Social Science Projects You Can Do:

Finding your Social Science Project John Gerring, Jason Seawright, 2022-10-13 The most important step in social science research is the first step finding a topic Unfortunately little guidance on this crucial and difficult challenge is available Methodological studies and courses tend to focus on theory testing rather than theory generation This book aims to redress that imbalance The first part of the book offers an overview of the book's central concerns How do social scientists arrive at ideas for their work What are the different ways in which a study can contribute to knowledge in a field The second part of the book offers suggestions about how to think creatively including general strategies for finding a topic and heuristics for discovery The third part of the book shows how data exploration may assist in generating theories and hypotheses The fourth part of the book offers suggestions about how to fashion disparate ideas into a theory *Social Science Projects You Can Do* Thomas P. Weinland, Donald W. Protheroe, 1973-01-01 **Help Me Decide!** Anne Boyd, James Boyd, 2000 Challenge students to think critically about their own behavior and decide how to change it as they engage in 40 real life scenarios such as How Can I Get the Teacher Off My Back Caught in the Act and I Don't Do Drugs Accompanying activities help kids discover their behavior options learn to set behavior goals and then develop strategies for reaching those goals Taking the emphasis off controlling behavior this book teaches students to understand how they are behaving why they are behaving that way and how they can change their behavior and their lives **Completing Your Research Project** Charlotte Brookfield, Jamie Lewis, 2025-01-08 Simple Comprehensive Logical This book is a companion guide for anyone completing a research project in the social sciences It covers the whole research process from planning developing collecting data analysing data and writing up It will help you manage and complete your research project successfully It will guide you on Planning your research project Developing data collection tools Analysing and interpreting data Presenting your research in different formats Featuring chapter objectives checklists student exercises weblinks and further reading this comprehensive guide ensures readers navigate the complexities of research within a manageable step by step framework *The Complete Workbook for Science Fair Projects* Julianne Blair Bochinski, 2004-12-15 Your personal coach and game plan for creating a unique award winning science fair project Developing a science fair project from the ground up can be a daunting task and today's science fairs are more competitive than ever before The Complete Workbook for Science Fair Projects takes you step by step through the entire process of brainstorming finding completing and submitting an award winning science fair project of your very own The special features of this easy to use interactive workbook include Complete instructions and fun meaningful exercises to help you develop a science fair project idea from scratch Expert advice on choosing and researching a topic finding a mentor conducting an experiment analyzing your findings putting together a winning display and much more Inspiring stories of real projects that show how students solved particular problems This ingenious guide also helps you prepare to deliver a top notch oral presentation and answer questions from science fair judges Plus you'll find sample project

journal worksheets a handy list of scientific supply companies and lots of space to record your thoughts and ideas as you work on your project Today's exciting world of science fairs and contests offers many great opportunities With *The Complete Workbook for Science Fair Projects* you'll learn to think like a scientist and create a more effective impressive science fair project opening the door for an amazing science journey ***Research Design & Method Selection*** Diana Panke, 2018-09-10 Heavily grounded in helping students make the best choices for their projects this book explores how to develop and work with theory research questions and method selection to build solid logical proposals and move from research concepts to fully realized designs Rather than rushing initial planning stages or reverse engineering questions from preferred methods it encourages students to challenge unconscious biases around method selection and analysis and provides step by step guidance on choosing a method that is in line with the question being explored Focused on the role of the researcher within research design it stresses the need to consider the theoretical underpinnings of research and not just practical issues when designing a project It provides a sophisticated toolkit to understand the critical issues associated with both qualitative and quantitative methods The approach that works best for specific research questions How design choices can affect practice Perfect for upper undergraduate and postgraduate students this book will instil confidence and good decision making to ensure constructively informed design and practice ***How to Do Your Social Research Project Or Dissertation*** Tom Clark, Liam Foster, Alan Bryman, 2019 For final year social science undergraduates *How to do your Social Research Project or Dissertation* is the most student led guide to confidently navigate the research process It shares real student and supervisor experiences to help motivate you provides advice for efficient time management and tracks your progress through focused checklists ***Handbook of Computational Social Science, Volume 2*** Uwe Engel, Anabel Quan-Haase, Sunny Liu, Lars Lyberg, 2021-11-10 The *Handbook of Computational Social Science* is a comprehensive reference source for scholars across multiple disciplines It outlines key debates in the field showcasing novel statistical modeling and machine learning methods and draws from specific case studies to demonstrate the opportunities and challenges in CSS approaches The *Handbook* is divided into two volumes written by outstanding internationally renowned scholars in the field This second volume focuses on foundations and advances in data science statistical modeling and machine learning It covers a range of key issues including the management of big data in terms of record linkage streaming and missing data Machine learning agent based and statistical modeling as well as data quality in relation to digital trace and textual data as well as probability non probability and crowdsourced samples represent further foci The volume not only makes major contributions to the consolidation of this growing research field but also encourages growth into new directions With its broad coverage of perspectives theoretical methodological computational international scope and interdisciplinary approach this important resource is integral reading for advanced undergraduates postgraduates and researchers engaging with computational methods across the social sciences as well as those within the scientific and engineering sectors ***Strategies for Writing a Thesis by Publication***

