extend their knowledge of the field. The book will also prove useful to university teachers and academic researchers, activists and practitioners interested in the study of social, cultural and political protest. *When Movements Become Parties* Santiago Anria, 2018-11-15.