in the Social Sciences and Humanities Lynn P. Nygaard, Kristin Solli, 2020-10-12 Responding to the growing popularity of the thesis by publication within doctoral education this book offers practical advice and critical discussion of some of the central choices and challenges that PhD students considering dissertation options face Drawing on current research and informed by extensive experience of working with and running workshops for PhD candidates who write article based dissertations this book gives readers an idea of what writing a thesis by publication entails what its purpose is what the various expectations might be for this emerging genre and what the challenges might be in writing one Particular emphasis is put on how to put the individual articles together to create a coherent thesis that clarifies the student's individual original contribution Written primarily for students Strategies for Writing a Thesis by Publication in the Social Sciences and Humanities covers key topics such as how the genre has developed with an emphasis on the role of the narrative introductory text that accompanies the articles typical rhetorical challenges that writers of such dissertations face strategies for handling the writing process specific challenges of demonstrating doctorateness in the thesis by publication and strategies for addressing them institutional variations that the thesis writer should seek clarification on as early as possible structural elements of the narrative and their main functions the range of choices that can be made throughout the doctoral journey and thesis writing This book is a must read for PhD candidates and supervisors new to the genre as well as those involved in directing PhD programmes who are interested in the pedagogical implications of the move towards article based dissertations The Insider Guides to Success in Academia offers support and practical advice to doctoral students and early career researchers Covering the topics that really matter but which often get overlooked this indispensable series provides practical and realistic guidance to address many of the needs and challenges of trying to operate and remain in academia These neat pocket guides fill specific and significant gaps in current literature Each book offers insider perspectives on the often implicit rules of the game the things you need to know but usually aren't told by institutional postgraduate support researcher development units or supervisors and will address a practical topic that is key to career progression They are essential reading for doctoral students early career researchers supervisors mentors or anyone looking to launch or maintain their career in academia

[Policy Research in Educational Settings](#) Jenny Ozga,1999-11-16 This book argues for independent critical research on education policy in the context of attacks on the

quality and usefulness of educational research in general. It takes issue with the argument promoted by government departments and agencies that education policy research should be limited to work that assists policy makers. Against this position, the book advocates independent critical research that scrutinizes policy in relation to its consequences for equality and social justice. It argues that practitioners and academic researchers should form a research community that develops its own knowledge base from which so-called evidence-based policymaking in education may be assessed and challenged. The book offers guidance on the theoretical and methodological resources available to practitioners and others with an interest in doing research on policy and discusses some of the main issues and problems in doing policy research on education. It offers examples of research on policy at different system levels pursuing themes such as globalization, changing governance of education, selection, choice, and exclusion, managerialism, and the feminisation of educational management. It argues for attention to the history of policy in education as a resource for understanding the present and concludes with recommendations for future research in areas where contestation of official agendas is needed.

Video in Social Science

Research Kaye Haw, Mark Hadfield, 2011-03-24. In this digital age, the use of video in social science research has become commonplace. As sophistication has increased along with usability, as spiralling staff costs push out direct observation, the researchers training today are grasping video as a means of coming to terms with the continued pressure to produce accessible research. However, the fit of technology with research is far from simple. Ideally placed to offer guidance to developing researchers, this new text draws together the theoretical, methodological, and practical issues of effectively using video across the social sciences. This book concentrates on how researchers can benefit from the use of video in their own research, whether it is video as representation, video as an aid to reflection, video that generates participation, video voice and articulation, or video that acts as a provocation. In turn, each of these five central functions is discussed in relation to different stages of the research process, consisting of research design, fieldwork and data collection, analysis of data and findings, dissemination. As a practical research tool, this book shows how, why, and when video should be used, representing an invaluable guide for postgraduate and doctoral students conducting research in the social sciences, as well as any researchers, academics, or professionals interested in developing technologically informed research.

Doing Computational Social Science John McLevey, 2021-12-15. Computational approaches offer exciting opportunities for us to do social science differently. This beginner's guide discusses a range of computational methods and how to use them to study the problems and questions you want to research. It assumes no knowledge of programming, offering step-by-step guidance for coding in Python and drawing on examples of real data analysis to demonstrate how you can apply each approach in any discipline. The book also considers important principles of social scientific computing, including transparency, accountability, and reproducibility. It understands the realities of completing research projects and offers advice for dealing with issues such as messy or incomplete data and systematic biases.

Empowers you to learn at your own pace with online resources including screencast tutorials and datasets that enable you to practice your skills and get up to speed For anyone who wants to use computational methods to conduct a social science research project this book equips you with the skills good habits and best working practices to do rigorous high quality work

Programming with Python for Social Scientists Phillip D.
